

Julius Charles A. Brien, chairman of the State Executive Committee of the Democratic Party, presided at a luncheon...

Who should we select for Governor a man who is deeply in earnest, one who is not seeking office for its own sake...

The necessity of politics in Kentucky is not a new thing. It is an old thing...

It is not the Governor that matters within a man's mind. It is the man himself...

Who should we select for Governor a man who is deeply in earnest, one who is not seeking office for its own sake...

The necessity of politics in Kentucky is not a new thing. It is an old thing...

Auto Owners!

Automobile owners are now more and more getting away from the expense of one place or one automatic economy motor job for a second service and still are given a fair trial. They work these stations, where they are prepared to give you your service, with their own power under one roof.

FORD SMOOTHNESS

The new Ford has more than twenty ball and roller bearings

EVIDENCE of the high quality built into the new Ford is the extensive use of ball and roller bearings. There are more than twenty in all—usually large smooth ball bearings in axle and carefully selected for their life.

At some points in the Ford chassis you will find ball bearings. At others, roller bearings are used instead of their higher cost. The deciding factor is the nature of the work to be done.

The extensive use of ball and roller bearings in the new Ford means smoother operation, less vibration, less wear and tear, and greater reliability and longer life.

Other outstanding features that make the new Ford a car for all purposes are the Triple shock absorbers, plus wide, solid, steel, fully enclosed four-wheel fenders, four Handmade double-throw hydraulic shock absorbers, aluminum fenders, chrome alloy valve springs, three-quarter floating rear axle, Rustless Steel, the extensive use of fine steel forgings, and unusual accuracy.
