Has your battery been checked?

Have You Filled Your Radiator With Alchol Or Some Anti-Freeze Mixture?

Act Now! Save Money!

A frozen radiator--a split engine block--will cost you plenty of dollars that the expenditure of cents NOW will save.

Buntin's Sales and Service

WHY PUT IT OFF?

How many times has someone in your family made the remark, "I wish we had a telephone!"

Very likely your friends, too, are wishing you had a telephone. For in doing without it you are making it difficult for them to invite you and your family in their social activities. If there are children in the family, they, too, feel the loss of the friendly contacts a telephone affords.

Why put off enjoying the satisfaction and protection of telephone service in your home, when you may have it for less than ten cents a day?

Any telephone employe will be glad to tell you about party line and other classes of service. Why wait? Order your telephone today.

710 Farm Loans Made In State In Week Closing Nov. 8

During the week ending November 8, The Federal Land Bank of Louisville, closed 710 loans and cleared checks totaling $1,486,000, to the farmers of Tennessee, Kentucky, Indiana, and Ohio. Ernest Rice, President of the Bank announced. This is, by far, the largest number of loans ever closed in one week by the Land Bank and is more loans than were closed during the entire year of 1932.

In addition the Bank now has 1377 approved loans aggregating about fifteen million dollars which will be closed as soon, as the borrower sends in a completed abstract of title to the property.

During the month of October, a total of 828 loans aggregating $2,099,-600, were closed by The Federal Land Bank. Of these, 120 totaling $317,-400, went to farmers in Tennessee; 266, for $743,800, went to Kentucky; 170, for $318,100, went to Indiana and 242, for $697,000 went to Ohio.

The number of loans closed is increasing each week," President Rice said "and our Legal Department is now in a position to examine the abstracts and close the loans as rapidly as the abstracts are sent in."

Applications for loans are continuing to pour into the Land Bank, 2313 having been received during the first seven days of November. This is more than three-fourths the total number of applications received during 1932, and demonstrated that the farmers of Tennessee, Kentucky, Indiana and Ohio, are continuing to take advantage of the opportunity to refinance farmers at the lower rates of interest and on a long-time amortized basis.

Farms are now being appraised at a rate of more than 100 appraisals per week and all back applications will be appraised, checked by the Land Bank, and passed by the Executive Committee by December 1.

Most of the money that is being disbursed is used to refinance old loans. Hundreds of farms are quickly saved from foreclosure and many banks have been kept open. Recently a man- every branch of the Fourth Federal Land Bank District will be put on a more secure and liquid condition by the activities of The Federal Land Bank of Louisville.

ABOUT THE FARM

Kentucky Agricultural Experiment Station:

Feed 12 to 15 pounds 8 to 9 quarts) of grain per 100 lbms per day from now until April 1. Feeding hand-fed, give a third of it in the morning and the rest at night in dry-mash. Keep a dry mash in a self-feeder.

Clean the quarters of meat scraps and other refuse of the previous season. Scrub the floor with a strong soapy, hot water rinsing with boiling water. Put it into cracks and other places where the winter may be insects. Some farmers fumigate with sulfur.

Many farmers repair buildings or construct new ones in the spring. The Agricultural engineering department of the College of Agriculture has 185 sets of farm building plans and equipment. Ask a county agent or write the college for a list.

Alfalfa yields enough more than most other hay crops to pay the cost of liming. The average yield of alfalfa hay in Kentucky in recent years has been 2.4 tons an acre, of clover, 1.4 tons, of mixed hays, 1.3 tons, and of soybean hay 1.6 tons.

A hundred pounds of alfalfa or lespedeza hay finely ground with a hammer mill can replace 100 pounds of bran in the grain mixture for dairy cows. Worry little as to bran or cottonseed meal is fed, it is advisable to add a few cent seasoned horizontal to supply minerals.

Farmers who are "getting by" at these times are giving closer attention to details of supervision, and even doing more work themselves. Minor repair jobs, formerly hired done, are now being done at home. Many farmers have been able to reduce cost of improvements, machinery and other items.

AMONG THE COUNTY AGENTS

Powell county farmers who trim the Alfalfa variety of cane the year, harvest much more and better hay, reports Chris Geiger, head of the County Agent U. S. Greene pastured that Kentucky Experiment Station. He grown on every farm in Bath county.

