## WORNOUT MEN NEED OLD-TIME IRON TONIC

Men who are worn-out, run-down and nervous need iron, lime and cod liver peptone as combined in Vinol. The very FIRST bottle brings new strength, better appetite and sound sleep. Vinol aids digestion and increases the red blood. Gives you new pep and ambition. Equally good for tired, nervous women and underweight children. Tastes delicious. Get a bottle today. The results will surprise you. Hopkins Drug Company.

In eleventh-century Persia, a secret order was founded by Hassan ben Sabbah, indulging in the use of the Oriental drug hashish, and, when under its influence, in the practice of secret murder. The murderous drinker of hashish came to be called *hashash* in the Arabic and from that origin comes our English word *assassin!*

## Preserve Sweet Cider By Canning Methods

It is as easy to preserve sweet cider as it is to can fruits and requires no more equipment, says the College of Agriculture, University of Kentucky. Some persons think it is practically impossible to preserve apple juice without the use of heat and sealing without the addition of some chemical substance to act as a preservative. This is not the case.

The use of any preservative in fruit juices is unnecessary, if the juice is properly pasteurized and sealed. In fact there is no preservative which when used in quantities permitted by law or with ordinary regard for health which will prevent fermentation in juices which have not been pasteurized and sealed, or which are opened to the air after heating and sealing.

When small quantities of juice are being preserved for home use, ordinary glass fruit jars of the quart or half-gallon size are excellent containers. The jars should not be of the screw cap type. Any of the various lightning-seal or other glass stopped types which do not permit contact of the contents with metal may be used. The containers should be thoroughly washed, with the tops which are to be used with them. After washing, both the jars and tops must be sterilized. This is conveniently done by placing the jars on their sides in a wash boiler or other good vessel, setting on stove, pouring in enough cold water to completely cover the jars, bringing to boiling and keeping at that temperature for ten minutes. The jars should then be removed from the water one at a time, filled with the juice allowing for expansion, sealed and pasteurized in a water bath at 175 degrees F. from 15 to 35 minutes, depending on the size of the jar. Following is the time table for the different jars: pint, 15 minutes; quart, 20 min.; half-gallon, 25 min. gallon, 30 min.; 2 gallon, 35 min.; 3 gallon, 55 min.

## Exhibit Urges Storage Of Bumper Apple Crop

The storage of apples for winter sale and use, was the subject of one of the exhibits of the College of Agriculture, University of Kentucky, at the State Fair in Louisville. A miniature model storage house showed the principles of ventilation and insulation.

The College of Agriculture is urging the storage of some of the big apple crops in the state this year. As has happened in previous years of big apple crops, prices are low this fall. In 1926, for instance, there was hardly a market for apples in the fall. Second-winter, however, prices had improved materially and producers who had protected stored apples were able to sell them at fair prices.

Old buildings, such as barns, chicken houses, etc., can be remodeled into good storages for apples or storage houses can be built at low cost. Brick, concrete and stone do not make good walls for apple storage houses. Double wooden walls, with a dead air space, make the best construction.

The problem in storing apples, says the College, is to keep them cool in October and November, rather than to prevent them from freezing in quite winter. Where proper ventilation is provided, cool air can be admitted to the storage house during the night and the ventilators closed and the warm air kept out during the day.

The model storage house exhibit, in charge of W. W. Magill, extension horticulturist, and horticulture will be shown at the annual Robinson Harvest Festival and Agricultural Fair at the Robinson Experiment Substation at Quicksand, Breathitt county, first of the week.

## HINTS TO FARMERS

Ticks are long-lived creatures, and some individuals may live for as long as two or three years without food.

In the South Bermuda grass is valuable to stop the washing of gullies and to bind levees and other embankments.

A lime-sulphur or nicotine-sulphur dip will cure mange, or common itch, on cattle and sheep. At least two dippings are necessary, from 10 to 14 days apart.

Do not let a young calf have milk containing too much butterfat. It may cause digestive trouble. If the milk tests more than 4 per cent butterfat, dilute it with skim milk or water.

