HENRY L. CARTER, Cashier.
Sworn to and subscribed before me this 3rd day of April, 1935.
Harry Kennedy, Notary Public. (My Commission expires May 2nd, 1935.)
Correct—Attest: J. M. BERRY, H. T. LETSON, B. F. REYNOLDS, Directors.

Are You Undecided?

PERHAPS you and your family have given serious thought to having a telephone in your home, but are not quite sure you really need it.

It is a matter which concerns everyone in the family. Think how much a telephone would help Mother with her shopping and household duties, and how Father would find it handy in many ways. The young folks too, would use it frequently in arranging social activities with their friends.

In addition, a telephone assures you prompt assistance in emergencies and quick personal touch with friends and relatives both in and out-of-town.

When you sum up the many advantages of telephone service, compared with the small cost of only a few cents a day, you will probably decide it really doesn't pay to try to do without it.

Order your telephone today. Your friends will be glad to know you have one and every member of your family will enjoy it. Just call the telephone business office.

IMPROVED UNIFORM INTERNATIONAL
SUNDAY SCHOOL Lesson

(By Rev. P. B. Fitzwater, D. D., Member of the Executive Committee of the Moody Bible Institute of Chicago.)
(©, 1935, Western Newspaper Union.)

Lesson for April 14
CHRIST THE SAVIOUR

LESSON TEXT—John 3:14-17; Romans 5:6-10; Philippians 2:9-11.
GOLDEN TEXT—For God so loved the world, that he gave his only begotten Son, that whosoever believeth in him should not perish, but have everlasting life. John 3:16.
PRIMARY TOPIC—Why Jesus Came.
JUNIOR TOPIC—Jesus the Saviour.
INTERMEDIATE AND SENIOR TOPIC—What It Means to Be Saved.
YOUNG PEOPLE AND ADULT TOPIC—How Christ Saves Us.

It is not feasible to consider all the texts proposed by the lesson committee, but it is desirable to select the three suggested to be printed and to introduce several others.

I. **The Saviour Predicted** (Gen. 3:15; Isa. 9:6, 7).

In connection with the fall of man and consequent pronouncement of judgment upon the woman, the man and the serpent, and the announcement of the sacrificial system which was to exist between the seed of the woman and the seed of the serpent, ultimate victory was predicted of the woman's seed. On the cross of Calvary the strike was made which crushed the death sentence (John 12:31; Heb. 2:14). In the time the ultimate ruler of the world will be displayed by the coming of the king and the establishment of a universal and everlasting kingdom.

II. **The Saviour Born** (Luke 2:11, 30, 32).

That which had been predicted was historically fulfilled in the birth of Jesus Christ in Bethlehem. When Jesus was brought to the temple as a child the Holy Ghost through Simeon that Jesus was the Messiah.

III. **The Saviour Rejected.**

1. A seeker of the lost (Luke 15:5-7). This seeking of the lost is illustrated by the man leaving the ninety and nine sheep and going after the one which was lost, and by the woman and her success in finding it. Great, indeed, is the joy in heaven over the salvation of a lost soul.

2. He died for the lost (John 3:14-17). God gave Jesus Christ to be made an atonement for the sins of the world. As the brazen serpent was lifted up in the wilderness by Moses, so Jesus Christ was lifted up on the cross. As the Israelites only needed to look at the uplifted serpent, so the lost soul needs only to look to the crucified Christ for salvation. All who believe on him in their faith receive eternal life and, therefore, escape condemnation.

3. He knows his own (John 10:14). The good Shepherd has personal knowledge of the lost ones. He therefore seeks them out and gives his life for them.

4. He keeps his own (John 10:27-29). Believers are Christ's sheep, and because they are his sheep, they hear his voice and follow him. He not only knows them personally, but they, in turn, know him. He not only gives unto them eternal life, but holds them in his omnipotent hands.

IV. **Some Blessings Received Through the Saviour.**

1. Justification (Rom. 5:1-11). The one who receives Jesus Christ is by the living God declared righteous and his guilt is removed and he is given the same standing as Jesus Christ himself. Because of this, the very peace of God settles down upon his soul. He has the assurance of God's love and is able, therefore, to have joy in God himself.

