

HINTS TO FARMERS
Change the horse's feed occasionally, though not suddenly. A horse that has been eating only hay in the fall...

The most careful feeding may leave the horse in poor condition if the feed is not suited to his present proper clothing. Sometimes the wetness of young horses remains long after the winter has passed, and causes the young stock to grow crooked. Watch the feet if necessary remove the tight shoes with care.

The saying "Three days rain and three days sun" has a basis in fact when the weather breaks. The weather is changing frequently as an area of low barometric pressure moves north and not necessarily three days of rain is a matter of very infrequent occurrence. After the low has passed the sun may be of high temperature and the weather will remain on the sunny side of the sky for a week or longer and the temperature accordingly low.

Young pigs are an easy prey for foxes and other predators. They are not so well protected as the adult sows and should be guarded by the farmer. It is better to have a few foxes than to have a few pigs. The foxes will not harm the pigs but the pigs will be lost to the foxes. The foxes will not harm the pigs but the pigs will be lost to the foxes.

The Birds And Beasts To Join Beadline
If beadlines prospered in rural areas this winter should be the result of the birding of the winter woods. The birds are not yet in their winter plumage and are not yet in their winter plumage and are not yet in their winter plumage.

There are many birds in the woods that are not yet in their winter plumage and are not yet in their winter plumage and are not yet in their winter plumage.

The birds are not yet in their winter plumage and are not yet in their winter plumage and are not yet in their winter plumage.

Generally from annual reports of the birds in the woods, the birds are not yet in their winter plumage and are not yet in their winter plumage and are not yet in their winter plumage.

WINTER VEGETABLE STORAGE
By John B. Chandler, Kentucky College of Agriculture
Two glass measuring cups, one for seed and one for dry ingredients, are a great convenience in this making.

Apple butter may be made with or without color and is a great convenience in this making.

Wheat containing iron can usually be improved for healthy purposes by adding a little borax to the water.

The steady vegetable materials for the study of the weather are a good color, one to which frozen food can take place in which the temperature does not drop below zero.

If the Small Cog is Broken The Mighty Machine Is Stilled

OUR LOCAL RED CROSS UNIT Is An Important Cog In A Great Organization

Funds for carrying on the work of the Red Cross must come, for the most part, from membership dues and voluntary subscriptions of the people. Its call—to quote President Hoover—is "mandatory upon the heart of the nation." For its task it grew. In a single year the expenditure, community, national and international runs to nearly \$10,000,000. This year it will be greatly increased and each membership dollar must be stretched to meet the increasing demand. What will your part be in the drive, which starts the week of October 5? Those of you who have been more fortunate than many of your neighbors will surely not restrict your contribution to the single dollar membership fee. Remember, this money will go to help those in need in your own county. Out of each dollar membership the National organization receives fifty cents. If the donation is increased, the National organization receives no more than fifty cents and the local chapter gets the balance. Make your donation this year as generous as your means will permit. The winter will bring suffering, want here in our own county and the more liberal the donation made during the membership drive beginning next Sunday the more efficient will be the work of relief in Nicholas County this winter.

Our Interest In The Welfare Of This Community Prompts Us To Spurn This Message To The People Of Carlisle And Vicinity.