The acreage seeded to alfalfa in Barren county this fall was the largest ever seeded in that county in one year.

County Agent J. F. Graham says that the interest shown in curing methods indicates that farmers in Caldwell county are still "tobacco minded."

Twenty farmers attended the first terracing demonstration ever held in Trigg county.

Vaccination was resorted to to check an outbreak of blackleg among cattle in Jessamine county.

Nicholas county farmers purchased a large number of purebred rams this year. There are both more and larger flocks in the county than in years.

W. J. Kendrick, a Wayne county farmer, sowed 100 acres of wheat on limed land, to be followed with orchard grass and korean lespedeza next spring.

The demand for apples and other fruit this year has created much interest in orcharding in Casey county.

Washington county farmers are considering organizing marl spreading rings again this winter.

The United States Naval Observatory began its observations of the sun, moon, planets and brighter stars in 1845.

Yum! Yum! Better Bacon For Breakfast

Simple ways whereby farmers can have high-quality home-produced bacon for every breakfast of the year, will be a feature of a series of pork cutting demonstrations planned by Grady Bellards, an extension specialist for the College of Agriculture.

Beginning with the right kind of hog, he will show how to cut up the carcass and how properly to trim and cure the parts, so as to produce the highest quality meat right on the farm. Crude methods have prevented many farmers from enjoying the best meat in the world, he says.

With the aid of county agents and farmers, Mr. Bellards has devised a box for making bacon of the highest type. Any farmer can make the box in an hour or so.

Hogs weighing more than 200 pounds should be turned principally into sausage and lard, with the exception of the hams. Mr. Bellards, who will have something to say about making better sausage, will also will discuss storing of meat after it is cured.

Better Days For Horses, Mules Seen

Better days for the horse and mule were forecast in the Agriculture Department's Farm Outlook for 1934.

The prediction carried a note of warning that the shortage of work horses and mules might reach serious proportions.

The relatively high cost of tractors, gasoline and oil as compared with feed produced by farmers in causing many of them again to look to horses and mules as their source of power, said the department's Outlook.

Farm horses at some markets were as much as $25 a head higher in October, 1933, than a year earlier, the department reported.

The danger of over-breeding was described as remote.

The decrease in the amount of work stock has been marked for several years, the report continued, citing the January 1, 1933, the horses on farms numbered 12,163,000, or only 57 per cent of the number reported January 1, 1918.

The mule markets during September and early October of 1933 were reported considerably better, than for several years.

The number of work horses and mules probably will continue to decline for several years, the report said, but the sales checked by a relative reviving demand for both horse and mule colts.

SOME RECORD

(Glasgow Times)

Mr. Ky C. Further, this city, hokey all records for regularity in Sunday school attendance in this section. During the six years he lived in Cave City and the thirty-seven he has lived in Glasgow, Mr. Further has not been absent from the First Christian church Sunday school, for one time. If there is a single person anywhere in this community or section who can better this record of continual attendance extending over forty-three years, let him stand up and tell the world all about it.

Cull, Feed, House; Advice On Poultry

"Poultry Pointers for November," issued by the College of Agriculture, University of Kentucky, contains the following about culling, feeding and housing:

Cull the slacker hens while they are pullets and save on the feed bill. Keep only pullets that have developed well, starting with this entire growing period; that have early laying possibilities--laying under 200 days of age, that have body size and vitality.

A hen cannot lay her maximum unless she is fed a well-balanced ration. Keep only the best hens, and feed them well.

Provide sufficient feeder space, at least 24 running feet for each 100 laying hens.

If pullets are not laying as they should, feed a moist mash at noon. Where electric lights are available they may be used to lengthen the days and as a consequence stimulate production.

Hopper feed both grain and mash to pullets. It is more sanitary, and Bulletin 348 of the Experiment Station shows that just as good egg production is obtained as by feeding grain in the litter.

See that some kind of green feed is available for the flock, as it supplies certain vitamins.

Now is the time to select breeding cockerels for next season.

All needed repairs about the house and equipment should be made before the chickens develop colds or other ailments.

