SAW MILL AT PARKS' FERRY

Rough And Dressed
LUMBER

"We have no bananas"—you can get them up street—but we have our

Saw Mill Going

at Parks Ferry and we are now cutting all kinds dimension stock. Pine, poplar, oak and hemlock. Special sizes, anything from a 2x4 to a 12x12 or larger. All lengths 10 to 30 feet. We have 600,000 feet or more in the log at the mill. We are also making tobacco sticks at the mill.

We have a complete stock of rough and dressed lumber at Carlisle, Ky., which is all under cover in our sheds. Flooring, ceiling, siding, mouldings, doors, windows, wood shingles, composition roofing. All kinds of building material and at prices in keeping with the times and your farm products such as 25c wool, $5.00 calves, $4.00 cattle, $4.00 hogs, $6.00 lambs and 10c eggs.

We have our lumber bought right and can save you money on your requirements.

Give us a chance to figure with you on your requirements. No order too large or too small to be appreciated and given our prompt attention. Visit our yard and mill. See the logs before and as they are cut into lumber, shingles and tobacco sticks. Remember we are always glad to see you.

RATLIFF BROS. COMPANY

THE GARDEN

THE FALL GARDEN, II

(By John R. Gardner, Kentucky College of Agriculture.)

Last week, was begin a discussion of how to increase the value of a garden by replanting each space as it was vacated, with vegetables to can and to store for the winter; today's article completes the list that makes up the "fall garden."

Peas—Although peas are not ordinarily considered part of a fall garden, yet, inasmuch as many gardeners find themselves in the position of having pea seed whose planting the unfavorable spring season prevented, an excellent thing to do is to plant peas August 1. In view of the fact that hot weather will prevail at that time, the furrows should be laid off deep, and the seed covered shallow—only filling in the furrows when the tops of the seedlings are tall enough not to be covered. Thus deeply rooted, they ought to survive the hot and perhaps dry weather to follow, and although a full crop cannot reasonably be expected, the peas that are produced will certainly prove welcome.

Late Cabbage—Although it would have been better to have had cabbage seedlings started in late May now is not too late to arrange for cabbage to store and from which to make kraut. Flat Dutch and Drumhead are the conventional varieties, but the somewhat shorter-season, and somewhat drought-resistant Houser is more likely to prove satisfactory, starter bite.

Greens—Fall is the season of greens, partly because it is the custom, and too, because the sowing of greens lends itself so admirably to fall gardening. Sowing season begins with August 1, at which time kale and turnip greens may be put in. About this time, many spaces in the garden become vacant, and because too little time remains to produce most of the vegetables listed above, a schedule of greens sowing should be begun. Such a schedule would read as follows:

August 1, Scotch kale and Seven Top Turnip greens.

August 15, and at 15-day intervals thereafter, Collards.

August 15, Purple Top turnips and Siberian kale, with a second kale sowing September 1.

Besides the greens somewhat as above for table consumption, not a bad plan at all is to sow, after August 1, a mixture of greens seed in every row and every plot where vegetables have matured. True, there will be more greens than the family can hope to use, but some of these may be cut and fed chickens, or the chickens may run in the garden.

If some of the greens are protected with straw or tree leaves, they will remain productive farther into the cold weather than they otherwise would, and some may even survive the winter to make greens the following spring. Even though they do not, the killed tops and the roots make humus to plow under, and leave the soil in superior condition for any crop that follows them.

ABOUT THE FARM

Kentucky Agricultural Experiment Station:—

The chief benefit of cultivating tobacco is to kill weeds. Preventing the formation of a soil crust also saves moisture while the plants are small. It is desirable to go over the field with hoes as soon as the plants start growing, to clean weeds and break up the crust around the plants.

It pays to keep pullets free from lice and mites. Good seed lands, a corn field or an orchard make good summer range for growing pullets. They should not run with one of hens or, with turkeys. Vaccination will control roup and chicken-pox.

