ARMY WORM MENACE OVER IN TWO WEEKS

(Continued from page one)

said, for by that time the parasites will have restored nature's balance.

Army worms have been very destructive in Kentucky two weeks ago in Christian county they invaded the field in Bluegrass. In the southwest, Christian, Fulton, Graves and McCracken counties have reported damage. Other counties in that region are believed infested.

In the Bluegrass, Fayette, Garrard, Spencer, Madison, Nicholas, Woodford, Mercer, Scott, Boyle, Jessamine and Franklin counties have reported attacks. Prof. Price believes some counties adjoining counties are affected. He does not believe the pest will advance much beyond the fifth, although in the adult or fly stage it can travel miles at a time. It usually resembles a miller moth.

Barley wheat and rye are the principal crops ravaged to Kentucky by the worms. Timothy and clover is not injured a few reports that army worms have crossed the trees and eaten the foliage. When hungry an army worm will eat anything green, even a boy. It's forced feed when the pest eats tobacco," said Prof. Price, "and it won't touch tobacco if it can get anything else."

Prof. Price said the cut worms have been doing more or less harm in the state with young tobacco plants. These worms cut the stem of the plant at the ground. The economic loss caused to date by this pest can be estimated, he said, at 10 per cent. Cut worms appear in the state almost every year. Usually the loss decreased this year by the same weather conditions that permitted the army worms to get a foothold.

Prof. Price said another pest destructive to crops has been found in central Kentucky. It is the sod-web worm or crambid moth, found in bluegrass pastures. He said Price said that as soon as the feeding period of the larvae ends there will be no more damage from this pest.

Post Office Department Faces Enormous Deficit

With economy the reward in official Washington, attention is being directed to the Post Office Department which faces a deficit for the current fiscal year of from $140,000,000 to $150,000,000, as compared with about $68,000,000 in 1930 and about $85,000,000 in 1929. A little cutting here and a little slashing there, President Hoover has been told, will keep the deficit at $140,000,000 for the current year ending June 30, and a more drastic program of economizers may cut the 1932 deficit to a figure $50,000,000 lower.

The Post Office Department is the government's largest business establishment and therefore one of its greatest problems. From its operating headquarters in Washington the postal service reaches into every corner of the United States and indirectly into every part of the world. There is no business in the country engaged in the use of personnel, miles covered and buildings handled.

Of all the departments of the government none is as completely connected with the national capital as is the postal service. Every post office, rural letter carrier, mail car, mail plane and mail steamer responds directly or in some measure, directly or indirectly, to the big office on Pennsylvania avenue where Postmaster General Walter F. Brown, and his assistants, direct the service which is most excellent and to make both ends meet.

Clayton Martin, 41, Louisville bakery owner, was sentenced to from one to five years in the criminal court at Cincinnati for killing his business partner, Hollis Emmerson, because of alleged intimacy with Martin's wife.

Of the 78 medical schools under the United States flag, the total enrollment is at the University of St. Thomas, in the Philippines.

The fire loss in the United States during 1930 totaled $468,000,000, which amount is 10 per cent greater than in 1929.

LOSE TWO FINE MEN

It is most timely to say that Mason county schools lost two splendid men and educators when Professors Thomas W. Hawkins and W. B. Dampier decided to make a change. Both are men of the highest character, capable instructors and directors, setting a fine example for the students under them and leading them in the right direction. They have well served the patrons of the schools where they have been employed and have contributed much to the county as a whole by their cooperation, educational zeal and manly deportment. Their successors are highly recommended and set in the schools they shall serve the coming terms. They are fortunate in finding such excellent conditions—Maysville Independent.

Mr. Dampier is a native of this county and has many relatives and friends in this county.

Shorty Conlon's new racing automobile will have 16 cylinders and will develop 300 horsepower at 6,000 revolutions.

TICKETS IN HANDS OF THE GUARANTORS

Chautauqua Season Tickets Are Delivered To Signers And Placed On Sale

WILL BEGIN NEXT WEEK

With only a few exceptions, the season tickets for the Redpath Chautauqua have been delivered to the guarantors, and many of them have been disposed of. A few people who signed for tickets last year refused to move away or are not at home.

A new system in guaranteeing the Chautauqua was inaugurated for this year. Last year the 100 guarantors lost approximately $4 each. When the contract was offered for this year's program, it was impossible to secure the signatures of 100 people for seven tickets each, and a plan of having different numbers of tickets signed up for was put into operation with the result that Carlisle people signed up for 700 tickets and are responsible only for the number of tickets contracted for.

