Kentucky Elects A Governor.

By a record-breaking majority, so overwhelming as to leave no doubt as to his personal popularity and the approval of the issues he championed, A. B. Chandler has been chosen Governor of Kentucky. To him all honor for three brilliant campaigns, the vigor of which has rarely, if ever, been equalled in the history of the State. Regarded little less than a year ago as definitely out of the political picture, his startling come-back dates from his action as acting Governor, his calling of a special session of the Legislature to enact a compulsory primary law. Even then this candidacy was taken none too seriously until near the end of the August primary, which he lost by so slim a margin as to be will nigh assure his nomination in the race primary, in the minds of more astute political observers. Mr. Chandler gained steadily in popularity from the moment he began campaigning. Never did he lose an inch of ground, widening his popular appeal, making new friends wherever he spoke. Some weeks ago The Mercury predicted his election by a substantial majority, regarded his race as handily won, saw unmistakable signs of a landslide we thought. But such a landslide as it turned out to be we should not have predicted, notwithstanding the fact that we were well aware of Happy Chandler's engaging personality and the popularity of the issues he championed. He turned out to be not only unbeatable—as we thought—but by overwhelming majority the most popular candidate for Governor, in our opinion at least, in the history of Kentucky politics.

Overwhelmingly popular, distinctively honored, this admirable young man will take up within the space of two months an onerous burden, a thankless task. We have heard the office of Governor of Kentucky referred to as a "man-killer," and as the "graveyard of political hopes." In reality it is neither, and yet there is a little of both in the trying exactions of the office. In mid-December, to the accompaniment of drums and trumpets and public acclaim, we inaugurate our Governors. Within three weeks the frequently still bewildered, timid executive, scarcely recovered from the strenuous labors of campaigning, is plunkered into the machinery of a legislative session, besieged at the same time by job seekers, advised, flattered, harrassed, and more than often sees his legislative program scrapped by a recalcitrant Legislature. He is fortunate if he is not ham-strung by some faction of his own party before the Legislature is organized, doubly fortunate if the cherries has not turned into pyers and fault-finding ere the ides of March. We have fallen into the habit of late years of setting a Governor a hard row to hoe, cheering him heartily to his task and then sitting in the shade along the fence rows and abusing him just as heartily. Worn daffodils flaunt their golden chalices in our blue grass meadows his first spring in office, it is the unusual Governor of Kentucky who has not added measurably to his pentanny, lost many of his illusions regarding human kind and become profoundly thankful that his term lasts but four years. Come April, and, as a general rule, a Governor of Kentucky views that the honeymoon is over.

But Mr. Chandler may not suffer the usual fate. He has proved himself an unusual campaigner; he is a young man, vigorous, untiring, with a magnetic personality, an infectious laugh, a disarming grin that may take him over the hurdles of a legislative session as well, if he be cleared the obstacles of two hard-fought primaries and a general election contest. His knowledge of legislative procedure is practical, learned as State Senator and as Lieutenant Governor. In the parlance of the practical politician, he will "know how to operate." As his Lieutenant Governor, Mr. Chandler is fortunate in having one of the most able young men in Kentucky, a man not only brilliant, but possessing that rarer quality that is so infrequently associated with brilliance, practical common sense. These two should constitute a team, if any may, that will co-operate to produce legislative fruition and speed constructive legislation these two, working together, should succeed, as we see it, in giving such a good account of their stewardship that their term of office will prove for them a highly enjoyable experience and for the Commonwealth of Kentucky a period of substantial progress.

Keen Johnson Breaks All Records.

The majority received by Keen Johnson—the largest majority given any candidate on the ticket—passes the one hundred thousand mark and so far as we know constitutes an all-time record for any candidate for State office in Kentucky.

As Keen Johnson's friend we are delighted that he has been so highly honored, so deservedly honored. As a newspaper publisher, whose infrequent editorials are forwarding have more than often served to convince us that he is not, it is gratifying to recall that years ago we said of Keen that he would go far, should he choose to indulge in the luxury of a political career.

Kentucky is fortunate: when a man of Keen Johnson's calibre is persuaded to leave a successful newspaper business to enter the hurly-burly of politics. That the people of Kentucky recognize his eminent fitness is evidenced by his record-breaking majority.

Premature Rejoicing.

