Administrator's Sale

Of Stock, Farming Implements and Household Goods

As administrator of the estate of the late C S. Templeman, I will offer at public auction at the home place on the Carlisle and Moorefield Turnpike road in Nicholas County, Ky., near Moorefield, on

SATURDAY, SEPTEMBER 20, 1930

at ten o'clock a. m., all of the stock, farming implements and household goods of the late C. S. Templeman, as follows:

1 buggy and harness
1 sheep feed rack
60 tooth harrow
1 stack of hay
1 binder,
1 hayrake and cultivating plows
About 1 ton and a half of good coal
Other farming implements

25 purebred Southdown ewes
1 buck, purebred Southdown
1 farm team, horse and mare
1 riding and driving horse
1 mowing machine and breaking plows

All of the household and kitchen furniture contained in an eight room house.

Among same are quite a number of antiques of the rarest kind and ages.

Also musical instruments, piano and Star talking machine, with records.

TERMS: All sums under $20.00, cash; over that sum, due in three months, with bankable note.

R. P. TEMPLEMAN
Adm. of C. S. Templeman
Thos. Jackson, Auctioneer.

Why Women Prefer ALLEN'S PARLOR FURNACE

Modern Heat With Oldtime Fireside Cheer

WHEN you buy an Allen's Parlor Furnace you will have, not only the most modern and efficient above-the-floor warm-air furnace, but a heating system that offers you these advantages:

1—Combines circulated, moist, warm-air heating with oldtime fireside cheer.
2—Harmonizes with latest furniture. Beautiful natural walnut effect is reproduced in porcelain—enamel finish.
3—Burns any fuel—saves 25 to 50 per cent. Generously proportioned doors and firebowl.
4—No smoke, dust and dirt. Hot blast smoke consumer. Efficient with cheap fuels. Ash door is on the side and closed when grates are shaken. Roomy ash pan.
5—Designed and constructed low on the floor to warm lowest strata of air, insuring warm floors.
6—Vapor pan, supplied under fire pot, evaporates water in grid, supplies moisture to the warm air.
7—Quickly installed with few connections; work of plumbing expense. Take it with you when you move.
8—Heat radiation surface increased 100 per cent by Heat Radiating Fins—an exclusive Allen Feature.
9—Requires minimum of attention. Only necessary to take down and put up two different sections.
10—Manufactured and guaranteed by one of the oldest and best known makers of warm-air furnaces in the country. Every unit guaranteed by us.

Expert Says Podless Soybeans May As Well Be Cut Now

Nothing will be gained by delaying the cutting of soybeans where drouth prevented the development of pods, says the College of Agriculture, University of Kentucky, in the following statement regarding the making of soybean hay this year.

"In many parts of the state soybeans have been seriously affected by the drouth and have made only short growth. The rains which have occurred recently in many sections have prevented the dropping of the leaves and started some renewed growth. Not many pods have been set, and most people are letting the plants stand, thinking that they are not yet in condition to cut.

"Beans that have not developed pods do not mature normally; in fact they will stay green for weeks if normal moisture conditions occur later. This probably will be the situation this year. Beans without pods or with very few pods will probably remain green and in condition to cut for some time without any deterioration. They will not grow to any extent, however, and whenever conditions are favorable for cutting them the crop might as well be made into hay.

"Where seasonal conditions have been more favorable and the beans have developed a good set of pods, the usual custom in regard to time of cutting should be followed. This is to cut when the beans in the pods are perhaps half-grown or less than half-grown. If allowed to develop fully, even though the pods are not dry, the crop is difficult to cure because the pods dry out so slowly. If the beans are allowed to stand until the stems and leaves begin to dry, the resulting hay is little better than soybean straw."

TIMELY TOPICS

By John S. Gardner, Kentucky College of Agriculture

Our fall gardens may not be as large or contain as large a variety, as they would have if the season had been kinder, but what there is is all the more valuable, and all the more worthy of our best effort, said care.

