NAMING THE FARM

(Hardin County Enterprise)

Use of a farm name often becomes a contagious spirit in a community, and after one farmer puts his name on a barn others follow suit. Community pride develops and many a farm comes to advertise itself and its community rather than some brand of this, that or the other thing not associated with the farm. Some communities in the State have come to distinguish themselves in this way. For instance there are such names as Wayside Fruit Farm, Rosslawn, Maple Lawn, Evergreen, Red Ridge, Sunny Brook, etc., often with the owner's name in connection. Both use of a farm name has many advantages. It can be painted on the farm truck and used on the labels of farm products, such as fruit or milk. It can be employed on letterheads and on bank checks. It lends dignity, too, for people like to patronize and do business with anyone who conducts his affairs in a businesslike way.

FULL MOON ACROSS THE FRESHLY FALLEN SNOW

Full moon across the freshly fallen snow,
Painting in stretching shadows on the white,
The duplicate of trees;

Drawing the intimate tracery of the twigs
And winter buds perfect upon the covering
Of snow that stills the world,
Beneath the stars!

Full moon—that lights ns every dazzling line
Of windswept drifts standing in knot and layered mass,
Still mobile to the wind;
Across the drifts, full moon!
—Maud Slye, in "Songs and Solaces," (Boston: Stratford.)

EXECUTOR'S SALE

Of the Business Property in Carlisle, Ky., and Improved Farm of 30 Acres Adjoining City of Carlisle, Ky.

As Administrator with the Will Annexed of John T. Sims, late of Nicholas County, Ky., I will offer for sale in Carlisle, Ky., in front of the premises at public auction, on

SATURDAY, FEBRUARY 9th

At 1 O'Clock P. M.

certain brick business property, located on the south side of Main street, known as "Mozart Hall Building," containing two business rooms on the first floor, now occupied by R. W. Neal and R. L. Burton, and the second floor occupied by same, the entire building being in good repair and now leased to two good tenants for 1935 with privilege of 1936.

TERMS: 10 per cent cash on day of sale, 23 1-3 per cent due when deed is made and possession given, which shall be on or before the 1st day of March, 1935, and the balance in two equal annual payments, bearing interest at 6 per cent from date of possession; or the purchaser may pay all cash, if he so desires.

The purchaser will pay the taxes against said property assessed as of July 1st, 1934, for the year 1935.

SECOND: Immediately after the above sale, I will offer on the premises the home of the late John T. Sims, located about one-half mile south of Carlisle, Ky., on the Upper Jackstown pike, and the farm consisting of 30 Acres, more or less, which has upon it a two-story, eight room dwelling house, with all modern conveniences, stock barn and garage combined, 6 Acre tobacco barn, and other necessary outbuildings. The buildings and fences are all in first class repair, and the land is in grass, and not a bit of it has been in grass for years.

TERMS: 10 per cent cash on date of sale; 40 per cent when deed is made and possession given, which shall be on March 1st, 1935; and 50 per cent due one year from date of deed, note to bear 6 per cent interest from given date, or the purchaser may pay all cash, if he so desires.

Purchaser to pay the taxes against said land assessed as of July 1st, 1934, for the year 1935.

ALSO AT THIS TIME AND PLACE WILL SELL: 1 Iron safe; Some farming implements; Garden and fencing tools; and other small articles. For further information call upon the undersigned.

J. W. PARKER
Administrator with the Will Annexed of John T. Sims, Carlisle, Ky.
Sale conducted by Scott-Kendall Sales Co. "It Makes A Difference"

High School Doings

Future Farmers Win Prizes

The Future Farmers cooperative poultry show and sale was held at the Home Warehouse in Maysville, on January 26th. There was a total of 12,589 pounds at an average of 25c per pound. The twelve boys participating were: Julian Atkinson, Oval Day, Maxwell Burden, Frank Woodall, Marion Lee, Clay Mann, William Hilander, Carl Ishmael, Marion Donovan, Edward Lawson, James Wood and Alton Kerns. Besides the prize and their tobacco a total of $111.60 prize money was awarded.

