ARMOUR'S BIG CROP FERTILIZER

Should help you meet this year's market conditions, whatever they may be. If the crop is short it will result in higher prices and if you are Armourized, of course you will have more pounds of highest quality to sell. If it's a big crop at lower prices you should be aware the average in yield, quality and price, all of which should reflect in a larger net return per acre. Either way we believe a liberal application of Armour's plant food will more than pay its way. Carlisle Mill & Supply Company.