A few signers contracted for twenty tickets, while others signed for only two. If Carlisle is to have a chautauqua next year it will be necessary that the season tickets be purchased.

The Chautauqua will open here next Wednesday afternoon, June 24, for six days program, closing with the popular theme for plays, the Redpath brown this year has included four big New York play successes in the program in addition to several musical numbers. The remainder of the program this year promises to be the best ever given in Carlisle and citizens of the county should attend.

The tent will probably be erected on the street in the rear of the court house where it was placed last year.

The Chautauqua tickets have been delivered to the persons who subscribed for them last year. The prices are $2.00 for adults, and $1.50 for children over 12 years. There is no reduction in price, and anyone attempting to reduce the price of the tickets is injuring himself, the Chautauqua and Carlisle people who guaranteed and promised to pay for the tickets at the prices above named.

It is urged upon all those who have promised these subscribers to buy tickets from them to make good their promises, as the time limit for selling tickets is rapidly expiring.

The Chautauqua will be held at the same place as last year, and will be convenient to everyone, and a better class program has been promised at a very cheap rate.

Washing Off Feet Is Old Religious Rite In Hills

Eastern Kentucky Baptists, who have been practicing foot washing for more than 100 years to wash one another's feet, in accordance with Biblical instruction, will meet again July 18 and 19 at the Thornton church in Letcher county for their annual "footwashing."

The annual "footwashing" or sacrament services in mountain churches of the Baptist faith, dating back to the very earliest days of the country. The custom has its origin in the days when churches were sparse and farbetween in eastern Kentucky, and ministers and laymen often going far afoot, penetrating the mountains and the wilds following more mountain trails in order to preach the gospel and of Christianity. Sometimes they traveled 100 miles to visit a single convert. There are instances where people outside the churches would wait for days to visit and witness the sacraments which not only meant the footwashings, but consisted of the partaking of bread and wine and other forms of worship. The "bread and wine" constituted the "Lord's Supper."

Bumper Crop Of Fruit Of All Kinds Promised

With prospects for a bumper crop of orchard fruits this year central Kentucky housewives already are making preparations for preserving a large quantity of cherries, plums, peaches, pears, apples and other fruits.

Cherries, peaches, plums, pears and apples, and the other fruits will be ready for the table within a few weeks. Favored by an excellent spring for growth, the fruit trees of the Blue Grass are heavily laden with their crops and massive seeds on Blaze. Fruits are expected to prevail when the homegrown crop reaches the markets.

The crop of homegrown strawberries has reached its peak, but there are still plenty of this favorite berry offered on the market for home prices.

MONEY SHOWS GAIN

The Treasury reported that per capita circulation of money increased 35 cents in May over April.

Money in circulation last month was $4,702,252,712. This is equal to $37.68 to a person as against $37.33 the previous month.

Total money in the United States, including gold coin and bullion held by the Treasury, was $5,781,282,172 on May 31. The Treasury held a total of $1,066,331,361 of gold coin and bullion.

The native land of the pomegranate is believed to have been Persia.

REDUCTION IN TAX PLEDGED BY LAFFOON

"No Republican Can Win In Kentucky This Year," Says Democratic Nominee For Governor

Judge Ruby Laffoon, of Madisonville, Democratic nominee for governor, told the Fifth District Democratic Women's Club "the hard times we are having makes it certain that no Republican is going to be elected in this Democratic state this year."

Predicting that Louisville and Jefferson county would go Democratic in the state election, the nominee said: "Republicans have piled up millions in that state debt, but that is not a drop in the bucket compared with the increase in cost of city and county government brought on by wasteful administration of the Republicans."

Judge Laffoon said that the state Capitol at Frankfort was "filled with a hungry horde of pie hunters," and promised a period of retrenchment if he should be elected to "see that laws are enacted to reduce taxes and cost of government."

The address was delivered at a luncheon at which Democratic women nominees were guests. Other nominees present were Elam Huddleston, of Barbourville, Democratic nominee; Dan Talbott, of Bardstown, for auditor; Henry Ward, of Hopkinsville, for commissioner of agriculture; James H. Richmond, of Lebanon, for superintendent of public instruction; and Frank Haswell Bradley, for clerk of the court of appeals.

CLUB FAIR TO BE HELD IN FAYETTE

4-H Club Members From 25 Counties To Participate In Event To Be Held August 24, 25

Plans for the Four-H Club district fair, the only fair of its kind in the state, have been completed, approximately 2,000 club members from 24 counties of Kentucky will take part in the fair on August 24 and 25 were announced today by County Agent E. Ed Parker, of Fayette.