News Notes

The Sixth Grade has on display in their room this week a project on Switzerland.

Mr. Fightmaster, music instructor, announced at last band practice a contest with the aim to secure new music students. Only present music students will compete.

Strictly fresh cream candy, buttered popcorn and crackerjack, made by the 4-H Club girls are being sold at the basketball games. The money is to be used to buy sewing room equipment and help defray the expenses of our contestants at the annual Junior Week. Your patronage would be much appreciated by this club.

Sophomores Hold Party

Tuesday evening, January 29th, the Sophomore class held a card party in the high school gymnasium. They were chaperoned by Mrs. Shearer and Mrs. Pfanstiel. After many entertaining games, refreshments of Rock and Hearts, refreshments were served and the gathering broke up.

The entire class is grateful to Mr. Shearer for having arranged the entertainment, and are sorry that he could not have been with us at the party.

Ninth Hour Class

The much heralded and long-awaited ninth period has arrived with all the pomp, ceremony, and applause due an institution of its rank. This celebration period is held for the benefit of those who first these who have unfavorable conditions for study in the home; second, those who cannot find time for home study; and third, those who because of absences or some other cause need to do the work in order to catch up with the class. Since some pupils are sometimes "invited" to more than one class in an afternoon, our superintendent has set aside for each day a certain class of subjects which the pupil must attend. For instance, Monday afternoon is devoted to mathematical subjects; Tuesday to English; Wednesday to science, etc.

So, if Johnny doesn't "come marching home" at three-twenty just be aware of the fact that he has been privileged to attend the ninth hour class and won't be home till four-fifteen. Anyway the first session must have been a success for 87 pupils stayed for the extra work.

Personals

Lola and Paul Vinson, who have been absent for two weeks, have returned to school. Lenore Mitchell has also returned after an absence of several days.

Powell Neal, who was ill at his home on Henry street for several days is now back at school.

Dorothy Curry entertained her bridge club at the home of her parents, Mr. and Mrs. D. M. Curry, on Tuesday afternoon.

Several alumni have visited the school in the past week. Edward Saunders, Edgar Saunders, Irene Hamilton, Julian Atkins, former students of the University of Kentucky; Ellen Burton Lee, former student of Centre College; Virginia Ross, of Transylvania, visited at school Friday.

Reviews Steps In Corn-Hog Program

A simplified corn-hog adjustment program has been worked out for 1935 by the secretary of the U. D. Phillips of the College of Agriculture, state director of the program.

The reduction this year will be 10 per cent in hog numbers from the average production of 1932 and 1933 and from 10 to 30 per cent reduct on in corn acreage from the base period. There will be no restrictions on the use of land taken from corn production.

Participating farmers will receive $15 a head on the number of hogs represented by the 10 per cent reduction, and 23 cents a bushel on the estimated yield of corn on the land taken out of production.

The first step necessary for farmers to participate in the new program is to sign an application. The contracts of producers who participated in the 1934 program, and who will operate the same farm in 1935, will be based on the adjusted figures for the new corn base, and a third of Lenoir's reduction now has been.

This method is expected to basis the basis of the contracts with producers who did not take contracts in 1934 or who did not have a corn base because of the small size of a farm or for other reasons. Producers will be required to live such sheets and records as may be necessary to the administration of the program.

Cultivated crops will include the corn, wheat, cotton, tobacco, rice, grain sorghums, and sorghums for sirup, peanuts, soybeans and cowpeas for harvest as beans, Irish potatoes, sweet potatoes, and truck crops.

Those who did not take contracts in 1934 or who did not have a corn base because of the small size of a farm or for other reasons will be required to live such sheets and records as may be necessary to the administration of the program.

Cultivated crops will include the corn, wheat, cotton, tobacco, rice, grain sorghums, and sorghums for sirup, peanuts, soybeans and cowpeas for harvest as beans, Irish potatoes, sweet potatoes, and truck crops.

