Urgen Clean Ground For Raising Of Chickens
 Clean ground is the third step in the clean ground and clean water movement. The College of Agriculture, University of Kentucky, through the state health department, is now offering a booklet on "Clean Ground for Raising Chickens." This booklet contains information on the various methods of cleaning up the ground around the chicken house, and also on the various methods of cleaning up the ground around the chicken house. The booklet is available by writing to the College of Agriculture, University of Kentucky, Lexington, Ky.

THERE AND BACK BY TELEPHONE QUICKLY AND AT SMALL COST
 Whatever your business—whether you spend all or part of your time on the road—you can save time, increase sales, and avoid large expense accounts by using the modern, high speed long distance telephone service.
 The personal touch that your voice alone can give, the advantage of getting an immediate answer and the low cost of the service are causing more and more people to turn to the telephone for out-of-town business and social contacts. The next time a trip seems necessary or a letter inadequate, try telephoning instead. In most cases, Station-to-Station service will answer every need, and you will be surprised at the small cost. Ask "Long Distance" for rates.
Southern Bell Telephone & Telegraph Co.
 "THE COST IS SMALL WHEREVER YOU CALL"

"Take It on My Word!"
 To be handled various poultry feeds, but I tell you, nothing has won so many warm friends among my customers as Tuxedo Starting and Growing Allmach.
 This high-quality product surely does reduce the mortality and make big, healthy cockerets and pullets in a hurry. I'll move more of it each year, but it's especially desired for this part of the country, too. And you'll be surprised at the moderate cost.
 *Contains grains, bran, barley, pure cane molasses and Cod Liver Oil. You know, the molasses and Cod Liver Oil is the best for chickens. Also, the Vitamin A in the Cod Liver Oil is obtained by Early S. Dand's exclusive process."

INSIDE INFORMATION
 Chicken should be banded only when they are fairly ripe. For cooking, chickens that are still slightly band may be used.
 The color of cooked chicken is a good test. It indicates whether the chicken is cooked through and after cooking they vary in color and weight. They vary in color and weight. They vary in color and weight.

Urges Production Of Food On Farm This Year
 The College of Agriculture through its Extension Service is making extraordinary effort to bring to the attention of farmers the importance of producing as much as possible on their farms this year. The GARDEN SPRING GREENS
 City John A. Gardner, Kentucky College of Agriculture
 Spring greens are important to the year, for they are among the first things to come from the garden. They are important to the year, for they are among the first things to come from the garden. They are important to the year, for they are among the first things to come from the garden.

Favorable Outlook For Feed Prices In 1931
 There is little likelihood of sharp advances in prices of feeds and feed grains, as a group, during the first half of 1931, unless there develops a prospect of short feed crops for the year, says the department of market and rural finance, the College of Agriculture, University of Kentucky.
 Mills weather, large stocks of wheat, low prices, location of feed supplies, and weak industrial conditions are expected to keep the market for feed grains in a quiet attitude in 1931. It is expected that the production of feed grains will be about the same as last year. It is expected that the production of feed grains will be about the same as last year.

Where One Grass Of Fenella May Be Found
 A Kentucky farmer has found a small amount of Fenella on his farm. Fenella is a rare plant. It is a small amount of Fenella on his farm. Fenella is a rare plant. It is a small amount of Fenella on his farm.

What Is a Woman's Time Worth?
HER time is valuable—a too valuable to spend endless hours at household tasks which can be done easily, efficiently and economically with a greater household servant—a electric service.
 For only ONE CENT invested in electricity at average rates you can—
 • Toast 2 to 12 slices of toast in twenty minutes; Make six cups of coffee; Sew 300,000 stitches on a household sewing machine; Iron several shirts or house dresses; Vacuum clean for an hour; Wash electrically for three-quarters of an hour; Wash a yard of dubs for the average family.
 Through widespread distribution of electricity over interconnected transmission systems, this constant and efficient helper is always at your command.
ELECTRICITY IS CHEAP... Make it work for you.

From Below Freezing to Almost Boiling in 5 Minutes
 Freezing water gives off a twofold job. For every starting it must flow freely in stone-cold engines, yet, within a few minutes, it must have the body to stand up under boiling heat.
Standard Motor Oil will meet these conditions without a complaint.