Cut the lawn less frequently in dry, hot weather, and set the mower to leave the grass two to three inches long. Clippings left on the lawn serve as a mulch and conserve moisture. Do not clip a neglected lawn to the bare ground. Scalping the crowns of the grass plants to the roots paralyzes the sod.

Alfalfa has proved be well suited but not ers and fertile. Dry, fertile hay wastes badly in handling, it is difficult to bind until the crop has been pulled loosely in the barn or stack. Take a small handful and twist and if the stem will not crumble small not be broken easily, but it should be impossible to squeeze out even a trace of water.

Many farmers begin cultivating their strawberry plants as soon as picking is over. A good plan is to loosen the rows to 8 inches wide, give a side dressing of sulfate of ammonia or nitrate of soda at the rate of 200 pounds per acre or a pound to a 30-foot row. Avoid putting the fertilizer on the plants.

Wilt Spread By Cucumber Beetle

Cucumbers, muskmelons and squash are subject to a wilt disease causing the leaves on one side and later the whole plant to wilt and die. The College of Agriculture at Lexington says that this disease is spread by the cucumber beetle and that prevention depends on controlling this insect. Coats of carbon cloth placed over the young plants will protect them for a time. Later a dust of a pound of calcium arsenate to 20 pounds of burned gypsum dusted on the plants frequently will help control the insect and incidentally the disease. Bordeaux mixture 4-50 with 2 ounces of arsenate of lead powder to each 3 gallons of spray is effective.

There are more than 750,000 miles of improved roads in the nation's highway system.

Demand For Ginseng From China Brings Good Income

(Wayne County, W. Va., News)

Despite the conflict with Japan, China will again look to America for her supply of ginseng, and Wayne countians who tramp the hills and hollows in search of the valuable wild plant, will find a steady demand for it in this year.

The root with a romantic background has for many years been a lucrative source of income for West Virginians, particularly in the mountainous sections of the state.

In the more remote sections of Wayne county, ginseng is hunted and dug in large quantities every spring and summer. The root of the plant is dried and then taken to a nearby merchant where it is exchanged for merchandise. Many families have been known to dig enough ginseng in a season to purchase a wagon-load of flour, meal, sugar, clothing and other necessities. The storekeeper in turn markets the ginseng elsewhere.

Charleston dealers stated that the price for the root will be considerably lower than in the years 1930. During the World War, ginseng brought the collectors more than $40 per pound. This spring the price will fluctuate between $3 and $5 per pound. The decline is attributed the lowered price to the watering silver standard of currency international exchange.

Ginseng, (Panax Quinquefolium) to the Chinese more than medicine or any other drug is to them a panacea, an authority stated that as its name implies, it is panacea, being accepted for all its ills that flesh is heir to."

In America, though accredited with stimulating, aromatic and tannic properties, the root is seldom used except by herbalists.

The wild ginseng is said to supply "man plant" in the Chinese language. Following tradition, the Chinese gatherers are confronted with old doctrine which assumes that plants resembling organs of man are heir to." In America, though accredited with stimulating, aromatic and tannic properties, the root is seldom used except by herbalists.

Following tradition, the Chinese gatherers are confronted with old doctrine which assumes that plants resembling organs of man are heir to." In America, though accredited with stimulating, aromatic and tannic properties, the root is seldom used except by herbalists.

DRAFT HORSES IN DEMAND

New York Herald-Tribune:

One of the quickest assets on the farms of the United States today is the draft horse—the stately, dependable type that tills the soil—the female of which does not permit femininity to interfere with her sphere of usefulness as a source of power. It is in times like these that this dual quality is appreciated to the fullest. The Percheron, Clydesdale, Suffolk Punch and Shire matrons, in fact, can plow, harrow or reap, if hailed at intervals to suckle the sturdy offspring they bring to field. Will do a full day's work if hitched in pairs or alongside a steady-going gelding. With an abundance of feed available, the farmer finds it more advantageous to convert his crops into horse and muscle than to sacrifice them on a declining market. Quite frankly he holds a sure return in a market where horse power under existing conditions is generally considered a total fraction.

