ROOSEVELT: AMERICAN

When Theodore Roosevelt was a small boy he noticed that other boys were fairer than he could run better than he could and were not so clumsy as he.

One day his playmates read, on a blackboard, the letters of a painted sign. When Theodore tried to decipher the words he found the letters impossible to distinguish. He told his father of this and the parents took the little fellow to have his eyes examined. A serious fault was found to exist in the construction of John Wesley Hardin, a sure marksman, excellent horseman, a great success in all that he undertook.

Had Theodore Roosevelt's father been as inconsiderate as most fathers he would never have been Governor of New York nor President of the United States but instead would have been a total failure in life.