"The hoodooglers are on their way out!" jubilated chairman Fletcher of the Republican National Committee, as Republican jerrymandered New York State elected a Republican House, the Senate remaining Democratic, and as Pinkett was elected a U. O. P. mayor by fifty thousand votes, the usual Republican majority before 1932 reaching more than three hundred thousand with all ease. Mr. Fletcher failed to note that the Democratic vote increased immensely in New York. G. O. P. grassfire straws have been all too rare of late and jubilations too infrequent to analyze results too closely. So, not waiting for the slow count in Kentucky, where Happy Chandler ran on a New Deal platform, Chairman Fletcher and those who fatuously believe that the American people may be led back to the special privilege theories of Hoover and Coolidge and Harding, by rearing the bogey of an endangered Constitution, jubilated while they might.

And then came the returns from Kentucky—a border State, not of the South, not of the North, but constituting in its voting a fair cross section of the political temper of the nation—with a record-breaking majority for the entire Democratic ticket, upsetting the usual rotation of the office of Governor from one party to the other that has obtained in the State in recent years, and with every one the majority given the Democratic tickets enormous, but the old age pension amendment broke party lines, giving Mr. Roosevelt's social security legislation the almost universal approval of the electorate of Kentucky.

Mr. Fletcher and his anti-New Deal friends thought they had scented again the flesh pots of special privilege for which they languish. They set up a joyful howl, like a hound dog that has treed his coon. And then came old Kentucky, with an all-time Democratic high for Governor!

The Will Rogers' Memorial Fund.

The late Will Rogers said: "I have never met a man I didn't like." One wonders if any man ever met Will Rogers and did not like him. We can't think of a more typical for all, somehow, the ideal American, the true descendant of that hardy pioneer stock which conquered a wilderness and set up an empire of democracy in the New World. He ranks with Washington and Lincoln in the regard of the public and it is fitting that all of us pay tribute to his memory.

The Mercury believes that many citizens of Nicholas county will desire to contribute to the Will Rogers' Memorial Campaign, so we are publishing in another column a contribution blank which contributors to the fund may sign in making their donation. The Mercury will be glad to see that all contributions are sent through us are added promptly to the National Fund. If it is more convenient for you to do so, send your donation direct to Thomas R. Underwood, chairman of the Will Rogers' Campaign in Kentucky, care of the Lexington Herald.

Obey That Good Impulse Now.

Every reader of The Mercury, we are sure, will agree that the work done by the Red Cross is invaluable, that its continued functioning is as necessary in our national life as are hospitals, nurses and physicians. All of us will agree that we should sign the roll and make our contribution, but all too many of us will "put it off until tomorrow," and frequently the week of the roll call has passed before we remember again our good intentions.

Throughout the Nation contributions are being made this week to carry on the work of humanity that is the province of the Red Cross. Nicholas county, which has first-hand experience of the fine work done by this organization, when it came to the rescue of citizens of Carlisle following a destructive flood some years ago, should certainly subscribe its quota. Obey that good impulse today.

Perils Of The Annual Hunt.

Men and boys, with guns and dogs, will take to the fields this week. Much powder will be burned, many rabbits and comparatively few quail will be bagged, office slaves will enjoy a healthful vacation tramping the autumn fields, some liquor will be consumed and a pleasant time will be had by all, excepting the rabbits and quail.

The pity of it is that some will attempt to negotiate fences with loaded guns on cock; others, unused to gun handling, will fire wildly and with fatal results to hunting partners. Carelessness will reap its usual toll of human life.

The once-a-year handler of a shotgun would do well to convince himself that all guns are always loaded, that it is safer to unload a gun before climbing a rocker fence and that the average gun shoots farther than most of us imagine. Also that whiskey and white powder mix as poorly as whisky and gasoline. It is better to be irreverently careful than to return from the fields as the slayer of a hunting companion, or in a pine box.

And another thing: The true sportsman is not a game hog; he will leave a few of the fat brown birds for seed."

"Well Trained Servant."

Ads are most polite, points out the Westside (Ga.) Journal. "Newspaper advertising does not shout at you when you are trying to concentrate on something else; it doesn't obscure and mar the landscape; it doesn't interrupt your enjoyment of a good grand opera program; it doesn't make you turn to page 37 and then shuffle through 18 more pages to finish the story; it doesn't clutter up your front yard or obstruct itself onto the seat of your motor car on Saturday evening. Newspaper advertising is like a well-trained servant—never intruding or making itself obnoxious, but always quietly at hand ready to give service when called upon."