Many of us have a late planting of potatoes. The stand may not be satisfactory and the condition, either bur that is all the more reason for giving them assistance. That assistance is Bordeaux mixture. Bordeaux is a control for blight but it is a tonic, as well. Spraying causes the plants to grow larger, and more rapidly, especially in hot weather, and it helps even in dry weather. It makes the leaves, themselves, larger and improves their color. All this is important in any season, but all the more so now.

The Bordeaux formula to use is 5-5-50. Home mixing may be done, but most gardeners will find it more convenient to use the ready-prepared Bordeaux that all seedsmen and druggists handle. The directions for its mixing are on the package. The first spraying should be given as soon as possible, and 2 or 3 to follow at 2-week intervals.

Some of us may have noticed the swarms of minute goat-like insects that rise when the potato plants are disturbed. These are leafhoppers. Because of their size it is usual to underestimate the harm they do, but their damage is by no means to be ignored. They are responsible for the browning of the margins of the leaves, the result of their draining them of sap; the damage that cannot be seen by the casual eye is even greater.

Straight Bordeaux is somewhat of a deterrent to leafhoppers, but adding a tablespoonful of lead arsenate, or calcium arsenate, to each gallon of Bordeaux mixture makes it a control.

Many of us have some late kale and turnips, and these may be attacked by plantlice at almost any time, the cheerful prognostication of too optimistic gardeners, that there will be no flee, to the contrary. This is a reminder in case they come.

Tobacco decoction in some form is the control for lice. Home-steeped "tea" may be used, but a much more reliable remedy is tobacco extract. Leaf 40, used as a spray, after the directions on the container.

Nicotine sulphate dust may be used in place of a liquid spray. This material may be secured from the dealers who handle Black Leaf 40, or it may be made at home. The formula is 2 pounds of Black Leaf 40, and 2 pounds of hydrated lime.

To make this dust ideally, a mixer should be used, but gardeners may improvise an apparatus that will serve quite well. This is simply a shallow wooden box, whose bottom is made of fly-screen wire.

The ingredients, lime and Black Leaf 40, are put in in the proportion of 2 to 50, by weight, and then the mass is worked through the screen by means of a stiff brush, an inexpensive scrub brush for instance. After being worked through twice, a very acceptable dust results.

It should be used immediately, for unless it is put into an airtight container, the nicotine fumes, which do the killing, soon leave.

For best results from tobacco dusting or spraying, the air temperature should be 60 degrees or higher.

THE TWO NESTS

(Francis Cullin)

The wonder was on me in Curranginarcall,
When I was as tall as the height of your knee,
That the wren should be building a hole in the wall
Instead of a nest in a tree.

And I still do be thinking it strange, when I pass
A pasture that has to be evenly ploughed,
That the lark should be building a hole in the grass
Instead of a nest in a cloud.

CLASSIFIED ADS PAY

BEN WILLIAMSON IS MAKING ACTIVE RACE

MANY FRIENDS GIVE SUPPORT

Ashland Business Man, Leader in Crippled Children's Movement and Road Development, In First Campaign.

NEW FIGURE AS CANDIDATE

Ben Williamson, of Ashland, Democratic nominee for the short term for United States Senator and running mate of Judge M. M. Logan, the candidate for the long term, is receiving letters from all over the state pledging support to him and to the ticket.

Mr. Williamson fills the bill when a business man for public office is sought. He is at the head of one of the largest business enterprises in Kentucky, the second largest wholesale hardware company. In addition he is interested in banking, mining, real estate and manufacturing.

For fifty years Mr. Williamson has given unselfish service to the Democratic party and to the people of Eastern Kentucky. He never before has been a candidate for public office. He has been vitally interested, however, in public and humanitarian movements. He was a member of the first Kentucky Crippled Children's commission and has remained a member of that commission since, was a member of the state board of charities and corrections and is now a director of the International Society for Crippled Children. He was appointed a director in the International society at the meeting in Geneva, Switzerland, which he attended because of his interest in the program in Kentucky.

