POOR VISION IS VERY EXPENSIVE

It delays promotions and increases health and accident hazards. It brings discomfort, ill-health and costly visits to physicians' bills. It acts as a barrier to many pleasures. It is a handicap too much to permit it a day longer than necessary.

The mark of the efficient, aggressive, up-to-date person or woman is equipment which will enable him or her to make the most of life's opportunities. Good vision is a positive requirement for successful achievement in most lines of endeavor. It is necessary moreover for a proper enjoyment of the social and recreational side of life. Life cannot be completely lived to any one with poor vision. It is a serious handicap.
