THE GARDEN

GREENS

(By John B. Gardner, Kentucky College of Agriculture.)

The first things that come from the garden are spring greens, and now is the time to start them. Greens for their foliage, they must land extremely rich in nitrogen as from manure, chicken manure, particularly. Moisture is important, too, in that it makes the humus as necessary, to odor able soil to hold moisture.

The seed bed should be worked fine, the soil particles made the size of the seed to be sown. It should also be deep, the better to assure a water supply between showers.

The spring greens are mustard, kale and rape, though in a pinch, radish-tops are surprisingly good, too. There are in addition the "wild greens," dandelion and poke.

Mustard is likely the most widely used spring green, but kale and rape are worthy of better acquaintance. The varieties of mustard and kale are Chinese and Bertich, Curled, respectively, and rape is sold under the name of "mustard spring kale."

Although some gardeners sow their greens broadcast, in "patches," it is better to sow them in rows in order that the insects may be more easily held in check. These insects are the black flea-beetle, the plant louse and the green cabbage worm. Sometimes, too, after the weather has become warm the orange-striped Striped Cucumber Bug may become troublesome.

The flea-beetle is most damaging while the seedlings are coming up, nibbling the seed-leaves full of little holes and sometimes causing their complete destruction. The control is Bordeaux Mixture, with a small amount of lead or calcium arsenate should be added to take care of the first cabbage worms. At this time it is quite safe to use arsenate of lead or Paris Green, but later than within a month of harvest. The easiest way to make Bordeaux is to use the prepared form. Sometimes in seasons too cool for the flea-beetles to be active, the plant louse does the damage to greens at seedling stage and even after.

Tobacco, in some form, is recommended for controlling the plant louse, from tobacco is often used, though tobacco stems soaked in water to make a decoction are said to be equally effective. Sometimes one application will be enough, sometimes it will be necessary to be done in such a way that the insects will be hit.

Some gardeners combine or compound a tobacco decoction with Bordeaux and dust the rows. Generously used, tobacco dust is a preventative, in other words as a repellent, but it is not a reliable fertilizer value as well, for it contains almost none.

For the Harlequin Bug, the prevention is the cure: if the bugs are allowed to be packed and destroyed, the later hordes of your descendants will not appear.

Cultivation for greens should be shallow, but complete enough to keep any weeds from starting, and the soil surface should be kept level. Always water.

THE FARM AND HOME

(Kentucky Agricultural Experiment Station)

Let hatching be the watch word in poultry raising. It is impossible to raise a large percentage of the chicks hatched when they are allowed to hatch when convenient. See that all incubators are carefully cleaned and brooder litter at least twice a week.

Be sure to provide a dust bath for the chicks in the setting of an asparagus bed. Here's how Elizabeth Ramsey in charge of the poultry work at the Experiment Station at Lexington, Ky., tells how they found out how to get rid of lice: "We dusted the chickens with sulphur and then put sulphur in their dust baths. Result—no lice."

When house-raising season arrives, spend no more time than you can help work in all of them before beginning. Author Kind, Experiment Station. A cleaning processes result in waste, storm and effort, causing labor, loss of time and, sometimes, breakage of tools.

Clothes should both emphasize and conserve as a foil for the best characteristics of the wearer, says Miss Ruth Wade of the University of Kentucky Department of home economics. Only when there is an absolute harmony of dress and personality does one have that rich, full sensation of being perfectly clothed," says Miss Wade.

Barn yard manure is especially good for corn land, and should be spread at once. If other fertilizers are to be bought, get a high-grade mixture despite the initial cost. Results from its use will be more profitable, and fewer fertilizer charges will be necessary.

The first spray to control black rot of grapes should be applied when the new growth is about an inch long. Use bordeaux mixture 8-10-100. Ask a county agent to write to the College of Agriculture, Lexington, for leaflet No. 11, "Grape Sprays."

HOW BEES STING

A bee's sting is very complicated, according to H. E. Rhodes, Ames, can entomologist, who says that a bee's sting is the modification of an organ common to the insect race, the ovipositor with which the female deposits the eggs. Countless ages have changed this into an effective natural weapon. Approximately twenty-five minutes are required to complete an ordinary sting the smaller species a larger it's queen bee does the stinging—and the act requires three separate sets of movements. First, the upward thrust of the sting; second, impression of the sting, and last, actions of the lancets on the sting which drives it farther into the flesh of the victim. Retraction of the sting is brought about by a contraction and expansion of the abdomen, which acts like a bulb. A poison-secreting organ opens directly into the channel of the sting and salivary bites drive the liquid poison through it.