The exhaust gas from an automobile will "gas" rats in the exhaust pipe and bath is fatal to the rodents. Also plug all holes in the burrow letting the engine run at moderate speed for about 10 minutes.

It's a good plan to compost or bury at the end of their first laying year hens. This improves the average production of the flock. It also helps to keep down the flock from tuberculosis, which usually affects hens more than 1½ years old.

Sometimes a few feet of fall in even a small stream of water can be made to operate a hydraulic ram and thus furnish an inexpensive supply of water for the house, barn and other purposes. Information on rams appears in Farmers' Bulletin 1449, Farmstead Water Supply, mailed free by the U. S. Department of Agriculture, Washington, D. C.

Soybeans repel rodents owing to storage if not properly handled. After the soybeans have been in the bin for a while they develop a musty odor and bearing and molding. Be sure they are thoroughly dry before storing. Store them in a dry place, piling the bags with a slat at the point of each tachment, clip it off with tightly around its base and it will slough off in a few days. Touch the stump of the wart with glacial acetic acid or tincture of iodine. Several treatments may be necessary, but they can also be destroyed with daily applications of one of these drugs. Before applying acetic acid, protect the surrounding skin from the warts by coating it with vaseline or lard. Small warts such as those on the eyelids of dairy cows, some times disappear if kept soft by daily applications of cream or cream and lard. Small warts should be removed only by a veterinarian or other skilled operator. Considerable hemorrhage (bleeding) often occurs after the warts should be removed only by a veterinarian or other skilled operator. Considerable hemorrhage (bleeding) often occurs after the animals body, it may be necessary for a veterinarian to give internal treatment. Warts on cattle are infectious and can be transmitted from spreading from animal to animal, remove warty cattle —especially calves and yearlings—from the herd, and clean and disinfect exposed stables, pens, chutes and other equipment. Rubbing posts should receive special attention when warty cattle have rubbed against them.

## Fall Good Time To Fertilize The Lawn

Fall is considered the best time to fertilize lawns. The bluegrass receives the benefit of the fertilizer, without any corresponding benefit to weeds, which grow principally in summer.

Nitrogen bearing fertilizers are usually supplied. Soybean oil meal contains all the nitrogen of a pound per square yard is recommended by N. H. Egbert of the College of Agriculture, University of Kentucky. Care should be taken that the sulphate of ammonia does not burn the grass.

It can be mixed with dry soil, using from half of a gallon to a gallon of dirt to each pound of sulphate of ammonia. This mixture can be sprinkled on the lawn when the grass is dry.

Sulphate of ammonia also can be dissolved in water, using four or five gallons of water to each pound. Sprinkle the four or five gallons of water containing a pound of sulphate of ammonia over a square rod of lawn. Follow with a liberal amount of clear water to wash the fertilizer into the soil. Use thoroughly dissolve it in order to prevent burning.

There are 215 distinct religious bodies in the United States.

## INSIDE INFORMATION

Tomato catsup or chili sauce and thick lemonade make a delicious and half, make a delicious dressing for plain lettuce or other salads.

One cup of rice will absorb 2 or 4 cups of milk when cooked in the double boiler and is of course much richer in food value than when boiled in water.

Make biting water just before using. It stands it is likely to streak the clothes. Stir occasionally and blue only a few pieces at a time. Dip them in and out, one at a time.

In cleaning curtains for the living room, select a fabric that will stand light and laundering. The colors should harmonize with the other furnishings in the room without making the window look conspicuous.

To do overnight laundering in hotels or when traveling or visiting, carry wooden clothes hangers with a straight bar. They will not mouse rust marks. If an electric fan is available, the clothes will dry very quickly.

These ingredients make a good uncooked pickle: 1 cup minced green pepper 1 cup minced red pepper, 2-4 tablespoons sugar, 1-3 to 1-2 teaspoon salt, 1 small onion chopped, 1 cup vinegar. Dissolve the salt and sugar in the hot vinegar and pour over the vegetables. Let stand 2 or 3 hours before serving. This keeps well in a stone jar. Keep out of the light.