2. Freedom from the power of sin (Rom. 6:1-7). It is not enough to be freed from the guilt of sin, there must be a dynamic which will enable the believer to live a life of victory over sin. Being nicely united to Jesus Christ in the power of his resurrection this the dynamic is provided which enables the believer to triumph over sin.

3. He is free from the law as a means of sanctification (Rom. 7:1-6). Christ's death nailed the law to the tree. The one who has been vitally united to Jesus Christ by faith died with Christ. The law, therefore, has no more dominion over him.

4. Victory over the flesh through the indwelling Holy Spirit (Rom. 8:1-4). The introduction of the law of the spirit of the life in Christ Jesus enables the believer to free himself from the dominion of the flesh.

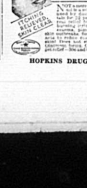
5. Christ is the supreme example to the believer (Phil. 2:5-11). Because the Saviour became incorporated with the race through the incarnation he is able to impart life to those with whom he is identified. Furthermore, because he thus imparts life, the believer is able to make the Saviour his grand exemplar.

The World's Three Evils

The three great evils of the world are impurity, inequality and selfishness. The world doesn't know the character of God, therefore it is unclean. The world does not know the love of God and therefore does not love brothers. The world does not know the life of God, therefore men despair of life at the present and the future.

Goes Deeper

Religion does not prescribe nor is satisfied with such courtesy as goes no deeper than words and gestures.



HOPKINS DRUG CO.

THE GARDEN

BORDEAUX MIXTURE

(By John S. Gardner, Kentucky College of Agriculture.)

Bordeaux mixture is useful now in controlling the spreads of black fleabeetles that annually attack the seedlings of almost all the vegetables. Later, it will serve in controlling the various leaf-spots, to which so many of the vegetables are liable.

Bordeaux mixture is a combination of blestone, lime and water. Because it consists of three ingredients, its making is generally considered as being complicated, but this is not necessarily so. An easy way for a gardener to make Bordeaux is to use the prepared form that comes in powder or paste from which it is necessary merely to stir into water, but a better product results from making it of its original ingredients. A difficulty has been that several containers were needed, but this is largely removed by using the tank of the sprayer to do the mixing. Another difficulty has been the computing of, and the weighing-out of the ingredients that go into the spray. This is alleviated by adjusting the stock solution of blestone so that it may be measured with simple apparatus.

The generally used strength of Bordeaux is 4-4-50, or 4 pounds of blestone, 4 pounds of lime (4 of the hydrated form) and 50 gallons of water. The type of sprayer is most universally used in gardens is the 3-gallon compressed-air sprayer whose spray-capacity is 2 1-2 gallons. To make 2 1-2 gallons of 4-4-50 Bordeaux mixture, use the following in the procedure.

In advance, prepare a blue-stone stock solution by dissolving one pound of blestone in 5 quarts of water. A container other than metal should be used, for this material consumes all metals except brass. Blestone dissolves without any attention, by putting it in a cloth suspended over the water in such a way that just its tip is immersed.

Now, in the tank of the sprayer, put 3 quarts of water, pour in one quart vase a milk bottler of the stock solution and rock the sprayer to mix. Then, put in a generous half-pint of the hydrated lime, passed through a fine screen, add the sprayer and shake it endwise 12 times. The 2 1-2 gallons of 4-4-50 Bordeaux is ready to use. The balance of the blestone stock solution may be kept in perfect condition in a closed container, a corked jug for example, until further occasion for making more Bordeaux mixture. Care if it is desired to add arsenical to make the Bordeaux an all-purpose fungicide-insecticide, arsenate should be added, stirred into water, part of the nine quarts to make a thin paste, before the lime is added.

Lead arsenate is always better if allowed to stand for a day after it is cooked and reheated just before serving.

Left-over boiled rice can be seasoned, rolled in egg and crumbs, shaped into cakes and when browned in a little fat they make a tasty food to serve as a potato substitute.

Never hang a fur coat which has been worn in a moistern near a radiator. Intense heat injures the skin. First remove the moisture by airing, then hang the coat in a cool place where it will dry.

Says Efficiency Is Needed In Homes

Methods of scientific management that increased the efficiency and output of factories and farms should be applied in homes, thinks Miss Ida C. Harmon, home management expert for the College of Agriculture, University of Kentucky. She urges house wives to give more attention to finding the best and shortest ways of doing their various jobs.