The argument that turns a fellow's head sometimes travels through his pocket.

Pollock's Newspaper News reports that the editor who printed, "The Ladies' Aid will hold another fool sale" instead of "food sale" is doing a... sell as could be expected.

HOW ARE You TODAY

DR. JAMES W. BARTON Talks About

The Alkaline Reserve

ONE of the points that is often forgotten in reducing weight is that as the weight goes off, owing to the food intake being reduced, there is a tendency to acidosis—that listless, tired feeling that many of the individual feel that he or she is faint from lack of food. It is often not the lack of food so much as not enough of fruits, and the cutting down on white potatoes, white breads, white meat and sweets less alkaline than they should be.

You are hearing and reading a great deal about acidosis—the effects upon the system of "acid-forming" foods.

You are told that as a nation we eat too much of the acid-forming foods — meat, fish, breads, cereals, pastries, and not enough of the base or alkali forming foods—milk, fruits, vegetables and such like. The result is the condition known as acidosis in which we feel "tired" all the time just as if we had not slept well during the day. This is because

Dr. Barton.

acids consume a great amount of oxygen and so we feel tired.

The base alkaline foods or alkalizers are the fruits, all of which have an acid taste but do contain acid. This is due to the fact that the acid taste (or acidity) is the kind the body can use, and which is left in the tissues, while the rest of the fruit contains a great amount of the base or alkaline ash which makes an alkaline ash is left in the body after the body has used the tissues.

Also the only organic acids which the body cannot use are found in cranberries, rhubarb, prunes and plums.

Apples, bananas, oranges, muskmelon, raisins, peas, beans, and white potatoes are low in acid ash and are found to be very efficient in reducing the alkali reserve condition of the body caused by eating too much of the acid forming foods for a long time.

As mentioned above too much acid forming food uses up too much of your alkaline reserve. This is because the acid qualities, and you feel lazy and tired. Physicians, nurses and health writers do well to warn you about acidosis, which is the name given to these symptoms.

In fact so insistent are some of these writers and lecturers about the danger of acidosis that there is actually set up in some individuals who follow this advice too closely a condition of "alkalosis," where the blood and the sucs are too alkaline to do their work properly.

Now we all want to be at our best, to be not only able to work but zestless to do it, and while we must eat the acid formers—eggs, meat, fish, bread, and cereals—to maintain the "structure" of the body and supply energy, we must not eat so much of them that so much oxygen is used up in burning the acidifying them that we are left listless and tired. Because, after all, our "snap" or "pep" depend to a great extent in maintaining the "alkali reserve" of the body. Any departure from this alkali reserve, that allows the blood and tissues to get more nearly to the acid condition means just that much lack of energy or desire to work.

Another important point is that our resistance to infection is lessened if the alkali reserve is not maintained. "Recent experimental work has produced quite conclusive evidence that resistance to the organisms of infection depends to a large extent in maintaining an excess of the alkali elements in the tissues." This explains why our mothers, without knowing much about alkali reserve, gave us, as youngsters, the half or more portion of baking soda when our stomachs were upset, or we were threatened with a cold. It is real scientific treatment to give baking soda under these circumstances.

The thought, then, is that the blood and tissues in good health contain more alkali than acid elements and your body naturally upon making taining this alkali reserve.

Some health sufferers advise a certain percentage of alkaline ash in the diet but no such rule can be advised for everybody; there are differences in the body build, in the amount of work done, in the particular body ailments besides particular foods.

Generally speaking, however, most of us would be benefited by the "cleanse" of the alkali forming foods—fruits, vegetables and cereals.

The Weight-Reducing Drug

In an editorial on dinitrophenol, the issue of the Journal of the American Medical Association states:

"There seems to be agreement at present that dinitrophenol is a drug with a certain degree of danger when used without supervision. Its sale should be restricted to that given on the physician's prescription and its use by medical men should be carefully supervised. Probably it should be used only when reduction of excess weight is important and when the ordinary reducing diets have failed."