Farmers Should Study Provisions of Corn-Hog Plan

Farmers have received "from their county agents four forms to be used in connection with the corn-hog reduction program now under way in the state.

These forms are called "preliminary work sheet," "memorandum of agreement," "map of farm and contracted acres," and directions for filling in the information.

"Take time, clients should be studied carefully and the information assembled and filled in, says a state bulletin from the College of Agriculture, which is supervising the corn-hog campaign in the state. This information should be accurate and complete.

Committees have been appointed in all counties, and signing contracts has begun in many counties.

Farmers who sign contracts will reduce corn productive by at least 20 percent and hog production by 25 percent. They must restrict those to acreage by 30 percent, and receive benefit payments of as much as 28 cents a bushel on the appraised yield of the acreage retired from production.

As a reward for reducing hog production by one-fourth the government will pay $5 a head on three-fourths of the average number of hogs harvested and sold in the past two years.

Weather Wisdom For Home Gardeners

Garden operations in the spring are governed more by calendar than by the thermometer, says Ralph Falls in a deterrent than trust in delaying signs.

Many seeds can be sown just as soon as the ground can be worked, once the deep frost is out of the soil. Spinach, radishes, onions, beets, carrots, peas and all those vegetables which can stand attempts to frost. Tender plants, on the other seeding plants, if a warm spell comes in March, and is followed by a cold wave which freezes the ground again. Many do not realize this rich in order to gain the advantage which early plant of the season offers.

Those who wish to minimize the risk may do so by following the rule of weather bureau. Which was the United States, the last killing frost in an average spring is about thirty days before May 1. Many gardeners freeze, which is of course a rare occurrence. Plant on or about April 1 in spring and sow your seed three or four weeks ahead of the last frost record, and you will seldom have any trouble with hardy vegetables or trees.

There are some hardy ones which will not be injured by even temperature does not injure them. The hardy and in some parts of the most important to this class. If you wish to plant lima beans you put in your first hardy seeds, use the smooth seeded varieties. Do not plant the wrinkled.

Plants of hardy vegetables which have been started indoors are likely to be injured by their subsequent transplanting. Cabbage, cauliflower and broccoli are examples. Tomatoes, peppers, eggplant should not be set outdoor until the last danger of severe frost has passed. Seedlings may sometimes be protected from cold by being started outdoors south of your house where spring is earlier and where there is the advantage of early setting out of plants. Where a slight covering is necessary, the plants continue to grow without check while you wait for safe weather.

Early Precaution Tends To Prevent Tobacco Diseases

Precaution is taken at this time will prevent serious injury from bacterial leaf spot, rust, mosaic, and root-rot diseases of tobacco, says specialists out Dr. W. D. Valleau, plant pathologist at the Experiment Station, University of Kentucky.

Seed beds should be thoroughly cleaned out and trash disposed of in a way that it will not be blown into the beds after the seed is planted in plant beds. Such trash may be a source of infection of wildfire and angular leaf-spot.

Tobacco trash should not be used on seed beds as fertilizer, either before or after burning. Commercial fertilizers are more satisfactory. Plant beds should be located a long way from barns to get away from disease trash.

Growers realize the importance of thorough burning or steaming of that weeding will not be necessary. The mosaic disease is spread from the hands of those who chew natural leaf tobacco while weeding the beds. Thorough burning or steaming is necessary also if the same plant bed site is to be used a second time, because it is possible to jury from black root-rot.

Growers in Calloway and Graves counties should prepare to spray plant beds with bordeaux mixture, as the true wildfire disease caused extensive damage to beds in Calloway county last year, and has been present in parts of Graves county for at least two years. This disease has proved injurious in plant beds and to some extent in the field. Spraying with the blackfire common in topped tobacco in wet seasons which seems to be due to abnormal soil conditions.

TAKE CARE OF YOUR LAWNS

1. If lawn grass is thin, make light seeding of bluegrass; 2 to 3 pounds per acre for the average lawn. After seed is sown, roll the lawn with a heavy roller if available.

2. Apply nitrate of soda or sulfate of ammonia about March 15; use 4 to 6 pounds on the average lawn. If possible, broadcast just before a rain.

