They are not 'Light Bills'

These are not
'Light Bills'
they are investment receipts
for comfort, convenience
and freedom!

YOU use to call these your
'light bills'... and perhaps
they were then...

Now... the cost of electric
energy is such that it
provides no obstacle for the
use of all the labor-saving devices
so essential to comfort and
convenience in the home...

These are no longer 'light
bills'... They are receipts
for an investment in service

which brings to your home
the comfort to which you
are entitled... and a freedom
which you would not otherwise
enjoy...

Electricity is cheap... representing
only 12% of your
household budget... and
based on pre-war living
costs... your electric dollar is
worth \$1.23 against a "cost-of-
living" dollar of only 62c...