CLIPPED FROM OTHER EDITORIAL PAGES

THE ELECTION RESULTS

(Lexington Herald)

Congratulations are extended, often heartedly to Happy Chandler, Kentucky's next Governor, and to Ken Johnson, who as Lieutenant Governor will stand beside him in Frankfort. To their associates on the Democratic ticket, and to the Democratic state, good wishes also attend. The result no doubt will gladden the heart of President Roosevelt, for whom Senator Barkley dashed off on his whirlwind tour of the country. The victory was that of a party whose cheerful spirit and intense interest in the people living in the humble surroundings he himself had known long before the victory by a majority of eight or nine to one of the old-age pension amendment.

Promising an inauguration without high hats or striped pants, Governor Chandler will have ample room to show his recognition of this sentiment that he was an election by the people." The folks poured out, weather conditions to the contrary notwithstanding, to express their confidence that a ticket that had been described as "Happy and Keen" would result in a government for their benefit.

Judge King Swope, the defeated Republican candidate for governor, who carried his home county by a substantial majority despite the tremendous vote for Chandler in other sections of the state, and who polled approximately as large a state-wide total in losing the race as did Governor Laffoon in winning the 1931 election, took his defeat like a man.

"I place the welfare of Kentucky above the political fortune of any man," he declared. "I am for you from the bottom of my heart that the next four years will bring happiness, employment and prosperity to all our people and that the next state administration will be a success, and Judge Swope in conceding the election of Lieutenant Governor Chandler and congratulating his successful rival.

The sincerity of Judge Swope has never been questioned. When he says that he wishes Democratic success, he meant exactly what he said.

In Lexington, the election of the Home Town ticket headed by Reed Wilson as mayor marks the first change in administration since the Chandler-Laffoon interests took office when city management was installed.

The "dark coronal opus" means "the job is done." This never can be said in politics, especially in Kentucky. Election day is not an end. It is a beginning.

Never did a Governor take office with greater opportunity. He will have a legislature of his own party that should co-operate with him to the fullest. He will have an administration of his own party, elected with him and singing his praises to the skies.

HIGH WORDS

Your Doctor's out here with a flat tire.

Diagnose the case as a flatulency of the perimeter and charge him accordingly," ordered the garage man. That's the way he does."

Snapshots of KENTUCKY GEOLOGY

by Dr. A. C. McFarlan

UNIVERSITY OF KENTUCKY

MINERAL VEINS

The greatest development of commercial mineral veins is in Caldwell and Crittenden counties of the Western Pennyroyal, a badly faulted region and one of the two areas where igneous rocks (formerly mollis) lavas) outcrop in Kentucky. This along with adjoining parts of Illinois comprises the greatest fluorspar region of the world. This mineral, used mainly as a flux in the smelting of steel, occurs in veins cutting across the limestone. In origin it seems to be intimately tied up with the occurrence of the igneous rocks mentioned and was one of several minerals brought up by rising hot waters coming from the molten lava below. It can be readily seen that we were threatened with a cold. In real scientific treatment to give baking soda under these circumstances.

Associated with the fluorspar are found the lead and zinc ore minerals galena and sphalerite. It is interesting to note that the discovery of lead and zinc ores was made in Kentucky came during the last century as a result of the search for lead and silver. Lead and zinc, while not present in large enough quantities to be mined alone, are valuable as by products in the amount of work done in the recovery of fluorspar, particular body.

The central Kentucky mineral veins have some interest, and have been worked for fluorspar, but the famous "bone" of the shaft-sinking fossiliferous crystalline ores again seem to be present in rather limited quantities. Only a couple of fluorspar veins have been worked and its possibilities are limited.

Barite is the most abundant of the vein minerals. Known as heavy spar because of its weight, it finds its chief use as a white pigment in the manufacture of paint. The industry flourished for some time during the period of higher prices but at present there are no mines operating.

Calcite has been worked in only one mine, the Chinn mine at Mundy's Landing in northern Mercer County. Again low prices have halted operations. It finds its chief use in the chemical industries but has pure limestone and chalk as strong competitors.

The Central Kentucky veins offer a rather intriguing problem of origin. They are veins of mineral matter deposited in rock fissures by underground waters. But the nature of these underground waters is uncertain. One type of ground water is derived from rainfall, and slowly seeps downward through rock crevices. There are also heated waters rising along crevices from molten lava below in regions where such vents are known. They are veins of mineral likely by different workers. No igneous rocks are known to occur in the Blue Grass region and there is little to suggest that they may exist below the surface. On the other hand fluorspar deposits apparently are formed by heated waters of deep solutions only, suggesting that all the veins may have had such an origin and that molten lava (now solid) may have once existed beneath the surface. Further supporting evidence of such former molten rock deep below the surface has more recently been found, giving strength to the belief that this is the source of these materials.