3. March is a very good time to transplant trees and shrubs. This applies to rearranging plants as well as setting new ones.

4. Some shrubs may have so many old stems that they need renewing. Cut out 1-4 to 1-3 of the old canes, close to the ground. You will lose some bloom this year but you will have a better looking plant next year.

5. Examine flowering plants that bottom of trench about 6 inches deep. Cover the seed about 2 or 3 inches deep, then the soil can gradually be pulled in to fill the trench after the plants have started to grow.

6. Start seed box for flower seeds for plants to transplant to the open as soon as the danger of spring frosts has passed.

7. Sweet peas can still be sown, although many have already planted them. They should be planted in about $6,500,000—including rentals and other relief benefits.

New Spring Printed Silks

40 inches wide, Heavy Pure Silk at only

Luncheon for Three

By HARRIET RAMBO

© by Hughes Newspaper Syndicate WNU Service.

ROSALIND TOWNLEY entered the restaurant, chose a seat at a vacant table by the wall. She was young and pretty and wore a wedding ring. The day was only half done, and already she had explained to scores of amused acquaintances that, no, she was not married, the ring was merely part of a security fabrication. She was determined to eat her lunch in peace, and so she had chosen a restaurant where she did not expect to encounter any of her friends. Surely if she were young and pretty a wedding ring could not prove to be a disturbing element.

A young man, pulling a small child by the hand, entered the restaurant. He sighted the table where Rosalind sat, with its two vacant chairs, and headed for it. He lifted the child to the seat next to Rosalind and chose for himself, the place opposite her.

It was a moment before Rosalind thought to see a father take his baby girl out to lunch.

The child squirmed, displayed dimples, caught sight of the green paper ornaments on one side of Rosalind's smart toilette. "Oh, oo, pretty, pretty," squealed the tiny tot in words. "Dotty hab. Dotty hab," and she extended two grubby paws toward the object of desire.

"Betty, Dotty," the man admonished, affixing a restraining hand to the child's shoulder, but he spoke in vain without effect.

"Pretty, pretty," squealed the dissimilar creature again.

Rosalind blushed or crimsoned; so did the young man's. He seemed to be embarrassed, too. Suddenly she determined her head in the child's direction. "It's not to play with," she explained with a voice just a hostile. See."

But seeing was not enough for Dotty. She uttered a combustible shriek of delight, pushed the pearl with both chubby fists, and tore it from its shade. A general confusion ensued. The young man endeavored to apologize; Rosalind endeavored to straighten her hat; the baby waved the captured trophy triumphantly. From a nearby table, some one giggled. A waiter appeared, deposited two menus, beamed on the child.

"What a cute little mamma's buckle," he said, grinning broadly.

Rosalind's face flamed, and a dull red glow fell over the man's cheeks. Then suddenly he looked up boldly. "What shall we have, Lucy?" he asked her. "Suppose we begin with consommé and broiler for the main course."

"I think that would be a good idea, Ted," she answered, both astonished and thrilled by the grip the stranger took on the situation.

Her answer produced the desired effect. The waiter bowed and disappeared.

"Now, give me the parrot," the young man commanded the child, but the small creature had found the silver bird beneath the table cloth. "I say, I'm devoted," he apologized to Rosalind, and began to search for something in one of the coat pockets. "What! not an adorable husband," thought Rosalind with something like a pang of regret in her new lonely heart. "He's the sort who would do anything for the woman he loves, even take his baby daughter to a public eating place." How did girls discover such husbands?

She was certain none of the men she had ever gone around with were as amiable as the gentleman at the next table—at least not with young children. It was astonishing. Rosalind thought to herself.

Now he was thrusting a small white rectangle in her direction. "I'll make this thing right in any way you say," he said. "You're not going to wish it's nothing, the plucks continue to grow and grow and grow, while you wait for safe weather.

HEADQUARTERS

Mr. and Mrs. Roy Bruce, of Cynthiana, spent the week end with her parents, Mr. and Mrs. A. T. Donahue.

Howard Allison and family spent Sunday with Mr. and Mrs. W. B. Allison.

Mr. and Mrs. Hinton Williamson and son, of Columbia, visited her parents here Sunday.

Mrs. Roy Bruce and children, Mrs. Mabell James and Mrs. Octavia Delaney visited Mr. and Mrs. W. B. Snapp one day the past week and were guests for supper.