Mineral Products On Display At U. Ky. Museum

Few Kentuckians know that authoritative examples of every mineral product of economic importance in the Commonwealth are now permanently display in the Museum of the Bureau of Geology and Topography at the University of Kentucky, Lexington, Bernard Lee, the value of Kentucky mineral products are the mineral resources, in point of natural wealth, in the world.

Excellent examples of both bituminous and cannel coal are present. A very complete display of petroleums and their products includes samples of gasoline, benzine, naptha, kerosene and greases, all made from Kentucky crude oil. The display of ores exhibit at the University is especially complete, with both polished and unpolished specimens of limestone and sandstone.

One of Kentucky's largest mineral industries, from a comparative point of view, is that of fluospar mining. The Kentucky-Illinois field, taken conjunctively, is the largest in the world. The Kentucky portion includes Crittenden, Caldwell and Livingston counties, and from these localities many beautiful specimens may be seen. In comparison, a collection of a hundred fluorspar specimens from Kentucky separated fluorspar of the world is available for inspection.

Not only samples of clay, but actual clay products such as vases and tiles have been sent to the museum. The geographical sources of these clays range from the "purchase" region, east to Olive Hill and Ashland. Specimens of Kentucky glass sands are also included in one case. Other Kentucky resources on exhibition are specimens of rock asphalt, other lead and zinc ores, now chiefly of historical interest. Three cases contain a chartists, stalagmites, gypsum and other formations from Kentucky caves.

The museum is open from 8:30 to 4:30 week days except Saturday, when it closes at noon.

The word salary means "salt money."

KENTUCKY FARM NEWS

The purchase of 2,000 tons of limestone by farming county farmers this fall marks a revival in the use of lime in that county. The limestone was bought for 60 cents a ton at the quarry, and the average cost of delivery to farms was 40 cents a ton.

It is estimated that 1,000,000 pounds of korean lespedeza seed and 5,000 pounds of sericea lespedeza seed were thrashed in Taylor county this fall. A marketing pool was formed among farmers, and a cleaner purchased.

The completion of good roads is helping to develop interest in fruit growing in Knott county. Two farmers sold approximately 3,000 bushels of apples this year. Many farmers are setting trees and spraying outfits.

French Miller, a Breathitt county farmer, made 1,100 gallons of sorghum from 10 acres of cane. He grew four varieties of cane. The Atlas produced more than twice as much sorghum as any one of the other three varieties.

The Caldwell county tobacco crop was the best in years. Growers used greater care than ever before in curing, many of them using fuprovement and the soft cure method. A tobacco show will be held on Dec 1-2.

Henry Cain threshed 700 pounds of korean lespedeza seed, the first to be produced in Magoffin county. He will use the entire amount on his farm. Several Magoffin county farmers report yields of two tons or more hay to the acre.

A careful estimate by County Agent W. R. Reynolds indicates that 10-cent-home garden work this year has increased the value of home-produced food supplies in Jessamine county by more than $40,000

There are 367 generals in the Mexican army of less than 40,000 privates.

Huge Crowd Expected At Ky. Home-Coming Day

Lexington, Ky., Nov. 14—That annual football classic, Kentucky vs. Tennessee, will be played here on Stoll field on Thanksgiving Day. The game will be the feature of the University's home-coming program.

One of the largest crowds of the season will are the Volunteer-Wildcat game. Ticket sales have been moving along rapidly since early in the season, according to S. A. "Daddy" Boles, athletic director, and seats are being provided for more than 20,000 home-comers and football fans.

There is every indication that this year's Kentucky-Tennessee battle will be one of the hardest in recent history. Neither the Wildcats nor the Volunteers have had a highly successful season, and the result of the Thanksgiving Day game will go a long way toward brightening the season.

That the teams are fairly well matched is seen in the result of the Duke games played. Tennessee lost to the Blue Devils 10 to 2 while the Wildcats lost by a score of 14 to 7. The Vols were outplayed by the Blue Devils however, while the Wildcats outgained Wade's team and otherwise performed brilliantly.

A full program has been planned for the homecoming which will lend color to the annual football classic. The Alumni association will have registration booths at both the Lafayette and Phoenix hotels for returning alumni, and student organizations will hold receptions and present stunts, while the annual Alumni dance, sponsored by the Lexington Club of the University will conclude the day's celebration.