50 Years Ago

Thursday, November 19, 1885

Died—William P. Rice 17, at his home near North Middletown on the 12th.

Judge Menzies conducting quarterly session of chancery court here this week.

Dr. H. M. Scudder, pastor of Carlisle Presbyterian church, declines to call to pastorate of Presbyterian church in Little Rock, Ark.

Rev. J. W. Carlin, of Trinidad Colorado, accepts call to pastorate of Carlisle Baptist church.

Jerome B. Sanford, of Moorefield, buys farm of Mrs. Hannah Hook-town from William Payne for $60 per acre.

Thomas A. Johnston leaves for Clay City, Powell county, to assume duties as general manager of Kentucky Union Railroad.

Democratic county committee meets Saturday, December 5, and date for holding primary to nominate candidates for county offices.

Married—Miss Mae Hendrix and Dr. R. D. Tilton, both of Carlisle, on the 18th.—Miss Mattie Bickel, of Williamstown, and Mr. George Fuller.

NEWS of KENTUCKY

W P A projects for Kentucky totaling $467,390 were approved Friday.

Maysville adopted the commission form of government in the election last Tuesday.

Charles Morgan, 72, chief of police of Georgetown since 1923, died at his home last week.

C. J. Waddell, former law partner of Governor Laffoon, died at his home in Madisonville.

Jack Van Meter, 27, shot and killed himself in the yard of his home in Larue county Saturday.

Burglars entered a hardware store at Owensboro and stole guns and ammunition valued at $1,100.

Cumberland county and Burkesville schools were closed Friday on account of infantile paralysis.

Police Judge J. W. Duncan, of Stanford, last week fined himself $1 for "swearing in a public place."

J. E. Marsh, 56, was shot and killed at his home in Owensboro Friday night by his 17-year-old son.

Despondent over ill health, Mrs. Beulah Burger, 41, drowned Burge, 41, drowned herself in a creek near Shelbyville Sunday.

While Kentucky voted overwhelmingly in favor of repealing the prohibition amendment, 69 counties voted dry.

United States Senator M. M. Logan announced Saturday that he would be a candidate for reelection next year.

Henry Watson, 72, Mt. Sterling attorney and former councilman, died of a heart attack in his office Saturday.

Mrs. Mabel Graham, school teacher at Lebanon, won a $1,500 prize contest for best snapshot in a national contest.

James P. Todrey, 63, for more than 40 years a commission merchant in Winchester, died at his home Sunday.

Five convicts which kenosha was put into a state destroyed the Main Stanford Work Breen with a fire loss of $3,500.

Floyd Harrison, 31, was shot in the abdomen and probably fatally wounded by Howard Lee Lowery, 16, at Barren county.

Thieves tunneled through the brick wall of a warehouse in Louisville Sunday night and stole cigarettes valued at $2,128.

Eight persons were arrested in Mason county in connection with a dance craze of isolating the fish and game laws.

Tobacco warehouses in Hopkinsville and Clarksville will be closed Monday to receive tobacco for the opening sales on December 2.

$750 in prizes will be distributed at the annual Kentucky Derby Festival ball at the Brown-Thomas hotel in Louisville this week.

A survey conducted by the Federal government at education shows that 1,000,000 persons in Kentucky 8,300 illiterate in Louisville.

The First Christian church in Louisville will celebrate the one hundredth anniversary and its establishment on November 17.

Arthur Cross, proprietor of a restaurant at Winnsboro, was held up and robbed of $75 by an armed bandit in his place of business Monday.

Dr. W. M. Gibson, 61, prominent physician and surgeon of Richmond, died of a heart attack in New Orleans Saturday following a long illness.

Wyatt Owens, 85, of Mason county, claims a world record for Democratic votes. Mr. Owens has been voting since 1872 and has never scratched a ticket.

The decomposed body of Wilford Burgs, 34, brickyard laborer, missing from his home in Carter county for 17 days, was found by a neighbor on Monday.

The Maysville Independent has started a movement to remove Governor Laffoon as member of the Democratic national committee from Kentucky.