Clancy Jones moved the past week to a farm in Harrison county recently purchased by Clarence Robbins, of Wisconsin. Mr. Robbins and family are also moving to the farm.

Mr. and Mrs. Claudia Pyman spent Sunday with his parents, Mr. and Mrs. G. R. Pyman and family.

Mr. and Mrs. Tommie Jones have rented a house in the Allison farm purchased by B. T. Barlow. They have moved in and Mrs. Jones is ill.

Ben Griffin is visiting Turner Donahue and family.

Mr. and Mrs. Turner Donahue are residing with her parents, Mr. and Mrs. Price, after spending several months with his parents, Mr. and Mrs. O. W. Sparks are reported on the sick list. Several have been sick in this vicinity but are reported better.

SPROUT

Robert Hardin, Jr., spent the week end at home with his parents, Mr. and Mrs. Robert Hardin and family.

Mr. and Mrs. Ruby Clark, Dolcie Prints, Mary Rudia Burke, George Burke and Miss Burke and Clyde Clark spent a few hours Saturday evening with Paul and Elvrose Ellington and enjoyed music and cards.

Mr. and Mrs. Jimmie Alexander and baby and Miss Myrle Alexander spent Sunday with Mr. and Mrs. R. B. Hardin and family.

Mr. and Mrs. Hanson Ellington spent several days the past week with Mr. and Mrs. Clarence Burke.

Money in this section has been rather slow so far. Sidney Clay has moved to the Rice Record place, Sam Hing back to his property vacated by Clay; Mr. and Mrs. Silas Perry will move in with Mrs. Ennie Ringo; Bill Sledd will move in the property vacated by Perry. Hanson Ellington to Mrs. Roe Ellington's property on Jordon.

We extend our deepest sympathy to Mr. Tipsey Curry and children in the loss of their wife and mother, Mrs. Nannie Curry. She had many friends in this community who were very sorry to hear of her death.

Mr. and Mrs. R. H. Crews, Mrs. M. D. Judge, Ed and Robert Colliver attended the funeral of Jim Perrett at Hill Top Wednesday.

Mrs. Elva Collins left Wednesday for Cushing, Okla., to be with her sister, Miss Edna Money, who is very ill.

Mrs. R. H. Crews spent Sunday with Mr. and Mrs. John Hall and son near Maysville.

Mrs. Avory Vice is ill at this writing.

Omer Boelling, of Hamilton Ohio, several persons the past week with Mr. and Mrs. Sam Bing and family.

Mr. and Mrs. Sam Bing and son were in Lexington one day the past week.

Mr. and Mrs. Robert Lyons and baby spent Sunday with Mr. and Mrs. Richard Lyons and family.

James Lyons, who has been ill with flu, is some better.

SCRUB GRASS

(J. P. Minton, Correspondent)

Mrs. Jim Bramel and two children and Jay Reinsmith and wife spent last Sunday with Mr. and Mrs. R. T. Bell.

Mrs. Linnie King, of Martin, Ind., spent last week with her sister, Mrs. James Minton.

Mrs. Taylor Bowen, Miss Julie Hill and Bettie Bowen spent Sunday with Mr. and Mrs. Marshall Walton.

John Hollar, of Hookhtown, spent Friday night with Shirley Marshall.

Shirley Marshall has moved to W. D. Hamilton's farm vacated by Ben Hollar and Frank Walton is the place vacated by Mr. Marshall.

Mr. and Mrs. Everett Chaplin and Clara and Mrs. Margaret Minton.

The community extends its sympathy to the bereaved Finch family because of the recent death of the son and brother, Jesse Finch.

WALNUT GROVE

(Mrs. Jas. Mateer, Correspondent)

Mr. and Mrs. Jesse Earlywine spent Sunday with Mr. and Mrs. Joe Mateer and family.

Rev. G. W. Townsend and family spent Sunday with Mr. and Mrs. Arnold.

Ernest Snapp spent a few hours Sunday with Thomas Teadvine and family.

Mr. and Mrs. Thurman Mattox spent a few hours Friday night with Mr. and Mrs. Everett Phelps and family.

Mrs. Joe Mateer is on the sick list.

BANTA

(Mrs. Warden Raney, Cor.)

Mrs. Linnie Edwards and Ada Pullman visited Mrs. Warden Ramey Friday.

Willie Gilbert, who has been confined to his bed with influenza, is some better at this writing.