It costs Uncle Sam about $1,350,-000 a year just to keep his employees supplied with pencils and paper.

To Rankin, the discovery was important in proving sound his entire defense. Judgment of the dead boy's interests and sympathies—the boy's knowledge of gullible and impetuous, he was also ordinarily discreet; into whatever entanglement with Mrs. Fletcher he had been drawn. It was not on his own initiative. Instead, he was led on, unconscious that she was playing with him, to accept her interest and any fondness she might have displayed, as genuine.

The first direct contribution to the subject of Rankin's probe came from a boy named Harris Connelly. Ted Stanton and his associate, Clark, were present to hear his statement; their faces mirrored their amazement at the disquieting implications of this fresh inquiry. Connelly, an energetic, heavily built, good-natured sophomore, no frills to be an athlete and already almost bald, was a snag at the dance;

his "woman" had disrupted him at the last moment. As a result, he had danced with the lawyer's wife early in the evening. Then after a perfunctory introduction to Stuart Jordan. Later, he had remarked her continuously in his company, and at last Mr. Fletcher lounged near the dining room door, beside which a punch bowl had been stationed, and watched. The next thing Connelly knew, he was playing with Mrs. Fletcher going upstairs to the second floor.

"Just a minute, Mr. Connelly," Ban kin interrupted him at this juncture. "What time did you see this?"

"About half past twelve," the student replied.

The president nodded, confirming the hour recorded by Mrs. Fletcher's maid for Connelly to continue.

"Well, it didn't have thought anything of their quitting the crowd." the boy admitted, "except that Mrs. Fletcher wasn't Stuart's girl. Even so, I forgot about them within twenty minutes afterward, I went upstairs myself to see if I could find a girl to dance with. I looked unoccupied or I'd have knocked before entering; the door was out and there was a light on the instant I switched on the right. two people lumped in a heap directly from my bed where they had been sitting and I saw they were the boy and Mrs. Fletcher."

Rankin's whole manner changed. "Exactly which is your bedroom, Mr. Connelly?"

"The second one along the back hallway on the third floor, Mr. Rankin."

All right." The detective replied affirmatively. "So on with the incident. What happened after you discovered Jordan and Mrs. Fletcher in your room?"

"Nothing much could happen, sir, could it? I don't know which of us was most embarrassed. Nobody said a word for a moment; and then they just stood there and waited for me to act. So I exercised myself for interrupting, set the favor on my desk and made my exit as quickly and gracefully as I could."

Rankin's tone became searching. "Leaving them to follow you and join the others down-stairs? Or did they remain where they were, instead?"

"They stayed right on in my room," Connelly replied. "I waited a while on the second floor landing, expecting them to come out. But after ten minutes, I figured it was none of my business anyway and gave up watching for them. But they still hadn't returned to the dance floor much later in the evening."

He had not spoken of the incident, he informed Rankin, to anyone else.

Harris Connelly had nothing further to relate that the detective dismissed him. The next information touching on the inquiry came from Paul Whitaker, a handsome alert boy. In a sense, his role supplemented Connelly's, taking it up a half-hour later. At one-fifteen, the lawyer had singled him out during the dance and asked to be had recently seen Mrs. Fletcher about. In the lawyer's elaborately casual manner, Whitaker had caught a hint of trouble brewing.

"In his manner?" At this, Rankin fixed his eyes intently on the boy. "Exactly what attracted your attention? Was it the way he spoke?"

"No, not so much that, Mr. Rankin, though he sounded kind of harsh, as if he was hard to control himself. Yet he seemed perfectly calm. What made me wonder was his look, if you understand me. It was like a frown, only worse; his mouth was drawn into a tight thin line and his eyes burned"—he hesitated a word—"wall, ruthlessly. I could almost see the veins on his head throbbing."

"You would say, undoubtedly, that he was angry?"

"I suppose he must have been. Only it was a deliberate, impersonal sort of anger, like fire smoldering under the surface. Then I remembered I hadn't seen Mrs. Fletcher anywhere for an hour. I volunteered to find her but he refused; he said he would do it himself without any trouble. By that time, I was pretty certain some thing was up, and when he left me, I kept on to find him. I couldn't help wanting to learn why Mr. Fletcher was upset."