Almost any combination may be used for fruit cup or fruit salad but there should be included something pleasantly acid, such as orange or grapefruit, or tart sliced apple. Some of the best fruits to include in a salad are canned pineapple, peaches, fresh or canned canteloupe, cherries, fresh or canned, apricots, dates, prunes, figs, maraschino cherries, Malaga or Tokay grapes. A few nut meats are an agreeable addition, and also berries in season. The fruits should be cut in attractive pieces, and they should not be stirred about, or they will look mushy and shapeless

Use cold water first on egg stains, then hot water and soap. If the yolk covers a grease spot use carbon tetrachloride or some other grease solvent after sponging with cold water and allowing the stained place to dry.

Children should eat sweets only at the end of a meal because sugar is a very concentrated food which the body uses for fuel only. Because it is so concentrated, and so quickly utilized by the body, sugar dulls the appetite. If a child is allowed to eat candy before he sits down to dinner, he has no appetite for the other food. He needs to build his body and keep it in good running order. After he has eaten the required amount of other food, a child may have a piece of candy, a few dates or figs, a plain cooky or a piece of cake or dessert.

In this age of many picnics and pack fountain lunches, it sometimes is a puzzle to know what may be safely prepared at home without serving implements, and what may be eaten with the fingers. Bread and cookies; that accompany other dishes are always eaten from the plate with the fingers and eaten from the fingers. Slices of rolls, biscuits, muffins, toast and other bread forms. Many kinds of cake and cookies are made without silver and eaten from the fingers but when a very tender or wide piece of cake, especially one with soft frosting is passed, a cake server of some sort is almost a necessity. Most of us had rather eat it with a fork. Hard cheese in blocks as served with apple pie or crackers, may be taken by, and eaten from the fingers, also olives, radishes, pickles, celery and salted nuts. Custom permits us to eat potato chips and French fried potatoes with the fingers.

**THE REASONS**

This home where happiness securely dwells
Was never wrought by charms or magic spells,
A mother made it beautiful, but knew

No magic save what toiling hands can do.

She made it holy, not with length of years,
Nor with her prayers alone, but with her tears.

Because she knew 'tis's need, the griefs thereof,
She made it gay and happy with her love!
—Arthur Wallace Peach in the New York Times.

Tornadoes cause more loss of life than tropical storms in the United

# The Kentucky Electric Development Co.

ANNOUNCES

## A Reduction in Electrical Rates

For Household and Commercial Lighting Customers

The Kentucky Electric Development Company is pleased to announce to its customers in Nicholas and Bath counties a marked reduction in electric rates.

The new rate schedule for residential customers will be 12c, 6c and 3c. The new rate schedule for commercial customers will be 12c, 7c and 3c.

In order for you to take advantage of these new low rates, it is necessary that you sign a new Household and Commercial Lighting Service Contract which calls for a minimum monthly bill of $3.00 per month per meter. Our meter reader will take pleasure in furnishing you with one of these new contracts and explain it to you in detail.

The table given below shows the amount of electrical energy that families living in various sized residences must use at the middle and top prices before they can take advantage of the lowest rate of 3c per kilowatt hour, which rate will be charged for all current consumed over the amounts as shown for the various sized residences in the table below.

| Size of House | NUMBER OF KILOWATT HOURS AT 12 and 6 CTS. | | 3c for all over |
|---|---|---|---|
| 3 Rooms | 18 | 18 | 36 Kil'w't. hrs. |
| 4 Rooms | 24 | 24 | 48 " " |
| 5 Rooms | 30 | 30 | 60 " " |
| 6 Rooms | 36 | 36 | 72 " " |
| 7 Rooms | 42 | 42 | 84 " " |
| 8 Rooms or more | 48 | 48 | 96 " " |

Hallways, bath rooms, pantries, closets, alcoves, unfinished attics, porches, are not counted as rooms.

Under these new rates our customers will receive more electric service for the amount of their present bill, and will thus be enabled to take advantage of the many tasks which electric service will do.

