A Complete Line of MEN'S FALL SUITS \$10.00 and up

We will announce soon the date for the giving away of \$50 in Gold

The average Kentucky home uses twice as much electricity today as it did ten years ago.

Of course, this is partly because electricity is cheaper. But the princi-pal reason is that women have discovered how help-ful it is and how many different household jobs it can do.

And they have observed how it so often replaces other expenses—and that it is economical in the long run to use electricity

Remember: Each additional use of electricity reduces its average cost.

Electricity is cheep!