Teresa Which spent Monday afternoon with Mrs. Willie Gilbert.

William Snapp will move soon to the Ed Hardin property. Jim Butt will move to the house vacated by Snapp.

Mrs. Harvey Wagoner who has been ill is some better.

Harvey Wagoner is on the sick list.

L. J. Dixon visited Harvey Wagoner one day last week.

TAYLORS CREEK

(Nellie F. McDuiah, Correspondent)

This community extends its sympathy to the bereaved Bapp family because of the recent death of their mother, Mrs. Belle Bapp.

Mr. and Mrs. Bascom Banta and family visited relatives in Paris Friday.

Turney Shannon, of Lexington, has returned home after spending two weeks with his parents, who have been ill with the flu. They are improving at this writing. The flu has visited several homes in this community.

Miss Virginia Logan and Mrs. Nelson Peyton were visiting Mr. and Mrs. Elsie Fletcher, Mrs. Fletcher is very ill with sinusitis. Miss Logan will remain with Mrs. Fletcher.

Mr. and Mrs. Reynolds Sparks and son spent the week end with his parents, Mr. and Mrs. G. R. Sparks and family.

Claude Snapp, of Tuscaloosa, Ala. who was called here upon the death of his brother, Jesse Jones is ill and remains in a Lexington hospital.

BETHEL

(Ralph W. Crouch, Correspondent)

A fi Robertson, prominent resident of Bethel, has been appointed as Federal Dropoli Insurance Examiner. Mr. Robertson is widely known as a former banker and farmer. He has formerly cashier of the Bethel Deposit Bank.

We all regret to hear of the bereavement of Tipton Curry of Nicholas county.

The Missionary Society of the Christian church met with Mrs. T. S. Robertson Wednesday afternoon. A very good time was enjoyed by the society with refreshments following.

Mrs. Sam Myers has returned home after spending a few days with her parents in Mt. Olivet.

Mrs. Mollie Rance spent the week end with her parents, Mr. and Mrs. John Razor. She was accompanied home by Miss Lee Ann Rose.

Mr. and Mrs. Scott Robertson and Mr. and Mrs. T. S. Robertson attended the funeral of Gilly Lancaster at Louisville Monday.

On Wednesday, March 7 a snowed, rained, hailed, and the sun shined.

Misses Sarella and June Robertson, Rex and Ralph Crouch attended the party given by Jim and Nelson Gay near Flemingsburg Friday night.

Mr. H. Cline, one of our widely known farmers is moving to a farm in Mason county. The people of this community regret to learn of Mr. Cline leaving.

Mr. and Mrs. James Crouch of Moorefield, have returned home after spending a few days with his parents.

Messrs Russell Boyd, Rex Crouch, Ralph Crouch and Nelson Gay Crouch and Boyd Cannon were visitors in Flemingsburg Sunday.

Mrs. James Hickey, Mrs. H. C. Hamaonds and Miss Catherine Hickey spent Sunday with the sick list.

Mr. Hite and Mrs. Boyd were business visitors in Maysville Wednesday.

We all regret to hear of the death of Mr. William Hawkins who died at his home here at 4:30 o'clock Wednesday morning. Mr. Hawkins was a reliable, honest and well respected citizen of this community. Surviving him is his wife and four children Mrs. Richard Kenney, of Frankfort, Ind.; Walter Hawkins, of Connersville, Ind.; Jesse and Sharpe Hawkins, of Bethel. One sister, Mrs. Thomas Vice, of Moorefield also survives. Funeral conducted by Rev. Frey, of Orangeburg.

The missionary society of the Methodist church met with Mrs. Robert Crouch. As usual, a good program was rendered by the society.

The many friends of Mrs. Ida Gunkle are glad to know that he is out again.

Mrs. James Arnett has been confined to her home here for a few days.

Mrs. Spencer W. Hawkins, Mrs. Elbert Scott and Mrs. Will Luthermeier were guests of Mr. and Mrs. Bookcliff Sunday.

Jim Vice, of Maysville, has been visiting Mr. and Mrs. James Arnett.

MOOREFIELD

Rev. Howard and family have returned to their home here after spending the winter in Carlisle.

Mrs. L. Evans, of Campbellsburg, Ind., is visiting her father, H. T. Blount, who has been sick.

Mrs. Walter Bone and Mrs. Howard Blount attended a semi-annual board meeting of the Women's Christian Missionary Society of The Disciples of Christ at the Woodland Christian Church in Lexington Friday.