Mr. Williamson also has been a leader in promoting road improvement in the state and was particularly active in the development of the Midland Trail and of the Mayo Trail.

In politics Mr. Williamson brings the business man's viewpoint. Because they know him and are pleased that he is willing to make the race for the short term at the call of the Democratic party, friends who have been associated with Mr. Williamson in various kinds of work for the party and for the state have sent him personal letters and offers of assistance in the campaign.

It is freely predicted that Mr. Williamson will receive the largest vote ever given to a Democratic nominee in his present home county, Boyd, and in the counties of Eastern Kentucky where he best is known.

Mr. Williamson is making a vigorous campaign and will visit many Kentucky counties in the interest of the ticket.

COMMISSIONER'S SALE

NICHOLAS CIRCUIT COURT

The Federal Land Bank of Louisville ..... Plaintiff
C. J. Arthur, Connie H. Arthur, Nicholas County National Farm Loan Association, and Farmers Bank of Millersburg ..... Defendants

By virtue of a judgment and order of sale of the Nicholas Circuit Court rendered at the May term, 1930, therein, in the above styled cause, the undersigned will on the 22nd. day of September 1930 at 2 o'clock p. m. at Carlisle, Ky., being the first day of the September 1930 Term of the Nicholas Circuit Court proceed to offer for sale at public auction to the highest bidder on a credit of six and twelve months, at the Court House door in Carlisle, Nicholas County, Kentucky the property mentioned in the judgment herein and described as follows, to-wit:

Consisting of 170 acres, 1 rood and 1 poles, and is situated on the waters of Hutchins Creek, near the village of Headquarters.

FIRST TRACT: "Beginning in the center of the Millersburg and Headquarters Turnpike Road in a line of Mrs. S. G. Rogers corner tract and corner to parcel No. 1; thence South 2 E 89.20 poles to a stone corner to said dower; thence N 63¼ E 49.64 poles to a stone corner to said dower; thence S 9 E 42.50 poles to a stone corner to said dower; thence S 78 W 1.64 poles to a stone corner to Mrs. Ella Norvell's line; thence S 9½ W 6.24 poles to a stone corner to Wm. Fuller in Mrs. Norvell's line; thence N 80¾ E 29.80 poles to a stone corner to Wm. Fuller; thence S 22 E 95 poles to a stone corner to said Fuller; thence N 61 E 43.80 poles to a stone in J. Lawson in Fuller's line; thence N 12 W 209.50 poles to a corner to Mark Burris; thence N 20 E 69 poles to a slope on the southeast side of the aforesaid turnpike and corner to parcel No. 1; thence with said turnpike road S 83¼ W 99.84 poles, S 88¼ W 22.44 poles, S 59¾ W 55.20 poles to the beginning, containing 155 acres, 2 rods and 28 poles."

SECOND TRACT: "Beginning at a stone in Nannie Maitlers' line and corner to lot No. 1, in said division; thence N 13¼ W 46.80 poles to a stone in said line and corner to lot No. 2, in said division; thence S 76¾ W 34.64 poles to a sugar tree corner to No. 3 in said division; thence S 20 E 6.72 poles to a stone near the south west corner of a stable corner to No. 3, in said division; thence S 76¾ W 8.80 poles to a stone 16 links S 20 E from the center of the well; thence N 20 W passing over the center of the well 6.72 poles to a stone corner to No. 3 in said division; thence S 76¾ W 16.76 poles to a stone in R. A. Thompson (now C. J. Arthur line corner to No. 3 in said division; thence S 13¼ E 28.80 poles to a stone corner to said Arthur in Fuller's line; thence N 59½ E 19.56 poles to a stone corner to Fuller; thence S 12¼ E 9 poles to a stone in Fuller's line and corner to No. 1, in said division; thence N 79¾ E 39.75 poles to the beginning containing 14½ acres."