"Your interest may prove very valuable, Mr. Whitaker," Rankin encouraged him gravely. "Now, what did Mr. Fletcher do? He climbed to his wife, of course?"

"Very thoroughly, sir; he looked into every room along the halls, regardless of whether the door was closed or not. He had to excuse his intrusion to the people inside several times. At first, he had no luck, if you can call it that; and I began to think Mrs. Fletcher might have left the house altogether. But when he reached Harris Connelly's room, he suddenly entered and shut the door behind him. That's the one next to mine, Mr. Rankin, on the top floor."

"Do you recall if the door was open or closed when Mr. Fletcher approached the room?"

"Closed, sir, and he didn't bother to knock." Whitaker returned. "He just entered without any hesitation, as he shot it. I slipped into my own den, next door, figuring I might be able to hear what happened."

"Well, what did you overhear?" Rankin inquired. "Could you make out what was being said?"

"Not Mr. Fletcher's, sir. He talked in a low voice, and I'm quite certain he was quiet; interrupted just once and said, 'Don't you think your place as mine is down-stairs, Vera?' And he added that he'd like to see her forgiving way that it was definitely a command. Then I heard a noise like a ball, I felt a tension between them, and I was sure that there was going to be more serious than it had sounded. Then suddenly there was a moment of quiet and Mr. Fletcher looked pretty evidently satisfied; and his wife seemed to be crying and in the throes of her confusion."

"Well, that was all that was said or done between them?" The detective voiced his query with the acceptance of Whitaker's disclosure and account.

"All I saw or heard, sir," he answered promptly. "When they came downstairs, I took Mrs. Fletcher away for a dance, to relieve the strain. But I never let on I had any idea of the quarrel and made no sign to Stuart from the instant I switched on the light. The two people lumped in a heap directly from my bed where they had been sitting and I saw they were the boy and Mrs. Fletcher."

Rankin's manner suddenly displayed a fresh animation and he shot a question at the boy.

"Did you mention to Mrs. Fletcher that the sound you heard on the waterfront of the pledges for a ride late on the night of the initiation, and looked them in the country?"

"Yes, in some detail," the boy replied. "I described the way we dressed them in old clothes, made sure they had no money with which to return and separated them in some deserted section of the city to get back the best way they could."

The detective turned to Ted Stanton. "What time did you drive out to the country with the initiates and where did you eventually strand them?"

"Well, we started from the house with them at ten-thirty by machine," Stanton compiled unreservedly. "Three cars in all went out, belonging to the boys; each carried three pledges and the same number of brothers."

"Before that, at what time did the earliest hazing of the night begin?"

"Right after supper, Mr. Rankin," the president returned. "The pledges had all been instructed to report here by supper on Monday; they knew in advance it would be a hectic evening for them."

"Was Jordan present at the meal and throughout the evening?" Rankin asked.

Ted Stanton hesitated doubtfully, but his roommate replied with conviction.

"Oh, yes. I remember he sat at my table during supper."

The detective nodded. "How about Mr. Fletcher? Did he take any part in the activities?"

"Only as a spectator." It was the president who replied. "We could scarcely ride a person in his position. He was invited to attend the whole affair; but he could just drop in for a few minutes around nine o'clock on his way to town. He said he had business which would detain him so late that he'd probably stay in town overnight. He left about nine-thirty."

"Who composed the party that drove out to the city?" Rankin inquired.

Wallace Lloyd spoke up again. "I did for one. We went in George Palmer's car—he, George Drummon and myself. The other pledgees beside Stuart were Roy Martin and Alex Pike —both freshmen in the business school."

"Then you should be able to locate the exact spot where you finally deserted him. How far out was it and by what route did you reach it?"

As Lloyd described the complicated course followed three nights before, Rankin jotted it down in his notebook. At the same time, he asked questions that would more definitely fix the location of Jordan's desertion. Not until he fully understood the student's explanation did he ask:

"How late was it when you reached this place, Mr. Lloyd, and left Jordan to shift for himself?"