Jim Crouch is able to be out and again at the Mercantile Store here.

J. M. Berry was in Louisville the first of the week on business. He is secretary of the new federal bank in Flemingsburg.

The P. T. A. meeting was held at the school house Friday night with Mrs. Charles Whaley leader. Subject, "Mental Hygiene." The girls in Mrs. Hamilton Brannan's room served refreshments.

B. F. Burgess was in Fleming county a day or two on business.

The Doo Doodlers will appear in person at the Moorefield high school auditorium Friday night, March 23 admission 10 and 15 cents. See Mr. Doo with his piano accordion and guitar and Mrs. Doodler in the latest impersonations and watch him swell the size of the Jog.

Miss Marjorie Biggs attended the tournament in Maysville Thursday night.

Miss Martha Lee Berry was hostess to her bridge club Saturday afternoon. St. Patrick's day idea was carried out in the decorations and refreshments. Mrs. Charles Whaley was awarded high score prize and the consolation prize went to Mrs. Howard Irvin.

"Any place that Lon might have gone in this country is 'parts unknown,' feller. Why shouldn't he go some place, if he wanted to? It ain't any of our business."

Bally sighed and shook his head.

He was pretty proud of his deduction, yet he sensed that if he kept on with it Sol might confuse him with a lot of fool questions.

Sol had a way of considering facts and people's reputations and disposing of them that was sometimes annoying.

"Anybody that knows Lon as well as Bally had only a vague knowledge as to its meaning.

Bally went outside to smoke a cigarette and let Sol go over the situation alone.

Usually when Sol went over things alone he was pretty successful about reasoning out an explanation to a problem mystery.

Bally had hardly got seated—had not, in fact, located his package of tobacco—when he heard hoofbeats coming up the canyon.

A horseman bore in sight, and even at that distance the deputy recognized Lem Bullinch.

Lem Bullinch was a little disturbing. Bally wasn't ready to accuse the man to his face; nor did he care about doing so, but he was that his, Bally's, the cry was blown to pieces by observing that Lem wasn't riding in "parts unknown."

And so, in order to prevent causing any embarrassment to himself and Sol —when Lem, Bally grasped down the canyon and waylaid Mr. Bullinch 100 yards from the cabin.

"Hello, Bally," said Lem.

"Was ridin' past and I thought I'd inquire about the Jigger who shot his self. Anything I can do?"

"Nope."

Bally shook his head determinedly.

"Nope, you best ride right along Lem. Sol's making an investigation. He's pooled me unable to find out any curious folks who might know Jigger personal."

Lem looked at the little deputy and shrugged.

"O. K. Didn't intend to butt in none. I'll be lookin' along."

"Best thing," Bally agreed.

A hard breeze, Lem ordered his orders. See you later."

Bally waited until Mr. Bullinch was out of sight, and turned back toward the cabin. Sol was not in sight.

Now he could still substitute that idea was a good suspect and not have to admit to Sol that his theory was entirely absurd.

Sol came to the door as the deputy approached the cabin.

"Lem was here, eh?" Sol asked.

Bally felt out his chest a little, swaggered a little and gestured rather grandly.

"Because," he said, "this Jigger was shot in the eye right through his left hand. And a left-handed guy couldn't shoot himself in the right temple."

"Hmum," said Sol. "Left-handed, eh? How do you know?"

Bally's eyes glowed.

"How do I know? Because I'm a deductor, that's how I know. I went through the Jigger's pockets an' I found a bunch of keys and a handful of change and a couple of other things in his left-hand trousers' pocket. That's how I know. The Jigger was a right-handed carries things like that in his right-hand trousers' pocket."

Sol contemplated this.

Without a word he accepted it, rather slim evidence, but nevertheless not to be ignored.

It was true that a man who carried his change in his right-hand trousers' pocket, as a rule, carried other valuables in the same manner.

Sol said: "So what?"

That was a case of Bally's eyes provoked by the thought that Sol might question the soundness of his deduction, instantly vanished.

"So plenty," he said.

"Who was it discovered this Jigger lying here?" Sol asked. "Was it you with the news an' then lit out for parts unknown? It was Lem Bullinch, wasn't it? A Jigger with four eyes an' me is well acquainted. Sure, and what is it we know about this Lem Bullinch that is different from other Jiggers? What is it, feller?"

"He's left-handed," Sol admitted.

