(Continued On Page Seven)

Turkeys

are produced by two methods: One way is to start the season with good dependable breeding stock and show a profit at the end of the year. The other way is to hang on to those pale, peeked late maturing birds you now have, mate them to a parasite ridden cull tom—and you will be in no more, and no better luck than was the parent stock.

Secure some of our "Better Bronze Breeders" and start the season right.

O. C. RANKIN, Proprietor,
CYNTHIANA, KY. R. D. No. 4.