First tract of the foregoing being the same land that was conveyed to C. J. Arthur by A. T. Moffett et al by Deed of record in the office of the Clerk of the Nicholas County Court in D. B. 22 Page 124.

Second Tract being the same that was conveyed to Cummie H. Arthur by Bettie L. Dewitt, J. W. Dewitt her husband, by deed of record in the office of the Clerk of the Nicholas County Court in D. B. 28, Page 426.

The amount of The Federal Land Bank of Louisville debt is $9972.04 with interest thereon at the rate of 5½ % per annum from September 1st. 1929 and interest on $341.25 at 6% from March 1st. 1930. The amount due The Farmers Bank of Millersburg Kentucky is $500.00 with 6% interest from March 5th. 1930. Costs $207.06

The purchaser will be required to give bond, with approved security for the payment of the purchase money to have the force and effect of a Replevin Bond, bearing legal interest from date of sale.

Bidders will be prepared to comply with these terms. A lien will be retained on the land sold until all the purchase money is paid. Bonds payable to Wm. Conley, Master Commissioner.

I. B. Ross and R. A. Buckles, Attorneys for plaintiff.

Wm. Conley, Master Commissioner, N. C. C.

Low Grade Feeds Poor Economy Says Prof. Turner

Large amounts of commercial feeds are being sold in the state as a result of the prolonged drouth. Dairy farmers especially are in the market for commercial products to take the place of pasture, grain, silage and other home-grown feeds.

The Experiment Station urges farmers to guard against the purchase of low grade materials, which may be offered in considerable quantities this year.

"Poor feeds are expensive at any price," declared Prof. J. D. Turner, head of the feeds department at the Experiment Station. "When bought on the basis of Standard products they are really an economic loss.

"Feeders should discriminate against filled feeds. Such feeds carry yellow tags. It will pay to study the tags attached to the bags and thereby learn the ingredients contained in the feeds. Quality as well as price should be considered."

THE MOB SPIRIT

Judge: What possible excuse did you fellows have for acquitting that murderer?

Juryman: Insanity.

Judge: Really? The whole twelve of you?

"INSIDE" INFORMATION

Choose designs for children's clothes with ironing in mind, whether you make the clothes yourself or buy them ready-made. Fussy ruffles and over-shaped parts take up the time of the laundress, and never look as well after washing and ironing as trim, smooth garments that are well-cut and made of interesting materials.

Probably fewer sandwiches would be discarded from children's lunch boxes if the bread were always of the best quality. Children will eat more bread if different kinds are served. Sometimes so simple a change as baking the bread in a new form,—a twist or roll instead of a loaf, or cutting the sandwiches into fancy shapes with a cookie cutter, will increase interest in it. The change of flavor given by added raisins, dried currants, dates, or nut meats is another inducement to like the lunch bread.

The "hot pack" is not a new method of canning. It is the method of filling the jars to get good results. By the hot pack is meant cooking the fruit or vegetable to be canned for a short time, and then packing it boiling hot into jars or cans, which are then processed the required length of time. The hot pack shortens the time needed for the food in the center of the can to reach the required temperature for sterilization, features a better product, and does away with the step that used to be known as "exhausting."

When making jelly it is not necessary to heat the sugar before adding it to the fruit juice. The only reason for heating it is to shorten the time of boiling the jelly. If the juice is boiling hot when the sugar is put in, the boiling process will only be checked for a minute by the addition of the cold sugar. It is then boiled rapidly until the jelly state is reached, which should be in from 5 to 10 minutes or even less.

KROGER YOUR Neighborhood PANTRY STORES

QUALITY is the first and foremost factor in the selection of foods for sale in Kroger Stores—always. Nothing else matters with us. Quality is the most important thing. From Coast to Coast the Del Monte foods we are featuring this week are known for quality. Housewives everywhere will be stocking shelves for winter use. It is to your advantage to do so.