These scenes were the first of the farm products to blaze the way to prosperity, which many no doubt confidently believe is in sight. Their number on the streets of the great cities may not have increased appreciably, but this there is a brisk demand for them at figures that will the farmer-breeder a profit is evident in the numerous sales on foot in the west and northwest, where most of our draft horses are produced.

Illinois, the leading draft stock, both male and female, in Wisconsin, Iowa and Minnesota, where the production of the draft horse type is also large, are reporting a brisk trade—within the last six months it is taken as a happy omen by those of more pessimistic bent.

KENTUCKY FARM NEWS

The Kentucky Utilities Company's entire existing stock of electric plant feeds on the farms of J. H. McAfee and Ben Allen Thomas in Mercer county, which they say they were limited with electric rabies, and planning more in them were ready for setting a week earlier than where plants under ordinary conditions.

Seventy-five Henry county farmers who own high quality flocks are expected to be interested in improvements of eggs to New York. Good breed plans prepaid for their eggs.

Terraces enabled Gaston Coke, of Logan county farmer, to control soil washing on a 15-acre field, after many years of unsuccessful attempts to stop gullies. Two days' work with terrace and tractor has the field in terraces that withstood this spring's heavy rains.

Discussion at a meeting of Harrison county sheep raisers, R. C. Miller of the College of Agriculture, Lexington, will scrub limits are costing Kentucky farmers $1,000,000 a year. Buying a better bred type would change this loss into a gain, he said. Many lambs also are sold too heavy, 75 to 85 pounds being the best weight.

Boys attending Junior Week at the University of Kentucky were given instruction in repairing and adjusting farm machinery, and in equipping a farm shop at small cost. They were told that properly handled implements increase farm profits.

County agricultural agents have been responsible for developing small fruit growing into a profitable farm sideline in Graves and Boyle counties.

To Study Needs Of Egg Markets

First-hand information about the demands of the best egg markets will be presented at the ninth poultry short course, to be held at the Experiment Station at Lexington June 26-30, Harry Winters, of the Missouri College of Agriculture, has been making a survey of the New York City egg market, and will come directly from that city to Lexington to address poultry raisers, dealers and others attending the short course. One day of the course will be devoted largely to the consideration of the production of high quality eggs for the best markets. Kentucky, with its ideal climate and other conditions, is said to possess great possibilities in poultry raising. One of the purposes of the course is to consider ways of developing this industry.

The short course will offer five days of intensive study and laboratory practice in poultry raising. Practically every problem of farm poultry production will be discussed. The course is open free to all.

State Capitol Building Draws Many Visitors

That Kentucky's handsome Capitol building is a mecca for sight-seers is indicated by the fact that 22,524 persons have registered in the visitors' register at the main entrance in the last year.

Frank Kavanaugh, official capitol guide, was commended in a recent report on his activity made by State Inspector and Examiner Nat B. Hewell.

The number who registered "from other lands not represent money, than one-twentieth of the persons who visited the Capitol for business as well as sight-seeing." Mr. Hewell commented.

Parties of students from the colleges, high schools and common schools in all parts of the state as well as many from outside the state, visit the Capitol and are in the hands of the guide while here.

The Inspector and Examiner has this number of names of any of the cities on the register, with Cincinnati second. Mr. Hewell's visitor showed 93 from Cincinnati May 29, 1932 and 56 from Washington on the same day. Outside of Kentucky, Ohio has the largest number of visitors, with other states ranking in the order named: Indiana, Illinois, Missouri, West Virginia, Tennessee, New York, Massachusetts and Texas. The largest number registered in a single day from one small town was on August 19, 1932, when 44 visitors from Shepherdsville, Ky. The largest total number in one day in the past year was on December 11, 1932. The number however, was closely approached on several holidays.

FOR STATE SENATOR

We are authorized to announce FRANK LEBUS as a candidate for the Democratic nomination for State Senator from the 30th Senatorial District, subject to the action of the Democratic party at the primary to be held August 5, 1933.

We are authorized to announce GRYAL HUGHES as a candidate for the Democratic nomination for State Senator from the 30th Senatorial district, subject to the action of the Democratic party as the primary to be held Saturday, August 5, 1933.

