Are You Satisfied?
I will guarantee to please you with one of the following:

BLUE GEM
This wonderful non-cooking, non-dinkering, high heat producing coal, especially adapted to cook stove ranges, and which, because of its high quality and clean flame, every lady who has used it specifies when they

LITTLE JOE
From the famous Darby Seem of Black Mountain. This is a big, clean, blocky coal, soft to start but a long burner, and will perform equally well in grate, heater or range, and will produce less than a bushel of ash to the ton.

EVERGLIDE
Our old reliable Harlan Block meets every demand for a general purpose coal. It is true to its name because it glows and glows, dispelling a room full of heat and light of intense heat. It will perform equally well in grate, heater or range, and will produce less than a bushel of ash to the ton.

ELKHORN
We have tried many coals to find the most satisfactory for furnace use and must admit that, according to our own observation and its unqualified indorsement by our customers, Tepe Elkhorn is the ideal coal for this purpose.

Havoc!
Property Owners Lose Millions Whenever Wind Cracks the Whip
From one end of the map to the other, reports are coming of what happens to homes, schools, factories, office buildings, churches, garages, after the wind attacks an abnormally high velocity.