Bally's eyes were getting ill, feller. Lem's left-handed. So what? So he happens right here yesterday, finds this Jigger has made a strike, invites himself inside for a snack to eat—and bang! The Jigger's dead.' Lem's got enough brains to know a long range shot is on the table here, an' then rides to town with his story. Sounds like a pretty reasonable enough," Sol confessed.

"Except for the fact that Lem ain't the kind of Jigger would kill a man for a pot of gold or two pots of gold. You know that, an' so do I."

"Unknown," Bally said promptly. "Lem had a brainstorm when he seen the Jigger. It's a Jigger with four eyes 'em sometimes. An' if he ain't guilty, he'll be back to see if he can help us known?"

Sol laughed at this.

ISHMAEL

Mr. and Mrs. Ollie Rigg spent Sunday with Mr. and Mrs. John Barnes.

J. W. Alexander and family motored to Maysville last Monday.

Miss Lennie Hilmand and Earl Bowen were the week end guests of Bruce Cleaver and family at Little Rock.

Mrs. Matilda Gillispie spent one day the past week with Mrs. John Harbeit.

Robert George, wife and baby spent one night with George Clay and family.

John Barnes is on the sick list.

There will be preaching here next Sunday morning and night by regular pastor.

Text flights of the miniature rocket ship built by a German. Ernest Loeser, which he hopes to get in several hours of sound sleep while the truck is making repairs with his load. Lucky chancing off, the men get their rest, while the truck plies the miles.

GOOD CHARACTER

(Hickman Courier)

It sometimes seems as though our modern machine age has lost sight of the fact that the fundamental base of all human progress is the good character of our citizens. For almost 100 years we have been gradually getting away from the emphasis formerly laid on right thinking, right living, common honesty, justice and mercy. We have been saying that technical ability could be depended upon to save us, that science was superior to morals and that business success was its own guarantee.

But look at our record. Twelve thousand murders, three thousand kidnapping, five thousand cases of arson, fifty thousand cases of theft or burglary and one thousand cases of assault; that's our crime record for last year, just to mention a few of the more serious offenses. The cost has been figured at fifteen billion dollars a year—five times as much as it takes to run the federal government, four times as much as it takes to run all our schools and colleges and universities; enough to pay off the national debt in two years.

We maintain a veritable army of police, prosecutors and peace officers, without noticeable progress against lawlessness. We maintain the most expensive educational system in the world, but without improving the social attitude. Our mountain of law and complicated judicial system, our improved prisons and reformatories, our attempts to make over men, have accomplished little or nothing.

Other and presumably less progressive countries enjoy a freedom from violence which we have not been able to achieve. We have 10 murders per capita to England's one and our record of home invasion is equally bad, if not worse. In spite of all her trouble and consequent poverty, Russia is to guarantee the average citizen much better protection than we can.

We cannot escape the fact or ground that we are a young country for Canada is just as young, but Canada suffers from no such degree of crime as torments life and obstructs business on this side of the border.

It sometimes seems as though we cannot do anything straight, that a fundamental streak of dishonesty, selfishness or pure cussedness inflicts our every enterprise. Tales of graft, and corruption in high places bring a laugh. Here is the CWA, a measure of relief, a program designed for no other purpose than to help the unfortunate out-of-work citizens, and it is suffering from charges of graft, favoritism, nepotism and crooked politics throughout the country.

Some day we are going to wake up to the fact that there is no substitute for common honesty, the kind you build into children by training them to realize that there is such a thing as conscience. Some day we are going to discover that all these technical attempts to make men good by social registers, character bookkeeping and check-up systems, just do not work. Some day we are going to find out that we cannot make people good by law. Some day we will be forced to admit that good character is man's only hope and that if we don't produce the right kind of human beings you might as well throw everything else out the window.

PEACH CROP KILLED

A bulletin from the Kentucky Horticulture Society says:

It seems quite evident that the subzero weather of the last days of February destroyed the peach crop of Kentucky. Some damage had resulted from the low temperatures in January, especially in eastern Kentucky, but from such evidence as we have at hand there seems but little doubt that few if any peaches will be produced in our state this year. It is possible that in those areas where protected to enable them to live through cold, with no further extremely cold weather, will produce fruit, but where no are favored it is likely that there will be blooms and consequently there will be no fruit.

The annual cost of crime in the United States amounts to more than $12,000,000,000.