Says she: "Routine tasks, such as dishwashing, table setting, bed making, caring for milk, cleaning and filling lamps, and home laundering, lend themselves to standardization."

Miss Harmon, who has spent years trying to take the humdrum out of housekeeping, declares that satisfactory homemaking is a complex undertaking that challenges ability, skill and intelligence.

"The homemaker has four tools at her disposal, namely, time, energy, money and thought. The manner with which she uses the fourth tool determines the effectiveness of the first three.

"The homemaker directs her own work and therefore has a great freedom of choice and responsibility in deciding what work shall be done and when it shall be performed."

Simplicity is certain it is complexity that is to be avoided.

Always after the sprayer has been used it should be washed out thoroughly, especially if the tank is made of galvanized iron, for the bluestone will soon corrode it. Use water for the job, but if there is much lime to be left in the sprayer after washing, it will be easier to remove the lime if a little vinegar is added to the water.

My Neighbor Says:

Windows may be quickly and easily cleaned if rubbed with a woolen cloth that has been wrung out of hot water and moistened with kerosene. Polish after a few minutes with chamois.

Vegetable soup is always better if allowed to stand for a day after it is cooked and reheated just before serving.

Tobacco Seed No. 5

THE BEST SEED TO USE on any soil or location in the White Burley Belt. This type will produce more high grade smoking tobacco than any other tobacco. I have this seed in 1 oz. and ½ oz. packages.

HANNA'S CHINO-GLOSS ENAMEL

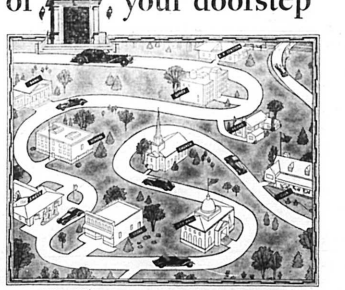
HANNA'S CHINO-GLOSS ENAMEL is made in practically all of the colors you could wish for . . . and what beautiful colors they are . . . so flawless . . . and so perfect in tone.

It is a real pleasure to finish furniture, walls and woodwork with this famous enamel . . . It goes on easily and dries, ready for use in a few hours, to hard, smooth, lustrous finish stays beautiful even after repeated washings.

You are certain to find just the color you want, as you have eighteen Chino-Gloss colors from which to make your choice.

BROS. & FISHER

You do 80% of your driving within 25 miles of your doorstep



This Stop-and-Go driving wastes your money if your gasoline hasn't *Three distinct Kinds of Power*

THE average car today is continually DASHING BACK AND FORTH within a few miles of home—starting . . . stopping . . . warming up—time after time.

This calls for 3 kinds of power in your gasoline—POWER for quick starting, POWER for acceleration, POWER for steady runs. Unless you have these three types of power—and unless they are in PERFECT BALANCE—you're wasting money.

Super-Shell can give you these 3 types of power—and can cut your driving costs 3 ways—for Super-Shell is the *first truly balanced gasoline*—

SUPER-SHELL saves on today's Stop-and-Go driving

Can save up to a cupful of gasoline on every "Cold" Start. Super-Shell starts instantly—often warms up in *half* the time of ordinary gasoline!—with less wasteful *choking*.

Can save up to a cupful of gasoline in 10 Minutes of Hard Pulling. Because of Super-Shell's even volatility, you can accelerate rapidly, or race your car up steep hills—on *less gasoline*, without wasteful *knocking*.

Can save up to a cupful of gasoline in One Hour of Steady Running. Every drop of Super-Shell vaporizes more completely at *every* engine temperature. So it saves on long runs, too.

THESE THREE BIG SAVINGS of gasoline naturally result in more mileage per tankful! Try Super-Shell today . . . *at no extra cost!*

APRIL POULTRY POINTERS

Buy Tested Chicks—Buying chicks from blood-tested parent stock is one of the most important things poultry raisers can do, notes C. F. Harris, in his "Poultry Pointers for April," issued by the College of Agriculture, University of Kentucky. Chicks that are capable of living and laying for 10 to the best advantage come from healthy, we-bred stock.

Use Clean Brooder—Use a clean, comfortable house for brooding. Scrape, sweep and wash the house with hot lye water. Apply boiling lye water to floor and walls and scrub with a broom. Be certain the brooder, feeders and watering utensils are clean.