Less Livestock Lowers Corn Need This Year

The normal likelihood of overproduction of corn after a year of drought and short crops, probably will be increased this year because large reductions in livestock numbers have reduced requirements for corn, says the corn-hog section of the AAA.

Corn requirements for 1935 will be materially below the level of those in the past several years as a result of an adjustment of more than 20 per cent in hog numbers and a reduction of more than 15 per cent in cattle numbers since a year ago.

These changes in livestock numbers alone account for the equivalent of at least 15 million acres of corn, or from 20 to 25 per cent in production requirements. Without a control program, nonthey burdensome surplus of corn would be created next year.

The 1935 corn-hog program, expected to be signed up by the corn growers who voted in the October referendum, offers farmers a way to particular for co-operative control to hold the production in line with effective demand and for sharing with the resulting benefits through the plan. The for optional corn acreage reductions of 10 to 20 per cent below the base acreage with benefit payments of 25 cents per bushel.

It is recognized that a moderate surplus of corn over actual requirements would be desirable in 1935 in order to rebuild reserves now being used on account of the drought shortage. The 1935 program is designed to provide the rebuilding of this moderate surplus but, because of the adjustments in livestock numbers, the necessary crop can be produced on an acreage smaller than the 1932-33 average acreage, which is the base acreage for both the 1934 and 1935 programs.

ECONOMY IN FEEDING

One way to cut the cost of feed for chickens is to build roofs on all feed troughs that are in the open. Then sudden showers cannot dampen the mash, cause it to mould, and ruin into your poultry profit by unnecessary waste that ever money.

Have the tools move on hinges on the top of filling the troughs will still be an easy area, but see to it that enough overhang is used so as to fully defeat your object.

This roof will keep the chickens from fouling their mash with droppings. This should cut down the mortality of your flock.

Baffle cards should be added by boring holes in the ends of the troughs, inserting a rope and tying the ends in a knot that is large enough to keep the baffle cards from falling. You may have a hole large enough for a wooden handle that could be inserted like you did the rope one. The handle is added to make the troughs easy to move about in order to keep the chickens in the shade on hot days.

Musketeers Defeated By Somerset 29 To 23

(By John Parker Rose)

Undaunted by being picked to lose, to the "much improved Musketeers" last Friday night, the Somerset "Brier Jumpers" defeated the Carlisle five 29 to 23, and thus passing Carlisle in the Conference standings and dropping Carlisle out of the "Big Four" league to the 5th place.

Somerset started the scoring in the first minute of the game when E. Waddel dropped in a field goal for two points. The Musketeers soon tasted and were leading Somerset 6 to 6 as the first quarter ended. **Carlisle did all of the Musketeer scoring in the second quarter, making a field goal and a free toss, to the Somerset Carlisle's score at half time 11, but Somerset had a 6 point lead.** Somerset started the scoring in the third quarter by loafing themselves, as they scored 6 points in the same length of time and left the Musketeers at the half way mark 12 to 11. The Brier Jumpers were never headed from this time, making their biggest offensive and in the third quarter to score 19 points to the Musketeer's 2, and were leading at the start of the final period 22 to 13. Carlisle staged a rally in the final chukker but put it off too late.

Somerset sifted through the Musketeers defense as if it was of paper something no other team has done in two years. In fact the Jumpers scored more points on the Green and White than any other team has done in the two years E. Waddle, with 12 points to his credit, scored as many points as the average scored on the Musketeers this season by all of their opponents. In fact the Musketeers were way off form, particularly on the defense. True Somerset had a big team, but so did Maysville and Lawrenceburg and the Musketeers had a bad game in their systems and they played as one scout that it is over maybe we can expect them to hit the comeback trail and chalk up wins from now on, unless they get sick again, or feel that they can play without practice. Boys, it can't be done.

Lineup:

Carlisle (23)	Somerset (29)
Cottrell ..... F.	Waddle (12)
Kerns (12) ..... F.	N. Waddle (4)
Brannon (4) ..... C.	Murphy (4)
Ball (5) ..... G.	Hunter (3)
Arnold (1) (c) ..... G.	Morgan (6)

Subs: Carlisle: M. Armstrong, Kendall, Hefever; Violett (W. & L.)