**Electricity is Your Cheapest Servant—See that you give it enough work to do.**

## BIG CITIES SPEND ABOVE 3 BILLION

**New York Takes the Lead in List of 250.**

Washington.—The 250 cities of the nation having a population of more than 30,000 paid $3,435,280,927 for the operation of their governments in 1928.

Their revenue totaled $3,052,224,936, and property subject to ad valorem taxes totaled for city purposes was valued at $60,982,335,256, or $1,514 per capita.

These figures are given in a compilation made public by the Department of Commerce.

The revenue receipts totaled $907,-096,300 more than the amounts of the year, exclusive of payments for permanent improvements, and $580,-625,819 less than the total payments, including those for permanent improvements.

In only 87 of the cities was there sufficient revenue to meet all payments during the year. The payments in excess of revenue were met from the proceeds of debt obligations.

The gross debt outstanding at the close of the year amounted to $6,-973,215, or a per capita of $202.22, consisting of $2,990,740,775, funded or fixed; $530,446,218, special assessment bonds and certificates; $436,405,-087, revenue loans, and $99,312,131, outstanding warrants.

The net indebtedness of the 250 cities amounted to $5,906,455,749, or $171.32 per capita.

With an assessed property valuation of being $35,000,000,000, revenue of $907,600,000 and $504,714,000 representing the cost of operation, New York led the list.

Following in New York in the matter of governmental cost was Chicago, with a total of $172,000,000. The next eight cities, ranked according to their expenditures, were: Philadelphia, Detroit, Los Angeles, Boston, Cleveland, Pittsburgh, Buffalo and Baltimore.

New York was first also in its net debt, which amounted to $1,540,870,000, an increase over that of 1928 of $40,434,000.

## German Count Learning Wheat Farming in U. S.

Lubbock, Texas—Count Joachim von Pestalozzi, Heidelberg student, is continuing his education in the wheat fields of Texas.

His classmates are bound acres of the Texas Panhandle farm of Fred Stone, reputed to be the largest individual grower of wheat in the United States.

Von Bernstorff is learning first hand how to operate a big wheat ranch and then he plans to return to Germany and farm over his father's large estate there.

He made his way to the United States aboard a tanker and is learning the wheat business from the ground up. He has taken night shifts of oiling combines and repairing machinery. Other days he works with the laborers in the harvest fields.

"Wheat farming in Germany is conducted on a much smaller scale than here," he said. "A 50 acre farm is considered a large one."

His father's 10,000 acre farm is the largest privately owned tract of land in Germany, he said.

## Fire Burns Ten Years in Pennsylvania Mine

Tamaqua, Pa.—Miners digging coal in a Lansford strippings operation of the Lehigh Coal and Navigation company recently uncovered antiwrecked mine which they had not entered but burned their fingers when they tried to handle it.

The men had uncovered the site of an old mine fire which had been believed extinguished ten years ago.

The coal company plans to remove as much coal as possible from the south of the fire, which has defied efforts to seal it, and shut it off from valuable coal seams.

## Firemen Save Kitten From Death by Fumes

Utica, N. Y.—Firemen wearing gas masks rushed into a burning house to rescue a child whom neighbors said they could hear crying. The upper basement was filled with ammonia fumes from a broken refrigerating system. Two minutes later they emerged carrying a black kitten.

"Wait, we did our duty," coughed one of the firemen. "Our first duty is to save life and the second property."

## Girl's Garb Shocks Parson; Walks Out

Vienna.—A sensational scene occurred at the Church of the Capuchins in the town of Ottenstein in the Lower Austrian province of Moravia. The church was crowded for Sunday service and two young girls and married women had appeared in immodest clothing—their necks and arms bare and in short stockings.

Ulrich Pfeiffer, the priest, who was to deliver the sermon, took offense at their dress and appeared on the pulpit merely to inform the congregation that he was unable to preach in consequence of the woman's improper garb. He then stepped off the pulpit, leaving the congregation to take action.

