McCormick-Deering
Endgate Lime Spreader

The McCormick-Deering Endgate Lime Spreader is built in one size only, weighs 174 pounds, and is driven by a chain from the main driving sprocket which is fastened securely by clip and hook bolts to the wagon spools. A throw in or out of gear is provided so the operator can spread the desired amount per acre.

The McCormick-Deering Endgate Lime Spreader can be adjusted to fit any 36-inch to 40-inch wagon box in double-quick time. It slips easily between the endgate cleats without the boring of holes to be filled.

HOPPER EASILY FILLED

The hopper fits flush with the wagon box bottom, so the pulverized lime need not be lifted while shoveling but is simply pushed into the hopper.

INCREASES CROP YIELD

The McCormick-Deering will spread evenly pulverized lime, wet or dry, powdered lime or lumpy, and is adjustable to spread the desired amount per acre.

To see this lime spreader in the field is to appreciate its worth. Spread lime, it pays; but it with a McCormick-Deering. It means reducing labor and saving time, and besides a bigger yield.

Price \$42.50
Saves Time and Reduces Labor

AN Antidote for LONELINESS

To you modern women, telephone service is a boon. It means freedom from the pangs of loneliness. For it stands ready to bridge the gulf between you and your friends in town, or those in distant places.

And what of the sense of security afforded by the telephone? What a comfort it is to have that in case of emergencies you are within striking reach of the various protective agencies—the police, hospital, doctors, fire department.

How you ever reckoned the cost of telephone service compared to the comforts and conveniences it returns to you?

FOUR THE BEST REFRIGERATOR
Kill the winter-evil fly. A small refrigerator will make nearly six billion fewer flies in the house than the open refrigerator. The rapidly with which flies multiply in the open refrigerator is estimated at 1,000,000,000,000, according to the calculations of Dr. Howard, chief entomologist at Washington, D. C.

If every winter-evil fly were killed when it first appeared in the spring, approximately 30,000,000,000,000 flies would be killed in the season as effective as killing millions in mid-summer.

It is now in season. Abundant and inexpensive. It will save you money.

We begin now to fight the fly. We must not let the fly get a head start. It is now in season. Abundant and inexpensive. It will save you money.

Washington, D. C.

MALE FOUR DOLLARS WORK FOR YOU
By N. W. Strain, President American Society for Third.

Everyone has some idea of what the advantages of financial trust are due to the fact that you have money in ever increasing numbers. The rapidly with which flies multiply in the open refrigerator is estimated at 1,000,000,000,000, according to the calculations of Dr. Howard, chief entomologist at Washington, D. C.

PLAY SAFE!
Don't Gamble with "Cheap" paint

"Cheap" paint plays a crafty game and beats you every time. You can't save even a little money using "cheap" paint. Stick to fine old SWP—the best that money can buy—and engage a first class painter. Then you'll be money ahead.

Sherrill-Williams "Quality" products—varnishes, lacquers and enamels and a Master Painter will always save you money—give you far more service and satisfaction. See us for estimates on materials.

CIGARETTE SMOKING SHOWS BIG INCREASE

A tremendous increase in cigarette smoking in the United States during the first seven months of the 1929 fiscal year was indicated Wednesday in statistics made public by the internal revenue bureau.

The figures showed that over the six-month period cigarette sales were valued at \$128,000,000 as compared with \$121,000,000 for the same period of the previous year. An increase of \$7,000,000 was shown.

The number of cigarettes sold during the first seven months of the 1929 fiscal year was 11,215,000,000 as compared with 10,745,000,000 for the same period of the previous year.

The increase in cigarette sales was due to a number of factors, including a decrease in the price of cigarettes, a decrease in the number of cigarettes per pack, and a decrease in the number of packs per case.

THE OLD SPRING HOUSE

Down in the hollow—deep in the shade,
Is the old Spring House that Grandpa made

TRICKLING water—cool mossy stones—jars of milk and crocks of butter. The rocky path—the slick steps and the perilous job of heaving awkward containers of food to the damp chill spring.

But the spring run dry and Grandpa's grandsons scarcely noticed it passing.

An electric refrigerator guards and chills his food just eight (count 'em) steps from his dining room.

A steady dry even temperature is always maintained. Food is always kept cool and fresh.

Electricity attends to all your refrigerator as well as to other appliances in your home. It is a real servant. It never sleeps—never tires. Above all it is reliable and cheap. Use it generously.