In a preliminary game, the Center Hill High team defeated Bethel by an overwhelming score of 41 to 7. Bethel made only 2 field goals. "Micky" Minear was the shining light of the Center Hill team. He is playing good, but will be out of the game in the district tournaments here on March 1 and 2.

The Cynthiana "Bulldogs" will be the attraction for Friday night, Feb. 8th, when they come here to avenge the defeat handed them by the Musketeers at Cynthiana earlier in the season. The Musketeers, playing in top form that night will go after the Cynthiana team. However, the Bulldogs are one of the best teams on the local card and may gain the revenge that they have been seeking for two years now. That boy Baize is about as good a basketball player as one would wish to see, and may be the stumbling block for the Musketeers unless they are on their toes. As usual there will be a preliminary game. Who it will be will be made known later. We have been having great ball crowds lately to the games, and as we have only two more home games on the card before the tournament, you fans cannot afford to miss them. The Cynthiana game Friday night and then Stanford, the team that defeated Somerset, will close the season for the Musketeer team on Feb. 15th.

The Musketeers will go to Irvine Tuesday night, Feb. 12th, to play a return game with the Golden Eagles of the Estill county capital. The "Eagles" sailed over the Musketeers here early in the season, you will remember, by a score of 17 to 16, but we hope that the Musketeers will find the range and defeat the Golden Eagle in his nest.

JOE MATHIAS, AGENT

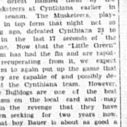
FEBRUARY NOTED MONTH

Today one-fourth of February, the shortest month in the year, has passed. Although it contains fewer days, February is probably the most noted month in the year. It contains the birthdays of two presidents, Lincoln and Washington, both of their birthdays being legal holidays, in Kentucky at least. In addition, there is ground hog day and St. Valentine's day.

To most of us February is remembered as the last winter month. Although spring does not begin until March 21, we usually consider March as a spring month.

The average barber makes about 250 strokes with his razor to shave the average face.

MOTHER!
don't experiment with your
Child's Cold



Often, "more cold" have serious consequences. It is dangerous to neglect a cold—equally dangerous to experiment with half-way measures.

Feel safer! Use Vicks VapoRub —the proved external method of relief that combats 4 phases of constant internal "dosing", which so often upsets delicate digestion and lowers resistance when most needed.

DOUBLE DIRECT ACTION

Just rubbed on at bedtime, VapoRub fights a cold direct—two ways at once—by stimulation and inhalation. This combined poultice-vapor action loosens phlegm—soothes irritated membranes—eases difficult breathing—helps break congestion. Often by morning the worst of the cold is over.

YOUR CHILD AND THE SCHOOL

By Dr. ADDISON A. HOLLAND
Assistant Physical and Health Education Director, Board of Education, New York City

Prevention of Colds at School

First of all, to keep colds out of the school it is essential that parents cooperate by keeping children out at home when the earliest signs of a cold appear. There is no measure quite as effective as this.

At school, the temperature of the room should be kept around 72 degrees. Hot, dry air increases the chances of taking cold. Wet clothing should be removed and every school should provide some room, however crude, for drying clothes. "Bundling" should be avoided by regulation, I mean by that, that an inflexible rule should prohibit the wearing of sweaters, windbreakers, rubbers and the like in the classroom.

All pupils with signs of a cold should be excluded. It is only in this way that spread can be limited to a few cases. The exchange of pencils, pen holders and small articles that can be put in the mouth must be prohibited. With a little patience teachers can educate children to cover the nose and mouth while coughing or sneezing, both when the sneeze is reached such habits should be in school.

Clear drinking should be encouraged. Fresh milk and the fruit juices are excellent preventives as are tomatoes. Correct diets and no measures should be substituted for these projects and diversions. Finally, the teacher should herself set a good example.

How the modern school can aid in the health of children will be the subject of Dr. Holland's next article.