## Youths Ford Globe Tour, 33,000 Miles, on $700

Fort Wayne, Ind.—A 33,000-mile globe-encircling tour in a Ford roadster, piloted at a cost of under $700 by Harold Grosnert, Fort Wayne, and Paul Nolpp, Cleveland. The youths, both of whom were graduated from Concordia college here, began their long trip a year ago this month.

Among the methods of earning transportation engaged in by the youths was posting notices on an ocean liner. In Spain they traveled more than 700 miles on bicycles.

## Jennie Preferred Thirty Days

By LEETE STONE

© 1931, Bell Syndicate—WNU Service.

SPEEDOMETER registering fifteen. Twenty after morning tooting the last Pacific Juice before the long stretch on the concourse where, if you are lucky, you get a waiting, speedy motorcycle—well, you can't hold a soft heart and there was something about the animal which reminded him of that pampered creature he longing to the girl of his dreams and by her so petted and made so much of as to arouse envy in his breast. Still possessed by the dog and walked on, becoming once more absorbed in the all-important question—how was he going to make the acquaintance of Betty Lou?

Oh, yes, he had discovered her name by careful eavesdropping. Twice he had been quite unable to unearth anywhere that boon to young men in love, a bird in the bush—and twice had failed. Living in the same block, had paper boy and grocer at the corner, he knew that they would hardly be of use in the present crisis, but there was the soda fountain. Perhaps there he could learn a little more about the all-important question—how was he going to make the acquaintance of Betty Lou?

Oh, yes, he had discovered her name by careful eavesdropping. Twice he had been quite unable to unearth anywhere that boon to young men in love, a bird in the bush—and twice had failed. ## Man Mountain Breaks Hotel Shirt Sleeves Rule

Cleveland.—Prince Carnera, Alpine pugilist, is the only man to violate the old tradition of one of the leading hotels here, that a man must wear his coat in the dining room. Old employees of the hotel recalled no exception to the unwritten rule—even in most torrid weather of midsummer —until Primo ambled in coatless. They remonstrated. He protested. The rule was broken.

## COLLEGE GIRL RUNS TRUCK, BARS OFFICE

**Finds She Gets Better Pay on Outdoor Job.**

Kansas City, Kan.—When it comes to occupations, Miss Violet Goodrich, 20-year-old college girl driving a tan-and-a-half dump truck every day in the week is far more interesting than housework or office work.

Violet should know because she has been driving one of her father's trucks in hauling road-building materials for a new road near here for seven months.

**Volunteers Services.**

She started to drive a truck when her father announced that he had to go to Sioux City, Iowa, to care for a farm there and to take care of his daughter's crops. He said that he guessed he would have to employ a man to drive the truck. But Violet offered her services.

Dressed in a blue shirt, wide-brimmed straw hat and blue denim trousers with red stripes down the sides, this slender girl with brown eyes and well modulated voice goes about her business hauling gravel with a sort of independence and does as much work as her brother or any other truck driver.

Violet graduated from high school and attended college, where she obtained enough credits to teach school, but she frowned on that and decided she'd rather be a truck driver.

**May Give Up Work.**

"If the outdoors doesn't get too much of a hold on me," she said, "I may take up office work. I've already figured that I'll make more money handling my truck at $3 a day profit, working the rest of the year, than I'd be able to get in an office would pay only $12 weekly.

"There is one thing I don't like about trucking," she confessed, and a young woman said with a smile, "and that is the dirt."

Her mother, two sisters and a younger brother cheer Violet when she arrives at her queer ideas of work for a girl.

## Doctor Up for Speeding; Castor Oil Dose Repaid

Nyack, N. Y.—Justice of the peace law of brotherly love has no place in Judge Clifford Thompson's court.

The Judge's brother, Dr. R. L. Thompson, was arraigned for speeding. The traffic ing also said the doctor's car was without a horn.

Ordinarily Judge Thompson sus. ordinary dollars for speeding and $2 for the absence of a horn, but this Judge ordered.

"And now, doctor, the last time I was ill do you remember what you prescribed for me?" the Judge asked.

"Sure I do. I made you take a dose of castor oil," Doctor Thompson declared.

