The Governor's Integrity of Purpose.

In our issue of August 11, 1931, the writer wrote a column on the Governor's integrity of purpose.

After a month's lapse, the writer as a trustee of a Governor of the Legislature has ever read the heartiest approval...

When the Governor's integrity of purpose is maintained, it is a matter of course that the people will be benefited...

If Shoe Were On Both Feet.

It is a matter of course that the people will be benefited when the Governor's integrity of purpose is maintained.

Another Record Spelled.

Another record spelled that Sunday that the Governor's integrity of purpose is maintained.

Four Day Notice to Move

Have you ever enjoyed the quiet winter months of the year when the snow is on the ground and the frost is on the air?

It is a good idea to have a four day notice to move to a new home when the weather is just what you need.

THEIR CONTINUANCE WAS JUSTIFIED

When the building commission was organized last year, it was expected that it would continue its work.

The commission has been successful in its work, and its continuation is justified.

Fresh Pork Calicoes, 1 lb. 9c
Lard, pure, 50 lbs. \$2.98

Shall We Get Together and Cut Electric Service Rates?
To attempt further reductions would be unfair to the coal operators, therefore to the competent and faithful employees who live and spend their earnings in your community. Let's assume, therefore, that the cost is on rock bottom. How, then, can we expect to get a lower rate for electric service?
Here is the answer: During the year 1931, there were 15,318 residential customers of a total of 40,609 kWh's who used less than 16 kilowatt-hours per month. All of these paid less than 2 cents actual cost to serve them (2,110 of these used less than 5 kilowatt-hours per month).
The remaining 62.17% rate, are required to pay a percentage of the total cost of the power on the whole.
Yet all of these customers could be served with additional kilowatt-hours at a very small increased cost.
Increased usage of electric service to direct routes to lower rates. Even so—
Electricity is cheap!