Ways To Prevent Catching A Cold

Avoid Chills; Super-Heated Dry Air Is Bad; Stay Away From Cold Sufferers

By Dr. Wilson G. Smillie
Professor of Public Health Administration, Harvard University School of Public Health

How can we prevent a cold? Since we know that colds are catching, we should make every attempt to avoid close contact with those who have an acute cold. This is especially important during the first three days of the disease.

Sane exposure is unavoidable. For this a few simple rules to follow, however, which probably aid in preventing colds, even if one is exposed. The rooms in which we live should have a suitable temperature and humidity. The upper-heated air of an office or apartment may reach a temperature of 80 degrees. The air becomes as dry as that of the desert so that the membranes of the nose and throat become parched and cannot perform their normal protective functions. This condition predisposes to colds.

Are Wet Feet Harmful?

The body surface should be kept warm and dry. If the skin becomes chilled, one is apt to catch cold. Mothers worry when their children play in the snow or rain, and get their feet wet. Wet feet are not harmful so long as the child is active and exercising, but if a person sits quietly in school or office and has wet feet, the body surface becomes chilled, thus predisposing to a cold.

Many people believe that alcohol is of value in preventing colds. When one is chilled, alcohol does give a feeling of warmth, but causes flushing of the skin and general loss of heat. If one is compelled to expose to the cold, as on a long drive in freezing weather, or working all day in the out-of-doors, a series of drinks of whiskey or brandy may be taken. But usually comes in from a long cold trip, however cold, wet and chilled, shivering and cold, *and does not need to go and* get a drink. Have a reasonable drink of alcohol is of definite value in bringing about a rapid flushing of the skin and a warm, comfortable glow. The best way to have this obtained, though nonalcoholic, is to slowly, with a hot shower bath and a drink of hot cocoa or

OVERCOMES BAD BREATH

HELPFUL HINTS

Sour milk loses none of its nutritive qualities and is excellent for cooking purposes.

To remove tar or black from the hands, rub them with lard. The oil in the peri will dissolve the tar.

A pound of inexpensive naphthalene flakes sprinkled among clothes stored in trunks and drawers should save the clothes from damage by moths.

Curtains and shades should not be used in combination and light. Curtains should be simply made of easily laundered materials, well hung and in harmony with the color scheme. Shades should be light in color and should roll easily.

Piano keys can be cleaned by wiping them with a cloth dampened with wood alcohol and then with a dry cloth.

An ordinary blackboard eraser is an excellent polisher for window panes.

Corn-Hog Program Under Way In State

The 1935 corn-hog adjustment program has been put under way throughout the state, it is announced by the College of Agriculture, University of Kentucky.

C. D. Phillips and L. A. Vernes of the college are directing the work, as noted by the supervisory force of the extension service of the college which has been temporarily enlarged, to assist local committees. The program is being handled through county farm agents of the various counties.

Corn-hog adjustment for this year calls for a 10 per cent reduction in the hog numbers and 10 to 30 per cent reduction in corn acreage from the base period. There will be no restrictions on the use of land taken from corn production.

Participating farmers will receive $15 a head on the number of hogs represented by the 10 per cent reduction, and 23 cents a bushel on the estimated yield of corn on the land taken out of production.

Approximately 23,000 Kentucky farmers signed corn-hog contracts last year, and will receive checks for 100,000 in benefit payments.

An eight-ton war tank capable of a speed of 60 miles an hour was recently delivered to the War Department in Washington. It was brought from Illinois on its own power making 200 miles a day.

Lesson for February 10

PETER PREACHES AT PENTECOST

LESSON TEXT—Acts 2:21-24, 36-42.
GOLDEN TEXT—Acts 2:38: Repent, and be baptized every one of you in the name of Jesus Christ for the remission of sins, and ye shall receive the gift of the Holy Ghost.
Acts 2:38.
PRIMARY TOPIC—When Peter Preached at Pentecost.
JUNIOR TOPIC—What Peter Preached at Pentecost.
INTERMEDIATE AND SENIOR TOPIC—The Results of Pentecost.
YOUNG PEOPLE AND ADULT TOPIC—The Source of Spiritual Power.