Allow Enough Room—Ample feeding and watering space is important. Chicks will not mature as rapidly as they should and more culls will result if they are crowded. Cannibalism also may result from crowding.

Clean Ground Necessary—Too much emphasis cannot be put on the use of clean ground or range. If this cannot be had, then a sunporch should be built on the sunny side of the brooder house, where the chicks can be kept off the ground.

Clean Pen As Soon As Empty—Roosts should be ready when the chicks are three to four weeks old. Getting the chicks on the roosts early helps to prevent losses from crowding, and also lessens the number of culls. Chicks will soon learn to use roosts if they are placed near the floor.

Clean Laying House—House-cleaning time is here for the old flock. Clean and spray the laying house and rid it of lice and mites. This includes changing nesting materials. It also may be well to do some culling.

FEELING UNDER PAR?

Winter sure are weak in vitality. Winter winds are harsh. And if you let your system become "run-down," then a few dreaded energy lying in wait for you in every crowded place. Everyone gives that a ready prey in those who are physically under par.

Keep your summer strength and vigor right through the winter. Build up a sure, pleasant way to increase vitality and build up resistance against colds with Scott's EMULSION WITH VITAMIN CONCENTRATES OF COD LIVER OIL.

These tempting, chocolate-coated tablets give you abundant supplies of the protective vitamins A and D. And they are the only vitamin concentrate tablets containing the needed minerals, calcium and phosphorus.

Each tablet brings you all the vitamins in one teaspoonful of U. S. P. Reviewed (1934) Cod Liver Oil. 75 tablets, 60 cents. Protect yourself with the vitamin way, with one of these tablets daily. A 21 bottle holds 100 McKesson's VITAMIN CONCENTRATE TABLETS.

Oliver Wendell Holmes

By LEONARD A. BARRETT

Another great statesman-soldier-jurist friend has passed on. Oliver Wendell Holmes, son of the distinguished poet whose name he bore, was born in Boston in 1841. He won his A. B. degree from Harvard university and from the same institution received the LL. D. degree. Yale, William, the Universities of Berlin and Oxford, conferred upon him the same degree. In 1872 he married the daughter of a very influential family in Cambridge, Mass., Miss Fanny Dixwell. She died in 1929. They had no children.

Justice Holmes was a patriot. He was wounded in the breast at Ball's Bluff in 1861, and was later wounded in both his neck and foot. He was mustered out of the army in 1864 with the rank of captain.

Justice Holmes began his career in law in 1867, was made professor of law in Harvard, later became Justice of the Massachusetts Supreme court and in 1902 was made associate Justice of the Supreme Court of the United States. In 1932 he resigned. In point of service he was the oldest man who ever sat on the bench of the Supreme court.

Justice Holmes had an unusually large capacity for friendship. He was frequently in company with his close friend, Justice Brandeis, with whose wife we often seen walking arm in arm. It was said that the two friends were inseparable. Much has been written concerning Justice Holmes' philosophy of life. Among the many salient points are, "a man must face the loneliness of original work." Another is that "no man's work is done so long as there remains power to do the work." He had to desire for early retirement, preferring the life of service rather to one of ease. Another guiding principle was that, "no task was great in itself. It became great when conducted with a great spirit." In a letter to a friend he said, "Life is a romantic business." It is painting a picture; not doing a sum, but you have to make the romance." That sentence seems to express the spirit of the great jurist.

© Western Newspaper Union.

Points To Remember When Buying Meats

(Kentucky College of Agriculture.)

Meats should be purchased for a definite purpose and ordered by cut. Meat should be practically odorless, firm and velvety in its appearance.

A dark red color indicates a tough cut of meat.

Hard, white, flinty bones indicate the carcass is from an old animal.

The most tender cuts are along the back, between the shoulders and the rump and include the ribs and loin.

The muscles which are exercised most, such as chuck, rump, round, neck and shank, are less tender than less exercised muscles.

Meat which contains a large amount of bone, gristle and fat has a high per cent of waste and may be more expensive per serving than other cuts, even though lower in price.

The less tender cuts can be made palatable by proper methods of preparation.

Tender cuts should be purchased for oven roasts and broiling steaks.

Pork which has a large proportion of fat has a high percent of shrinkage.