E. Reed Wilson, candidate for Mayor and three candidates for commissioner on the Home Town Ticket" won in the municipal race in Lexington.

The Kentucky Works Progress Administration has spent approximately $1,500,000, the bulk of it in the state, for materials and supplies to use in its work.

Mrs. A. L. Williams, of Mt. Sterling, was critically injured and four other persons were hurt when their automobile was struck by a truck near Mt. Sterling Monday.

Price Richardson, 31, who escaped from the Owsley county jail while awaiting trial for slaying his brother in 1933, was arrested in Cincinnati last week and returned to Booneville.

Rev. Byrd Edepp, of Jeffersonville, Montgomery county, was fined $50 and costs in county court at Mt. Sterling for striking and wounding Earl Conright, a neighbor.

Mrs. Edith Purdon, widow of the late Jim Purdon, has been named deputy sheriff of Mason county to fill the vacancy caused by the death of Deputy Sheriff Richard Lloyd.

H. H. (Hop) Holeman, secretary to Governor Laffoon, who has been in Norton Infirmary in Louisville for five weeks, suffered a heart attack Monday and is in a serious condition.

Three men entered pleas of guilty to charges of robbing a branch of the Jessamine county and were given sentences of 21 years in prison in circuit court at Nicholasville Monday.

Joe Costello, editor of the Cynthiana Democrat, has a letter to James A. Farley, seeks to have Governor Laffoon removed as Democratic national committeeman from Kentucky.

Curtis Killen, 13, died at his home in Lincoln county from rabies. The boy was bitten on the hand by a bird dog six months ago and was treated with rabies ten days before his death.

Jesse Anderson, 28, was acquitted at his examining trial in county court at Mt. Sterling on the charge of slaying Edward Schooler, 21, Anderson ejected Schooler from a pool room.

Miss Lucille Atwell, 23, of Louisville, swallowed poison at Chicago and she said she would be buried with a man who ended their plan when Governor May by telling her he loved another.

Harold Bushman, 13, was arrested last week on a charge of robbing the home of Mrs. Jefferson, Greene county. The boy admitted he and another lad broke into the postoffice and stole $5.

Robert Downing Adair, 29, of Maysville, was killed and Miss Bonnie Wallace, his companion, was injured when their automobile was sideswiped by another car and turned over on Maysville early Sunday morning.

Judy C. Robinson of Danville, elected Representative from the 43rd District, and Joe F. Robinson, Lancaster, elected Representative from the 44th District, Democrats, have been assigned adjoining seats in the House.

For the first time in Kentucky's history a city clerk has been appointed. Charles W. Anderson, Negro Republican, was elected from the 44th district in the House of Representatives.

The shared bath of Mr. Flora and Lewis, 65, was found in the bed of the cabin home in which they lived, near Hazard, last Monday. It is thought the aged couple fell ill and died before aid can from the home.

Ed Anderson, charged with the murder of Floyd Turner, Middlesboro taxi driver, was found guilty of his sentence in circuit court at Pineville Friday. He was given a death sentence for the same offense.

SIXTY MILLION AUTOMOBILES

(Elmbrook News)

If someone were to ask how many automobiles have been manufactured in the United States in the last seventy years, few persons would guess the correct answer, exactly. The actual number from 1918 to 1935 inclusive, constituted the last two months' production this years is the preliminary total of 59,976,690, or nearly 2,000,000 a year.

This means that in the past twenty years more automobiles have been produced than children were born. In that period of two decades one automobile has come off the runways in the factory for every two people —men, women and children—now living in the United States.

The largest year's production was 1929 when the total was 5,621,000, and the smallest was 1918, the year of the armistice, 1,170,000. This single exception, the lowest year's production was in 1932, when only 1,431,000 cars were manufactured. With twice or three times the population of 1918 the automobile industry was smaller than in 1917, 1918 or 1919. That fact alone shows the depths to which the depression plunged us.

Production in 1935 is set for 3,900,000 cars, and next year the more optimistic are going to produce 5,000,000. The hats of the business men go off to the automobile industry. It is industry No. 1 in national recovery. It has shown more initiative, more courage, more resiliency than any other American business. It has been found to be entitled to an answer of "No." And because they had faith and, backed on America's future, they are reaping the rewards of the heaviest sales known in six years.