"Nearly eleven-thirty, sir," the recorder replied.

"And how long did it take him to get back to the fraternity? Have you any idea of what time of the night he turned up here for his clothes?"

But of this, Lloyd was ignorant; he had retired immediately upon returning to the house. Nor could any other brothers enlighten Rankin as this point. Jordan had told no one how he had fared the night before.

At length convinced that he had learned all he could about the Fletcher incident, Rankin shifted to his second mission at the fraternity. That was to gain private access to Ted Jordan's bedroom. Accordingly, as a subterfuge, he requested to speak again to Larry Palmer, whose chamber adjoined the spectacle's. Palmer, after being questioned among others, had gone up-stairs to it. As for Palmer himself, he had been absent all afternoon, so that the detective knew he could safely make the attempt.

"I'll call Larry down for you, Mr. Rankin," Stanton volunteered. "I suppose he is still up-stairs; he said he had some studying to do before supper."

Rankin was equally quick to refuse the offer. "Never mind bothering him," he hotted Stanton. "I'll just run up there myself in a minute." He waved Lloyd and the president aside as they started to accompany him. "No," he declared, "I want to speak to Mr. Palmer alone. I know which room he occupies."

Before they could follow, he has tened from the chamber and ascended the stairs to the third floor. Going to the long rear hallway, instead of entering Palmer's door, he passed outside the closed one adjoining, the third from the right. He turned forthwith knock-knob assiduously, slipped into the room unobserved and closed the door as stealthily behind him.

The most promising place of concealment for the poisons stolen from the chemistry laboratory was the desk. Rankin tackled it first, and found it careful if hurried scrutiny of many objects, books and the order of themes, pictures and miscellaneous items that filled the drawers and pigeon-holes proved unproductive. Now at first glance did his exploration of the bureau seem to justify his search. In a corner of the bottom drawer, covered by a soiled smoking jacket, he uncovered an obkita tobacco pouch. He inspected this with the zest on the verge of replacing it as he found that it contained little but a thick hand smooth surface of some fibrous substance. Then, impelled by dug once more into the shreds of tobacco.

Two tiny test-tubes, both tightly corked, had been concealed in the pouch. Each contained a white powder of a yellow fluid and the other a minute amount of some grayish substance; uncorked, the fluid had a faint but unmistakable odor. Without any analysis, Rankin had not the slightest doubt that here was a portion of the missing cosine and arsenic. And it was equally certain that Palmer was responsible for their theft. Continuing his canvass of the room with the utmost care, he failed to find anything like a hypodermic needle, with which the student might have injected the poisons into Jordan's wrist.

There remained only to procure a sample of his finger-prints to compare with those the finger-print expert might locate in the laboratory. Rankin turned to Patterson sharing kit for clear records. The surface of a table-top held these impressions of a forefinger, retains impressions admirably; from Patterson himself, good plated box, he abstracted three with distinct ridges, one in use and two others. These he placed in an envelope and pocketed. Then returning the kit to its drawer, so as to leave nothing disturbed, he opened the door and slipped out of the chamber as stealthily as he had entered.

(CONTINUED NEXT WEEK)

THE 25th DAY OF NOVEMBER, 1933

offer for sale at 2:00 o'clock p. m. at public auction to the highest and best bidder for a credit of six, twelve and eighteen months, in front of the Court House door in Cynthiana, Kentucky, the following described property, to-wit:

TRACT NO. 1:

All that certain tract or parcel of land lying and being on the waters of Indian Creek in Harrison and Nicholas counties. BEGINNING in the center of the Scott's Fla. turnpike at No. 1 corner to Williams; thence with his line N. 12 W. 22.21 chs. to a post at No. 2; thence S. 33 E. 26.45 chs. to a post at No. 3; thence S. 40½ to Phillips; thence S. 58½ E. 8.22 chs. to a post at No. 4, corner to Geo Wilson; thence with his line S. 43½ W. 30.67 chs. to the center of a fork road at No. 5 corner to Derrickson and Nichols; thence with center of dirt road N. 28 W. 7.60 chs; N. 36½ W. 8.09 chs; N. 40 W. 22.11 chs. to the beginning, containing 97.24 acres.