The fair will be held under the supervision of the junior club department of the state college of agriculture, and is conducted by the agricultural extension agents of the following counties: Bath, Bourbon, Boyle, Clark, Campbell, Fayette, Franklin, Garrard, Greenup, Harrison, Jessamine, Kenton, Madison, Marion, Montgomery, Nicholas, Pendleton, Pulaski, Scott, Trigg, Washington and Wayne.

Premiums on project work are to be awarded in the following divisions: Garden, poultry, sheep, swine, dairy, poultry, stock judging, crops, clothing, canning, room improvement, room equipment. There will also be county competitions and club contests and a style revue. More than $1,000 in state appropriated and $600 to be given in premiums in the form of ribbons at the fair.

Ranking Positions Of Business Industries

The automobile industry in the United States is the largest in the country, according to the number of manufacturers released by the department of commerce based on value of products, the various industries rank as follows:

Motor vehicles, $3,717,996,553; slaughtering and meat packing, $3,-700,000,000; iron and steel works and rolling mills, $3,356,894,239; petroleum refining, $2,751,671,813.

Other industries were ranked in the following order: Foundries, machine shops, electrical machinery, printing and publishing, women's clothing, motor vehicle bodies and parts, bread and other bakery products.

Automobile manufacturers, including motor vehicle bodies, parts, rubber tires, petroleum refining, total one-eighth of the total manufactured products.

It is shown by statistics that the automobiles in use exceed the number of telephones used in the United States by several millions.

The United States has 74.4 per cent of the world's passenger automobiles, and 75 per cent of the world's telephones.

June Progress Magazine Handbook For Tourists

The June Touring Number of Kentucky Progress Magazine is the most pretentious issue yet published by the Kentucky Progress Commission and was designed as a guide to visitors to Kentucky, it is stated.

The Magazine contains a comprehensive sketch of the Blue Grass, the Cumberlands, Kentucky, the Pennyroyal and the Purchase. The descriptive matter under each of these sections are given in connection with the state map.

The feature is a 32-page, illustrated directory, arranged alphabetically, of the points of interest throughout the State. The illustrations in rotogravure are grouped with the points of interest on each page, and a thumb-nail sketch of each touring objective, together with detailed routing information, is included in the directory.

ARMY WORMS CAUSE DAMAGE IN COUNTY

Pests Reported In Practically Every Section And Are Ruining Grain

COUNTY AGENT IS BUSY

Army worms have made their appearance in Nicholas county in great numbers, according to County Agent H. J. Masters, who has been spending all of his time in telling farmers how to control these pests.

They were first found at Moorefield by J. M. Berry, who has not sold his barley to protect it.

William Burton located the worms in his wheat, but they are quite small. A. B. Smathers has had an entire field of rye destroyed and is the first to construct dust furrows to keep them from spreading to his cornfield.

Harvest Piper has a heavy infection in his wheat and has tried burning straw to eradicate a part of the worms.

The worms have over located in all sections of the county, Mr. Masters, who is urging farmers to cut their grain before it is completely damaged and to construct dust furrows around their corn and tobacco fields, if necessary.

In other counties where grain has been cut and put in use shock the worms have congregated in the shocks and eat off all the heads. It is therefore deemed advisable to move grain to uninfested areas as soon as cut.

MOTH BALLS CHECK MOLES

The best way to get rid of moles in lawns and gardens is to trap them, says the Horticultural Survey of the United States Department of Agriculture. However, it is not always easy to find, and it does not seem desirable to use poisons, good results may also be obtained by the use of moth balls. Open the burrows at the edge of the lawn or garden with a trowel and drop in a moth ball or two, or a sprinkling of naphthalene flakes, and replace the earth. Moles dislike the odor, and it may prove fairly effective in keeping them away from the garden.

BOURBON YOUTH IS KILLED BY UNCLE

Carlos Newman Cut To Death And Brother Slashed By Andrew Graves At Centerville

Carlos Newman, 23 years old, tenant sheep, cattle and hogs, poultry, stock judging, crops, clothing, canning, room improvement, room equipment. There will also be county competitions and club contests and a style revue. More than $1,000 in state appropriated and $600 to be given in premiums in the form of ribbons at the fair.

Ranking Positions Of Business Industries

The automobile industry in the United States is the largest in the country, according to the number of manufacturers released by the department of commerce based on value of products, the various industries rank as follows:

Motor vehicles, $3,717,996,553; slaughtering and meat packing, $3,-700,000,000; iron and steel works and rolling mills, $3,356,894,239; petroleum refining, $2,751,671,813.

Other industries were ranked in the following order: Foundries, machine shops, electrical machinery, printing and publishing, women's clothing, motor vehicle bodies and parts, bread and other bakery products.

