

BUY THE BEST

It's the cheapest in the long run
The Ford V-8 is not excelled by any car under a thousand dollars and is the equal of many above that price

For quality of material and design it is a class by itself. Its wonderful all-metal body makes it the safest car you can buy. The car you see in the picture on the left, left the road where you see the man standing in the picture on the right, rolled down the steep cliff a distance of seventy-five feet, making a vertical fall of about forty feet, turning over and over. The car after being pulled to the road, was driven to town by its own power, running perfectly without any repairs. We have had three wrecks with the Ford stock body, turning over from one to three times and in one hurt.