"Yes, I can taste it yet," the Judge grimaced. "Next case."

## French Writer Finds U. S. "Politest Nation"

Paris.—After a three months' tour through the United States, Henry Bertaux, French aviator, considers Americans perhaps the politest people in the world, more even than even his own country folk.

"The American people are the personification of courtesy and they have a friendliness and kindliness—an affectation" the eminent writer declared. "Every one has the time to be polite—taxi drivers, telephone girls, policemen and public officials."

The playwright found the frankness of Americans hard to be complete. "They have no fear of ideas, of words, or of things," he remarked. "There are the kind of characters I like."

## Human Pin Cushion Now Faces a Real Danger

Lorain, Ohio.—Due to an abnormal nervous system, Walter Earlier, known here as a "human pin cushion," can pierce his face and arms with needles without feeling any pain.

Physicians say he is a remarkable case of sensory anesthesia, with the explanation that the person who feels no pain. Betty Lou held out best and cold to the brain do not function in his body.

But specialists point out he faces a real peril in that he may develop acute indigestion or appendicitis, or some other form of illness in which pain is the chief sensation to warn of a million might become critical without his having any warning.

## Finds Giant Redwood 200 Feet Underground

Watsonville, Calif.—A giant redwood tree that fell countless ages ago, was discovered here 200 feet up the surface of the earth. The tree is seven feet in diameter.

A well driller encountered the monarch of the forest as his machinery bored into the earth.

The tree is excellently preserved and encrusted by clay.

**Grass 6 Feet High**

Beacon, N. Y.—Grass 6 feet 10 inches high has been raised by John Craig, operator of a bonus bed between Fishkill and Wappingers. It is of the Pallo Finna variety, common on the west prairie lands of the Gulf states.

**Russian Pacifism**

The late Judge Parker was once talking about Russia.

"Russia is very pacifist," he said. "Litvinoff and the rest of them are always shouting about Russian pacifism. It's a joke.

"Russian pacifism is more dubious than the eight-cent fish.

"Mr. Fish Man," an old lady told, "is this fish that you have reduced to eight cents a pound perfectly fresh and fit for consumption?"

"Yes, lady, sure," said the man, "but you'd better hurry home with it."

## Little Mangy Cur Introduced Them

By H. LOUIS RAYBOLD

© WNU Service.

"CONFOUND your dirty sniffing at my heels!" The young man turned around to kick the offending scrofic creature which had followed him for several blocks. Then something in the dog's humble eyes touched and he stooped down. "Lost, old boy! Not on collar on. Well—well!" said he, and—as I thought he was going to—"I'll be darned if I'll take you home!"

Dixon Blaine had ambitions of his own—or thought he did—and had defied like wasting time on a mere boy, but he had a soft heart and there was something about the animal which reminded him of that pampered creature he longing to the girl of his dreams and by her so petted and made so much of as to arouse envy in his breast. Still possessed by the dog and walked on, becoming once more absorbed in the all-important question—how was he going to make the acquaintance of Betty Lou?

Oh, yes, he had discovered her name by careful eavesdropping. Twice he had been quite unable to unearth anywhere that boon to young men in love, a bird in the bush—and twice had failed. His classmates are bound acres of the Texas Panhandle farm of Fred Stone, reputed to be the largest individual grower of wheat in the United States.

Von Bernstorff is learning first hand how to operate a big wheat ranch and then he plans to return to Germany and farm over his father's large estate there.

He made his way to the United States aboard a tanker and is learning the wheat business from the ground up. He has taken night shifts of oiling combines and repairing machinery. Other days he works with the laborers in the harvest fields.

"Wheat farming in Germany is conducted on a much smaller scale than here," he said. "A 50 acre farm is considered a large one."

His father's 10,000 acre farm is the largest privately owned tract of land in Germany, he said.

## Fire Burns Ten Years in Pennsylvania Mine

Tamaqua, Pa.—Miners digging coal in a Lansford strippings operation of the Lehigh Coal and Navigation company recently uncovered antiwrecked mine which they had not entered but burned their fingers when they tried to handle it.