We are authorized to announce WALTER C. FERRACE as a candidate for the Democratic nomination for State Senator from the 30th Senatorial district, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

FOR REPRESENTATIVE

We are authorized to announce the candidacy of the undersigned for the Democratic nomination for Representative from the 70th district, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

FOR COMMONWEALTH ATTORNEY

We are authorized to announce J. THANTER SIMS, of Robertson county, as a candidate for the Democratic nomination for County Attorney of the Eighteenth Judicial District, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

FOR CIRCUIT COURT CLERK

We are authorized to announce HERDY MYERS as a candidate for the Democratic nomination for Circuit Court Clerk, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

We are authorized to announce SPENCER CURTIS as a candidate for the Democratic nomination for Clerk of the Nicholas Circuit Court, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

We are authorized to announce JEANETTE COX as a candidate for the Democratic nomination for Clerk of the Nicholas Circuit Court, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

FOR COUNTY JUDGE

We are authorized to announce PAUL D. DARNALL as a candidate for the Democratic nomination for County Judge of Nicholas county, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

We are authorized to announce D. M. CURRY as a candidate for the Democratic nomination for County Judge of Nicholas county, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

FOR COUNTY ATTORNEY

We are authorized to announce J. MILFORD BERRY as a candidate for the Democratic nomination for County Attorney of Nicholas county, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

We are authorized to announce POSTER V. COX as a candidate for the Democratic nomination for County Attorney of Nicholas county, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

FOR COUNTY CLERK

We are authorized to announce MRS. BERTHA L. WESTFALL as a candidate for the Democratic nomination for County Clerk of Nicholas county, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

We are authorized to announce JOHN F. SUDG as a candidate for the Democratic nomination for County Clerk of Nicholas county, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

FOR SHERIFF

We are authorized to announce J. CLARKE LEER as a candidate for the Democratic nomination for Sheriff of Nicholas county, with L. B. Barton as Deputy, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

We are authorized to announce WILLIAM A. WILSON as a candidate for the Democratic nomination for Sheriff of Nicholas county, with Maurice Cameron as Deputy, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

FOR TAX COMMISSIONER

We are authorized to announce WILL GWINUP as a candidate for the Democratic nomination for Tax Commissioner of Nicholas county, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

FOR JAILER

We are authorized to announce the Democratic nomination for the office of Jailer of Nicholas county, subject to the action of the Democratic party at the primary to be held August 5, 1933.

FOR MAGISTRATE

We are authorized to announce JOHN G ALLISON as a candidate for the Democratic nomination for Magistrate in the First Magisterial district, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

We are authorized to announce for the Democratic nomination for Magistrate, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

We are authorized to announce R. H. HAMILTON as a candidate for the Democratic nomination for Magistrate in the Fifth Magisterial district, subject to the action of the Democratic party rt the primary to be held Saturday, August 5, 1933.

We are authorized to announce V. L. (Uncle Peter) ALLISON, as a candidate for the Democratic nomination for magistrate in the Second Magisterial district, subject to the action of the Democratic party at the primary to be held August 5, 1933.

We are authorized to announce GEORGE D. McLEAN as a candidate for the Democratic nomination for Magistrate in the Second Magisterial district, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

We are authorized to announce TAYLOR BOWDEN as a candidate for the Democratic nomination for Magistrate in the Second Magisterial district, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

We are authorized to announce G. H. NEAL as a candidate for the Democratic nomination for Magistrate in the Third Magisterial district, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

We are authorized to announce ED M. MYERS as a candidate for the Democratic nomination for Magistrate in the Third Magisterial District, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

We are authorized to announce JOHN DUNN as a candidate for the Democratic nomination for Magistrate in the Third Magisterial District, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

We are authorized to announce JOE E. WHALEY as a candidate for the Democratic nomination for Magistrate from the Third Magisterial district, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

We are authorized to announce R. H. CHOWE as a candidate for Magistrate in the Third Magisterial district, subject to the action of the Democratic party, subject to the action of the Democratic party in the primary to be held Saturday, August 5, 1933.

