## What are you doing to protect your health and the health of your family?

This Happens in Every Home

The dust lag of your vacuum cleaner is porous. It must retain the dirt and grit drawn into it and yet permit the air to pass freely into the room. Without such easy filtration, a suction cleaner cannot be efficient. While much of the germ-laden dust is held within the bag, minute, invisible particles are returned to the room to be inhaled by you and your family.

### The New Royal Purifier Destroys Germs—Keeps You Home

**SANITARY AND CLEAN**

ROYAL PURIFIER is entirely new—bringing you SUPER SANITATION WITH SUPER CLEANLINESS. Not only does it remove every particle of dirt and dust, but also at the same time purifies through a sterilization process that kills the germs. The germicidal vapors generated in the chemical chamber mix with the dust gathered from floor, furniture or wall, exposing the harmful bacteria to its powerful fumigation, after which the air is returned to the room wholesome and pure.

During September we will offer with each ROYAL PURIFIER a choice of either a