TRACT NO. 2:

All that certain tract or parcel of land lying and being in Nicholas County, Ky. BEGINNING in the center of the Maysville and Lexington Shadymook turnpike at No. 1 corner to Phillips; thence with his line N. 26½ E. 12.15 chs. to the center of the Bob Town Turnpike at No. 2; thence with the center of same N. 23½ E. 2.18 chs; E. 3½ W. 4.30 chs; S. 39½ W. 2.30 chs; S. 16½ W. 2.70 chs. to the intersection of the Bob Town Mining road and Shadymook Turnpike; thence N. 76 W. 4.53 chs. to the beginning, containing 4.289 acres.

TRACT NO. 3:

All that certain tract or parcel of land lying and being on the waters of Indian Creek in Harrison County BEGINNING at a large locust tree at No. 1 on plat; thence with 4 new division lines N. 87 E. 11.73 chs to a stone near a gate at No. 2; N. 44 W. 8.06 chs. to a gate post at No. 3; N. 33½ E. 6.63 chs. to a stone; N. 35 W. 10.68 chs. to a post. at No. 5; thence with the old boundary lines N. 44½ E. 6.30 chs. to a pos; corner to Sadie and Clarence Martin; thence N. 33 W. 12.52 chs. to a post at gate; thence S. 55 W. 2.56 chs. to a post at No. 8; thence N. 32½ W. 7.77 chs to a pos; at No. 9; thence S. 64½ W. 24 links to a post at No. 10; Edmund N. 27½ W. 21.50 chs. to a point in the center of the Republican Turnpike; thence with center of same N. 69 E. 12.05 chs; N. 79 E. 26.23 chs. to a point at No. 13 the intersection of the turnpike at Shaw Lane; thence leaving the pike S. 37 E. 4.56 chs. to a stone at No. 14 on the N. W. ball of Indian Creek 22 ft. from a twin sycamore tree and 13 ft. from a walnut tree corner to Lucky; thence S. 19 E. 7.35 chs. to a stone at No. 15 a cross pier at No. 15; thence N. 63½ E. 28 links to a post at No. 16 in Shaw Lane; thence S. 10 E. 16.68 chs. to a point in center of Shaw Lane at No. 17; thence S. 71½ W. 1.70 chs. passing through a large sycamore tree; thence N. 23 W. 2.26 chs. to a post at No. 19; thence S. 77½ W. 4.58 chs. to a post at No. 21; thence S. 18 E. 52 links to a post at No. 22; beam seven to Ivelly Ins. to a post at No. 23; thence S. 7½ E. 11.85 chs. to a post at No. 24; thence S. 40½ to Phillips; thence S. 58½ E. 8.22 chs. to a post at No. 4, corner to Geo Wilson; thence with his line S. 43½ W. 30.67 chs. to the center of a fork road at No. 5 corner to Derrickson and Nichols; thence with center of dirt road N. 28 W. 7.60 chs; N. 36½ W. 8.09 chs; N. 40 W. 22.11 chs. to the beginning, containing 97.24 acres.

TRACT NO. 2:

In obedience to a Judgment and order of sale, entered herein by the Harrison Circuit Court at its regular October term, 1933, the undersigned Special Commissioner of the said Court, will on

GET 200 MILES MORE THIS WINTER
At No Extra Cost
IMPROVED SUPER SHELL
First Gasoline to give Full Summer Mileage plus Quicker Winter Starting

Now, Super Shell gives you all the extra mileage you obtained last summer, plus quicker starting for winter driving.

Some ordinary gasolines are overloaded for quick starting in cold weather, with light gasoline parts. They lose after your engine warms up, thereby reducing your mileage. Other ordinary gasolines are hard to start, waste fuel in starting, and also reduce your mileage.

The improved Super Shell, by Shell's new and exclusive reforming process, gives you quicker starting in the coldest day in winter, and saves, for *extra mileage,* the gasoline you formerly wasted in starting.

The average motorist will get one more mile per gallon this winter—over *200 extra* miles.

YOU SAVE MONEY by using the improved Super Shell, because you get quicker *starting* with less gasoline, and that saves you more miles in every gallon, for *extra mileage.* Super Shell stops winter waste. Use Super Shell this winter and save your money.