We are authorized to announce FRANK HEED as a candidate for the Democratic nomination for Magistrate in the Third Magisterial district, subject to the action of the Democratic party at the primary to be held Saturday, August 5 1933.

We are authorized to announce ROBERT HARRIS as a candidate for the Democratic nomination for Magistrate in the Third Magisterial district, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

We are authorized to announce D. W. BOOTH as a candidate for the Democratic nomination for Magistrate in the Fourth Magisterial district, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

We are authorized to announce B. T. CONWAY as a candidate for the Democratic nomination for Magistrate in the Fourth Magisterial District, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

We are authorized to announce ALLEN G. GILLESPIE as a candidate for the Democratic nomination for Magistrate from the Fifth Magisterial district, subject to the action of the Democratic party at the primary to be held Saturday, August 5, 1933.

We are authorized to announce R. H. HAMILTON as a candidate for the Democratic nomination for Magistrate in the Fifth Magisterial district, subject to the action of the Democratic party rt the primary to be held Saturday, August 5, 1933.

Mildred Linville, Ledona Tregarden, Mary Catherine McCord and Gladys Linville spent Thursday with Christine Bentley.

Dauline and Edith Wells spent Saturday evening with Mrs. Martin Ritchie.

Myrtle Ritchie, of Richmond, who has been spending a few weeks with her grandparents, Mr. and Mrs. Martin Ritchie, returned home Tuesday evening.

Paul Morton Obtaining Information About Fund

Paul Morton, City Manager of Lexington, left Sunday for Washington, D. C., to obtain information as to how Kentucky and the city of Lexington may receive federal aid for public works under provisions of the national industrial-recovery act.

Gov. Ruby Laffoon recently appointed Mr. Morton official representative of Kentucky to investigate the possibilities of the state and counties and cities of the state obtaining a part of the $3,300,000,000 provided by the act to relieve unemployment, by habilitate industry and conserve natural resources.

How much of this fund Kentucky is entitled to receive and legal steps governing aid for state, county and city agencies will be pointi Mr. Morton hopes to have made clear while he is in Washington. He will confer with Gen. Hugh S. Johnson, recently appointed administrator of the act.

Provisions of the act provide that work projects be carried out in Kentucky at unusually small cost. According to information received in Lexington, the federal government, under provisions of the act, will donate 30 per cent of the cost of approved projects and will lend the rest, 70 per cent, at three per cent interest.

What type of collateral the government will require is a matter to be worked locally, but Mr. Morton intends to obtain definite information on this point. Mr. Morton will obtain information for the entire state, but also will investigate the possibilities of Lexington obtaining funds for building a new sewer system and system to relieve flood hazards in the city.

Executor's Sale

As Executor of the Estate of James D. Shrout, and for the purpose of settlement of the Estate of the said James D. Shrout pursuant to his last, will and testament, I will offer at Public Auction at the court house door in Carlisle, Nicholas County, Ky., on

SATURDAY, JUNE 17, 1933

At or about the hour of 2 o'clock, p. m., the real estate owned by the said James D. Shrout at the time of his death, containing 233 acres, more or less, (being in six (6) adjoining tracts), lying on the waters of Grassidy Creek, in Nicholas County, Ky., and more particularly described as follows:

Tract No. 1: Contains 5 Acres, 2 and 22 Poles, more or less, being a part of the "Major Rose Tract" of land, and is bounded and abutted by the lands of J. W. Shrout, the lands of James D. Shrout's estate, and the lands of Clarence Burke.

Tract No. 2: Contains 28 Acres, more or less, and is bounded and surrounded by the lands of J. D. Shrout, Jno. W. Clay and J. W. Shannon, and is the same conveyed to James D. Shrout by Joe Atkinson and wife, D. B. 28, page 37, Nicholas County Court Clerk's office.

Tract No. 3: Contains 24 Acres, more or less, being a part of the A. T. Clark, tract of land, and bounded and abutted by the lands of H. H. Shrout, Ed Mercer and J. W. Shannon.