In teaching this lesson it is essential that the full meaning of Pentecost be appreciated. It is desirable, therefore, that the entire second chapter of Acts be brought into view.

I. The Day of Pentecost Fully Come (vv. 1-13).

1. The significance of the day (v. 1). Pentecost is from a Greek word meaning fifty. It was the feast held fifty days after the wave sheaf offering (Lev. 23:15). We have about fifty days between the resurrection of Christ (1 Cor. 15:20-23).

2. The gift of the Holy Spirit (vv. 2-4). On this day the Holy Spirit descended upon the disciples. This does not mean that the Spirit was not in the world before this, for throughout all the ages he has been in the world, giving light and life to it.

3. Signs of the Spirit came (v. 1; cf. 1:13-15). The twelve and others, to the number of a few hundred, met of one hundred twenty, which shows that the gift of the Holy Spirit was for all believers, not merely the apostles.

4. The marks of the Spirit (vv. 2-4). These marks were external and literal.

a. Outward.

(1) The sound of a mighty wind (v. 2). This is suggestive of the power of the Spirit's presence and powerful energy of the Spirit.

(2) Tongues of fame (v. 3). Each of the one hundred twenty was endowed with such a tongue for witnessing.

(3) Speaking in foreign tongues (v. 4). This miraculous gift characterized the apostles, but not so authentic one has been reported in modern times.

b. Internal. This is seen in the transformation wrought in the disciples. Peter, who shortly before denied Christ before a Jewish maid, now with boldness stands before the chief rulers and declares that they have murdered their Lord and Savior (v. 36).

5. The effects (vv. 5-13).

a. The multitudes were filled with amazement and wonder.

b. Many mocked and accused the disciples of being intoxicated.

II. Peter's Sermon (vv. 14-47).

Peter's sermon is as wonderful as the gift of tongues. It demonstrates the presence and power of the Spirit in the person of a Galilean fisherman because he was a faithful student of the Old Testament Scriptures. His homiletical analysis is perfect.

1. The introduction (vv. 14-21).

a. Defense of the disciples against the charge of being drunk (v. 15). He cited Jewish custom, showing that they could not be drunk at so early an hour of the day.

b. The scriptural explanation (vv. 16-21). He showed that this was a prophecy spoken by Joel the prophet (Joel 2:28-32).

2. The prophecies, or theme (v. 36). This was the messiahship of Jesus. His argument which followed was to prove that Jesus was the Lord upon whom men were to call in order to be saved.

3. The argument (vv. 22-36). It was threefold.

a. From Christ's works (v. 22). He was approved of God among the Jews by his miracles, wonders, and signs, by his character, and especially by which they were performed (vv. 23-32).

b. From the resurrection. Scriptures had The Old Testament Scriptures had foretold the death and resurrection of Christ (Ps. 16:8-10). The disciples themselves were living witnesses of Christ's resurrection (v. 32).

c. From his ascension to the right hand of God (v. 33). The proof that God had ascended on high was the wonderful miracle of the Spirit's operation in the world (vv. 33-36).

4. The effect of the sermon (vv. 37-42). Many people were convicted of their sins; some three thousand received the gift of salvation. The evidence that the coming of the Spirit was real was:

a. That they continued steadfastly in the apostles' teaching (v. 42).

b. They continued in prayer (v. 42).

c. They gave up their property to distribute to the poor as they had need (vv. 45).

e. They lived gracious lives (vv. 46, 47).

Source of Disorders

An improper use of time is the source of all the disorders which reign amongst men. It is a treasure which we would do well to retain forever, and which we cannot suffer to remain in our possession. This idea, however, of which we make so little account, is not only source of our eternal blessings.

Inspiration

Twenty-months-old Donald Youngest, was very strangled to death when he became entangled in the strings of a window blind upon his father wears in his Ohio bakery.