The men had uncovered the site of an old mine fire which had been believed extinguished ten years ago.

The coal company plans to remove as much coal as possible from the south of the fire, which has defied efforts to seal it, and shut it off from valuable coal seams.

## Firemen Save Kitten From Death by Fumes

Utica, N. Y.—Firemen wearing gas masks rushed into a burning house to rescue a child whom neighbors said they could hear crying. The upper basement was filled with ammonia fumes from a broken refrigerating system. Two minutes later they emerged carrying a black kitten.

"Wait, we did our duty," coughed one of the firemen. "Our first duty is to save life and the second property."

## Girl's Garb Shocks Parson; Walks Out

Vienna.—A sensational scene occurred at the Church of the Capuchins in the town of Ottenstein in the Lower Austrian province of Moravia. The church was crowded for Sunday service and two young girls and married women had appeared in immodest clothing—their necks and arms bare and in short stockings.

Ulrich Pfeiffer, the priest, who was to deliver the sermon, took offense at their dress and appeared on the pulpit merely to inform the congregation that he was unable to preach in consequence of the woman's improper garb. He then stepped off the pulpit, leaving the congregation to take action.

## Youths Ford Globe Tour, 33,000 Miles, on $700

Fort Wayne, Ind.—A 33,000-mile globe-encircling tour in a Ford roadster, piloted at a cost of under $700 by Harold Grosnert, Fort Wayne, and Paul Nolpp, Cleveland. The youths, both of whom were graduated from Concordia college here, began their long trip a year ago this month.

Among the methods of earning transportation engaged in by the youths was posting notices on an ocean liner. In Spain they traveled more than 700 miles on bicycles.

## Man Mountain Breaks Hotel Shirt Sleeves Rule

Cleveland.—Prince Carnera, Alpine pugilist, is the only man to violate the old tradition of one of the leading hotels here, that a man must wear his coat in the dining room. Old employees of the hotel recalled no exception to the unwritten rule—even in most torrid weather of midsummer —until Primo ambled in coatless. They remonstrated. He protested. The rule was broken.

## LIGHTS of NEW YORK

By WALTER BROOKHART

Education is not a matter of school or college. Those merely are places where facilities for education are grouped and made more available. But all anyone needs for education is ambition and perseverance. It is hard to see how anyone can avoid a certain amount of education in these days. It was not so long ago that a dweller in a rural community had to depend mainly upon his imagination to tell him what foreign lands looked like. Now, with the radio in the home, he never heard the voice of a really prominent foreigner, or even of the leading thinkers of his own country. Today, the nation brings into the home, also, the voices of foreign lands. He is as well acquainted with the appearance of the Prince of Wales as he is with that of his own hero. He knows how the people of distant countries look, move and act. On the radio, he hears the best music, the best orators, the best comedians, the best actors. Good reads and animated pictures bring newspapers and magazines to his door and enable him to keep in a few hours to places which it would have taken his grandfather days and weeks to reach. Man's viewpoint has widened to the extent that he is obliged to absorb general knowledge, whether he has any ambition to educate himself or not. And as for New York, the city is an education in itself.

You don't find gypsies in New York in tents. You find them in little stores. There is, for example, a native woman on Eighth avenue in the fifties. Rugs are hung in the center to make the back of the place resemble a gypsy tent. Whether she has any affinity with the usual sexless around their waists and their long hair braided I have not handkerchiefs. When they are idle, they sprawl on the floor or in a large sign, which says: "Henna Read." I think they must be gypsies.

* * *

At Durham's, on the Japanese restaurant on Sixth avenue, the waiter puts a gas ring on the table, places a metal pan on the ring, and proceeds to cook your food in it. He then gives you a pair of chopsticks and leaves you to do the best you can. There is a trick to the use of chopsticks. You place one stick in the hollow between the thumb and first finger and rest the tip of the third finger firmly against it. You then place the other chopstick, held by the ball of the thumb and the two fingers, in such a moveable. Once you master the trick and get the chopstick technique, eating with chopsticks becomes easy. But until you get good at it the waiter finds it a big task to supply you with a fork.