The U. S. Public Health Service has announced a new scarlet fever toxoid of which only two injections are necessary to produce immunity and which also has mild after effects. It has proved satisfactory in tests on both animals and children.

Local Officials Attend Meeting At Louisville

W. S. Atkinson and Ben R. Caldwell, vice president and secretary-treasurer respectively of the Nicholas County National Farm Loan Association, represented that organization at the first annual convention of farm loan association and production credit association presidents and secretaries of Ohio, Indiana, Kentucky and Tennessee at Louisville on. November 6 and 7.

The Flemingsburg Production Credit Association which serves Nicholas county farmers in the short-term loans for farm production purposes was represented by the President, Ezra R. Kendall, R. R. 2 and Secretary-Treasurer, J. M. Berry.

About 1,000 executives of these two types of cooperative farm credit organizations attended the convention, representing more than $100,000,000 in farm loan associations and 44 production credit associations of the Fourth Farm Credit Administration District. A joint session was held on November 6, with a banquet that evening addressed by W. I. Myers, Governor of the Farm Credit Administration, while the program on November 7 consisted of separate meetings of the farm loan association executives, President E. R. Kendall and Secrtrary J. M. Berry reports.

"The convention was called by the executives of the district," stated administration of Louisville for the purpose of promoting a better understanding of the farm credit situation among local association officials in the district," stated Vice President W. S. Atkinson "and to promote better business methods, broader cooperation between the farm loan and production credit associations and between these local credit cooperatives and the Federal land bank." Production Credit Associations and other regional credit units which center at Louisville.

A banquet at Brown hotel Wednesday evening addressed by Gov. W. I. Myers, was attended by 500 persons, banquet attendance Brown hotel has had. Ballards Jug Band furnished music.

Tax Reduction Association To Meet In Lexington

Many of saving the taxpayers $7,000,000 a year will be discussed at the annual meeting of members of the 1936 General Assembly now being arranged by a number of Kentucky counties by the Kentucky Tax Reduction Association, Inc., it was announced by the executive committee Nov. 19. Lexington, Lafayette Hotel.

In each of the committees to the legislature are being extended by the local Chamber of Commerce or similar organization of business men, who have agreed to sponsor the Kentucky Study with their association.

The invitation states that, "no partisan speech-making or promotion of personal interests of the meeting drawing to give most of the time to discussion of the tax problem of a round-table discussion, with no time limit, but you will be asked to attempt made to pledge votes for any legislative proposal."

An association of the legislative measures accepted by the association will be drafted by a committee of the association. These measures include the following subjects:

1. That plan of tax economies whereby the state collects all taxes for city and county, thereby one tax assessor shall make all assessments in the county.

2. Assessment of real estate every two years instead of annually.

3. Unit plan of tax collections whereby the state collects all taxes, county makes out one tax bill for each taxpayer, showing the tax due for each governmental unit separately and making the distribution after collection so each gets their share.

4. Establish a single board of tax supervision for city and county, eliminating present duplicate functions of present separated boards.

5. Abolish the office of county tax librarian and provide that the county attorney shall serve ex-officio in that capacity.

6. Abolish the fee system of paying county officials; the fees to be deposited in the public treasury and the officials to be paid a fixed salary. This procedure is now being followed in thirty-six of the states.

The Association estimates that the County Budget Law and other measures included in the 1934 legislative program made possible the saving of $5,000,000 a year in tax rates, and that the measures to be advocated at the 1936 session will increase this amount to $7,000,000.

KENTUCKIANS TOO MODEST

(Falmouth Outlook)

During the past sixty days the people of Kentucky have witnessed the most wonderful weather under the sun. Indian summer is not uncommon in Kentucky that the people get used to it and hardly mention it as an unusual thing, but the greatest state in the union but our Producing Commonwealth is not without any ballyhoo. Florida has her hurricanes and tornadoes, and California her devastating fronts and earthquakes. Montana is growing fashionable and trying to keep abreast of California. The sympathy of the people of Kentucky goes out to these unfortunate states in their benighted belief that they have the best place on earth in which to live. Kentucky excels the world over in bluegrass-fed lambs, bacon hogs, corn-fed turkeys and political swine, but we are prone to keep these great virtues under our hats.

Vote By Counties In Governor's Race

The vote by counties in the Governor's race follows:

First District

County	Chandler	Swope
Ballard	3564	741
Caldwell	3142	2062