Having forgotten his office key Lawrence Hall, Chicago insurance official, attempted to climb through the transom. He fell and broke his

The fire bell in 20 times as much as unprocessed as in protected forests.

Cattle Feeding Outlook Bright

Kentucky farmers who have a supply of hay for the rest of the winter and good pasture for the summer may find the cattle feeding situation favorable, thinks E. A. Johnson, economist of the College of Agriculture, University of Kentucky.

Higher cattle prices next summer, when a decreased supply of slaughter cattle as a result of the present feed shortage becomes a reality, are expected by followers of the cattle situation.

"Advances in cattle prices already have occurred as a result of the comparatively small supply of finished cattle on the markets. Prices of thin cattle have advanced in sympathy with slaughter cattle prices, but the high cost of feed has tended to discourage feeding, and consequently the demand for feeder cattle has been slow. The number of cattle on feed for market in the corn belt states on Jan. 1 was 46 per cent smaller than a year ago.

The supply of slaughter cattle during 1935 will gradually become smaller in comparison with past years as the weeks go by. It is generally expected that the late summer will be the especially favorable time to market cattle because the greatest feed shortage in the section which normally feeds for the late and summer market, points out Johnson.

The tendency will be to re-establish breeding herds and to restock the territory which has suffered most severely from the drought and thus contribute to a reduced supply of cattle on the markets. This will become evident as soon as summer pastures are available and will greatly enhance the value of feeder cattle bought and sold during the spring and early summer.

The unprecedented reduction in cattle numbers during the past six months has placed the cattle industry in the position of a low point in the cattle cycle, and market supplies will be comparatively small for several years. At present, feed supplies are short, but if normal or even near-normal crops are produced this year, feed prices will be reduced. Then cattle feeders will find it profitable to their advantage to have acquired their cattle during the period when others were anxious to sell and be in a position to utilize cheap feed to finish cattle for a high market.

Study Catalogue Says Flower Man

Study the seed catalogues; much valuable information can be obtained from the new, modern and up-to-date catalogues, says N. R. Elliott, extension landscape expert for the College of Agriculture, University of Kentucky. Some of his other suggestions for February follow:

Try Now Flowers—While the average man or woman is interested only in the "tried and true" flowers, it might be well to try a few of the newer developments, such as the new, improved nasturtiums, the new annual larkspur, the new hardy carnations and the bilipot zinnias.

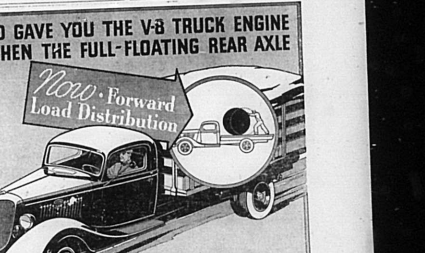
Loosen the Mulch—Mulch put on to protect plants may be causing rot. Loosen it with a rake, which prevents circulation of air and prevents the development of decay.

Sow Bluegrass Now—Many persons make their first Bluegrass lawn seeding in February. Unless the soil is very thin, bluegrass seed is all that is needed. One part of redtop seed may be added for thin lawns, provided the last of February.

Roll the Lawn.—If the ground is dry enough, roll the lawn immediately after seeding, using a 125 to 300-pound roller. Of course it will not be possible to use a roller if tobacco stalks or stems have been spread, but this should not prevent scattering bluegrass seed and rolling. After the tobacco has been removed, which should be about the middle of March.

Still Time to Plant—Much of the ground has been tilled, enough to make ideal planting of trees and shrubs, and both deciduous and evergreens can still be set, if the weather permits.

FORD GAVE YOU THE V-8 TRUCK ENGINE
... THEN THE FULL-FLOATING REAR AXLE



$500.00 AND UP
F. O. B. DETROIT

Easy Terms Through Universal Credit Co., The Authorized Ford Finance Plan

NO other truck in America, regardless of price, offers the combination of features brought to you by the 1935 Ford V-8. Examine them. Then test these trucks for power and strength—and also for speed and handling ease. And make the test on your own job, with your own loads.