* * *

He has a sitting room, bed room, and bath on a court, and a misplaced sense of humor for the public, he decided to retire early. As he entered his sitting room a light was switched on and there sat the landlady and her daughter. These ideas was that it was too hot to stay in and that somewhere there must be a real cool breeze take them to a night club. They telephoned a couple without and one of the girls said:

"Well, tell him as soon as he comes in to call me." And she gave her number.

* * *

This was enough for the listener. He went into his living room, where he has a telephone which doesn't go through any automatic switchboard, and he called that number. He got it. "Is the landlady at?" he said. "Well, Dorothy, it sure is good to talk to you again. I suppose you heard the old man finally left me a million. Think of it! And you'll be glad to hear he is much fun on so little. But now we'll shoot the works a speed, won't we, Dorothy. Don't be silly. Of course you know who this is. Do you mean to tell me after all the trouble I have had getting your number that you don't even remember my voice. I'd never forget your voice. Oh, well, what's the use arguing? And he hung up the receiver and went back into the bedroom.

Betty Lou's mother was saying to her companion. "Naturally, I knew his voice, but I was certainly in no place to do it. I can't think who could have been left a million. It's amazing."

"Never mind," said the second girl. "He is sure to call up again."

"I will," said the man, as he pulled down his shade. But he said it to himself.

* * *

**AFTERNOON**

Some one is coming to call.
Up the red brick path between daffodils dancing
I see white ruffles that blow:
A parasol, dipping against the sun.
It is some one stout, and warm in her new white gloves.

My old green apron is smudged with the gardening-soil.
My hands are the hands of a peasant woman. My hair
Comes tumbling down into my eyes.
I wish I could be down flat like a child
And hide in the grass, while she rings and rings.
And sticks her card under the door with a sigh.
And puffs away down the path.
I wish—but the parasol bobs.
And she bobs like a mandarin's lady,
Smiling and bridling and beckoning

If I were a daffodil, in an apron of green and gold—

But there she stands on the path,
And her gloves are so new they squeak with newness and stoutness.
And I know she will talk of the weather and stay an hour—

If I were a daffodil—
Or a little coal blinking bug
Down in the daffodil leaves—
—Fannie Stearns Davis Gifford. Poem.

**A COURT DECISION**

Youth eloping with the girl of his heart!—"Judge, we would like you to join us."

The Judge—"Thanks. I don't know who you are, but I never refuse to drink with a gentleman, be he friend or stranger. I'll be with you in one minute."

The United States now holds nearly five billions in gold, more than three-fifths of the world's supply.

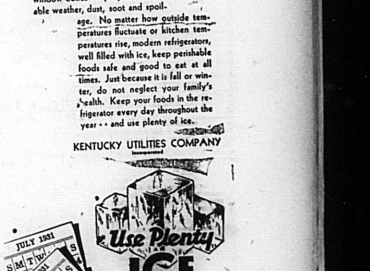
*Your Kitchen Knows No Season*

FALL or winter, spring or summer, the temperature of your kitchen stays about the same • • far too high for safe food preservation. It may be zero outside, but the temperature of your kitchen may be most conducive to bacteria breeding, spoilage, and consequently food waste. Unless foods are kept under proper refrigerating conditions the year around, there is always danger of spoilage. Nor are perishables safe in the cellar or in makeshift window boxes • • prey to changeable weather, dust, soot and spoilage. No matter how outside temperatures fluctuate or kitchen temperatures rise, modern refrigerators, well filled with ice, keep perishable foods safe and good to eat at all times. Just because it is fall or winter, do not neglect your family's health. Keep your foods in the refrigerator every day throughout the year • • and use plenty of ice.

KENTUCKY UTILITIES COMPANY



## Police Chief Needs Silencer for Frogs

Winchester, Ky.—Police Chief William H. Rogers, accustomed to restraining drunken carousing cats and performing kindred services, recently received a complaint which, officially