Very fat cuts of meat are greasy after cooking and difficult to digest.

Steaks cut from the less tender region of the carcass should be thin. The fat surrounding a cut should be hard and brittle.

Yellow fat on beef indicates the carcass is from an old beef. The lowest priced cuts are not always the most economical.

THE FARM AND HOME

(Kentucky Agricultural Experiment Station.)

With increased demand and higher prices, many farmers are planning to raise mules and work horses. Good work stock is bringing the highest prices in years, and a shortage is apparent in many regions.

Heat is important in brooding chicks. Have the brooder comfortable at all times. Confine the chicks around the brooder at night, and shut off the corners of the brooder house to keep the chicks from piling on them and injuring one another.

Grubs in the hearts of cattle can be squeezed out, or they can be killed by dosing the animals with derris powder, rubbing the powder into the nose made by the pests. If not destroyed, the grubs will hatch into heel flies.

Persons interested in producing clean fruit by spraying should write to the College of Agriculture for information. Leaflets are sent out giving information about spraying peaches, cherries, apples, raspberries and plums.

The hatchery code established under the AAA does not attempt to fix the prices of baby chicks. Production costs vary because of differences in egg prices, efficiency of hatcheries, quality of chicks, etc.

Wheat adjustment contract signers who sowed an excess acreage, expecting to pasture it this spring and then plow it under, now are permitted to mature and harvest it, provided they agree to make additional reductions in their 1936 wheat crop.

Burley Acreage To Be About Same As Last Year

The monthly review of the farm situation in Kentucky, issued by the department of markets and rural finance at the College of Agriculture and Experiment Station, says "reports of farmers intended plantings in 1935 indicate that about the same acreage of burley tobacco will be grown as in 1934."

Growers of eastern fire-cured tobacco intend to about maintain their acreage in 1935, while most early and growers of western fire-cured tobacco plan to increase their acreage about 11 per cent. This increase would bring the acreage of western fire-cured tobacco back to the 1932 level.

Growers of Henderson stemming tobacco are planning 23 per cent more acreage than in 19324 and 16 per cent more than in 1932. "Such an increase hardly seems justified under existing conditions," the college's report declares.

The statement also brings out that growers of one-fire-cured tobacco have not granted some increase in production and have reported intentions to increase acreage by about 22 per cent.

BATTLEGROUND STOCK FARM
Belgium and Saddle Stallion and Jack
Also horse breaking at a low price
O. O. McCONNELL
R. 2 Mt. Olivet, Ky.

The percherom stallion
MACK
will make the season of 1935 at my barn on Locust Grove pike, and will insure a living colt. Mack is 16½ hands high, weighs 1,400 lbs., red sorrel, 4 years old.
Money due when colt comes, mare parted with or need to other stock. Care taken to prevent accidents, but not responsible should any occur.

READ ABOUT THE REEDS

(Lexington Herald)

Take it from us, the Reed family has been cutting a wide swathe in Kentucky news recently.

First, Stanley Reed, of Maysville was appointed United States solicitor general. J. A. Reed, of Smith Grove, recently was appointed to the state highway commission, and McKay Reed, of Louisville, was named head of the Kentucky state insurance department.

Last Tuesday, J. D. Reed, of Wilmore, disappeared mysteriously.

To cap the climax, former Senator Jim Reed, of Missouri, addressed the Kentucky state bar meeting at Louisville yesterday.

YOU have heard a lot about the new Comfort Zone Ride of the Ford V-8 for 1935.

It took a major engineering development—the Full-floating Springbase with Comfort Zone Seating—to make an automobile that gives *every passenger* the comfort of a "front seat ride."

But remember this. You get a lot more than new riding ease in the new Ford V-8. This is a car of major development throughout.

Here is the 85 h.p. Ford V-8 engine—already proved by more than a million users to be the most dependable and powerful engine Ford ever built.

Here is the economy for which Ford has been known for 31 years. You get low first cost—*plus* the greatest operating economy in Ford history.

The 1935 Ford V-8 gives you new roominess. It gives you beauty in the finest sense of the word. It gives you new, easy-operating brakes and clutch. You get safety glass all around *at no extra cost.*

Name what you would want, if price were no consideration. Then see the new Ford V-8. You will agree—it has everything you need in an automobile today.