Tract No. 4: "Contains 47 Acres, more or less, being a part of the A. W. Shrout tract of land, and is bounded and abutted by the lands of Clarence Burke, Jno. W. Shannon and the other lands of J. D. Shrout's estate.

Tract No. 5: Contains 71 Acres more or less, and is known as the "Templeman Tract," and is bounded and abutted by the lands of H. H. Shrout, Dick Lyons, Everett Judge, Mary Vice, John W. Shrout.

Tract No. 6: Contains 48 Acres, more or less, being a part of the J. W. Shrout tract of land, and is bounded and abutted by the lands of T. L. Clark, Mrs. Smoot, the Clay Farm, and the other lands of J. D. Shrout's estate.

These lands will be first offered in separate tracts, and then as a whole, and the best bid or bids to be accepted.

Possession to be given on March 1st, 1934, with the privilege to the tenants or purchasers to have possession for seeding or any other purpose the same.

Terms of Sale: Ten per cent cash or bond when the property is struck off the day of sale, and the balance of one-half to be paid when the deeds are made and full possession given on March 1st, 1934; and one-half due on March 1st, 1935, with interest from March 1st, 1934.

Anyone wishing to see the lands may call at the residence of the late James D. Shrout, or see Thomas James Shrout, H. H. Shrout or the undersigned.

These properties are improved with dwellings and barns and other buildings, and are adjoining tracts, and they will be offered for sale by the acre according to the old surveys.

A. W. Shrout, Executor of the Estate of James D. Shrout

FAITHFUL HEN DIES

(Mt. Sterling Gazette)

Mrs. E. E. Kendall, Wilson street, this city, reports that she had a hen 10 years old to die last week. The hen has raised a brood of chickens for the past nine years and this year she hatched 14 chickens from that many eggs. After the chickens were taken off Mrs. Kendall noticed that the mother was blind and her chicks were given to another hen.

This was one of the oldest hens we have ever heard of and Mrs. Kendall would like to know if there is one that old in the county.

LOW PRICE CARS VS. CHEAP CARS

We do not build a low-price car; the cost to us of building our car is pretty high.

But we do sell a high quality car at a low price.

Almost every new Ford V-8 car we have built so far this year, has cost more to manufacture than its selling price was. As you buy them at only $490 to $610, we have to depend on increasing volume to make up the difference.

The reason for this is simple:—A manufacturer who gives good value must expect to lose money on the first cars he sells because he cannot charge his costs to the people who are first to buy.

But with the purchaser it is different — he cannot afford to lose anything on a car. It must give him full value from the first, and keep on giving him full value for many years.

Two things make possible our combination of low prices and high cost quality:

1. Volume Production
2. Taking only one profit

First, we say our price at what would be fair to the public on the basis of economies we enjoy in volume production. Then, in order to justify and maintain our low price we must get volume sales.

Thus it comes that a car which is really high-cost to make, is also low-cost to buy.

There is a difference between a cheap car and a low-priced high quality car.

Ford prices are always fixed at a point which makes it profitable for a customer to buy.

Good and lasting business must produce profit to the buyer as well as to the seller. And of the two, the buyer's profit must be, comparatively, the larger one.

It pays us to sell the Ford V-8 because it pays you to buy it.

Could you lend me a Dime?

No one would think of running across to a neighbor several times a day to ask, "Could you lend me a dime, please?"

Of course, borrowing the use of a neighbor's telephone is not exactly like borrowing money, because it doesn't cost your neighbor anything extra for your call except the interruption of possible inconvenience.

It is also true that neighbors may borrow freely from each other and remain friendly, so long as each is careful to return the loan in full measure. When you borrow the use of a telephone you are exiting something you cant return, and in this way, too, borrowing telephone service is different from borrowing money.

The very fact that you have to borrow your neighbor's telephone shows you really ought to have one of your own.

When you stop to think of the convenience, comfort and satisfaction of mind that a telephone provides, you will probably agree that in trying to do without a telephone you are sacrificing too much for the few pennies saved. Why wait longer? Order your telephone today.