Automobile manufacturers, including motor vehicle bodies, parts, rubber tires, petroleum refining, total one-eighth of the total manufactured products.

It is shown by statistics that the automobiles in use exceed the number of telephones used in the United States by several millions.

The United States has 74.4 per cent of the world's passenger automobiles, and 75 per cent of the world's telephones.

June Progress Magazine Handbook For Tourists

The June Touring Number of Kentucky Progress Magazine is the most pretentious issue yet published by the Kentucky Progress Commission and was designed as a guide to visitors to Kentucky, it is stated.

The Magazine contains a comprehensive sketch of the Blue Grass, the Cumberlands, Kentucky, the Pennyroyal and the Purchase. The descriptive matter under each of these sections are given in connection with the state map.

The feature is a 32-page, illustrated directory, arranged alphabetically, of the points of interest throughout the State. The illustrations in rotogravure are grouped with the points of interest on each page, and a thumb-nail sketch of each touring objective, together with detailed routing information, is included in the directory.

The native land of the pomegranate is believed to have been Persia.

BLUE GRASS SEED POOL IN EFFECT

More Than 60 Per Cent Of Crop Of Central Kentucky Signed. To Advance 70 Cents

The bluegrass seed pool, with over 600,000 bushels, or approximately 60 per cent of the estimated crop, already pledged, has been declared in effect and members are being advised to have their seed ready for delivery by July 20. An advance of 70 cents a bushel for good, merchantable seed has been agreed upon by the federal farm board.

In a resolution adopted June 10 and issued Friday, the Kentucky Bluegrass Seed Growers' Cooperative Association, through its president, Clark Patterson, of Mt. Sterling, declared that sufficient seed had been pledged to place the pool in operation and cause the federal farm board to recognize the organization.

John Wilde Jones, of North Middletown, secretary of the pool, reported Friday that he had in his possession contracts pledging over 600,000 bushels of seed, and that from reports of solicitors in the field, he expected that another 100,000 bushels had been signed but file contracts not yet turned in.

The federal farm board, which allocated $20,000,000 in approval to the pool in its contract, was recognized this volume as sufficient to justify the creation of the pool, and on the strength of the volume signed by the contracts already taken by the board of directors in declaring the pool organized, has issued its first commitment for a loan to the association. It is used as an advance to the pool members.

Carlos Newman Cut To Death And Brother Slashed By Andrew Graves At Centerville

Carlos Newman, 23 years old, tenant farmer, was cut to death Sunday night by his uncle, Andrew Graves, 60, in a family quarrel which occurred on the Russell Cave road near Centerville in Bourbon county. Graves also inflicted a minor wound on the neck of Arthur Newman, brother of Carlos Newman.

Graves and his son, Corby Graves were drinking. Corby Graves had a difficulty with Carlos Newman and Arthur Newman, and the elder Graves struck Chester with a pair of brass knucks, officers were told. Arthur Newman, intervening, received the wound upon his neck, but the elder Graves was charged with the slaying of Carlos Newman by Mrs. Arthur Newman.

Carlos then went to the assistance of his brother and received three severe wounds inflicted by Andrew Graves. He died after Graves and his son fled.

Paris Youth Is Spending His Honeymoon In Jail

William (Buster) Raney, Paris young man, is spending his honeymoon in the Paris jail. Raney is alleged to have rented a taxicab Monday night from the Caywood Taxi Company, and in company with Miss Virginia Biddle, 16 years old, of Paris, drove to Horse Cave, where he is reported to obtain a license and be married. Due to the youth of the bride, however, it failed to get the license.

During the following two days, they visited a score or more towns in Kentucky and Indiana, but in all cases were refused a license. Finally at Owensboro, eighteen miles from Paris, he obtained the license and the two were married. Returning to Paris, and with a taxi bill ranging over him which he was unable to pay, he is alleged to have abandoned the motor on a side street, where it was found by police and turned over to Mr. Caywood, who caused a warrant to be issued for the arrest of Raney.

A walnut pocket ash tray has been invented.

HOOVER DECLARES HARDING BETRAYED

President Declares Death Of Former President Hastened By Friends

TOMB IS DEDICATED

President Hoover Tuesday depicted Warren G. Harding as a kindly man whose death in 1923 was hastened by enemies "he had been betrayed by a few of the men he had trusted."

Dedicating the memorial tomb of the twenty-ninth president at Marion, Ohio, Mr. Hoover paid tribute to the accomplishments of the Harding administration and to the memory of the man. He told of having accompanied Mrs. Harding on the Alaskan trip on which he died, and of
