HANNA'S GREEN SEAL PAINT
has never been found wanting . . .
. . . It covers more surface per gallon . . . has greater hiding qualities . . . beautiful, sparkling colors . . . gives years of satisfactory service.

COMPARE the house that is painted with HANNA'S GREEN SEAL PAINT with another house that is painted with the cheap, bargain store variety of paint. IMMEDIATELY you see the difference . . . and in one year there will be even a greater difference because HANNA'S GREEN SEAL PAINT will still be good . . . time and weather has very little effect upon its protecting coat.

A good painter and Hanna's Green Seal Paint means a quality paint job.

Dorsey Bros. & Fisher

RICHLEAU
No. 14693
Registered Draft Stallion

Will make the season at my farm, one mile south of Walnut, at $30 to insure a living colt.

Richleau is a fine dark bay horse with white star, weighs 1700 lbs. good bone. He is of the same blood and place, Hiatt, Stam, or none. He is by Sun, registered and standing at John Hiett's registered stall and is proven himself a good breeder.

Money due when colt comes or mare is parted with. Care taken to prevent accidents, but not responsible should any occur.

Phone 220-J or No. 9 to book your mares.

Life insurance companies in the United States have paid an average of $10,000,000 each working day to policy holders and beneficiaries since the 1929 crash, and in 1935 alone life insurance payments totaled over $2,600,973,000.

A New Junior Hall Of Fame

The selection of a new Junior County Hall of Fame is announced from the University of Kentucky College of Agriculture. It is composed of 10 farm boys and girls, winners of state championships in the bonus 4-H club projects. The 4-H members and the projects in which they excelled are: James B. Thornton, Owen county, sheep; Louis Hartung, Jefferson county, poultry; Minnie Ruth Pyle, Christian county, canning; Mickey Malone, Campbell county, foods; Charlotte Sanders, Garrard county, baby beef; Noma Arnold, Jefferson county, room improvement; Greta Moss, Kenton county, clothing; A. Percy Adair, Bourbon county, swine; Ralph Overfield, Henderson county, corn, and Alton Napier, Allen county, tobacco.

THE GARDEN

THE CABBAGE FAMILY

(By John S. Gardner, Kentucky College of Agriculture.)

Besides cabbage, the family includes cauliflower, broccoli and collards. Their cultural requirements are so much similar that they can be discussed together.

All need "rich" land, rich in the sense that heavy manuring makes it so, for all are leaf crops. Commercial growers of cabbage use as much as 30 tons of manure to the acre. This is a year of 3 inches. In addition, sidedressings with nitrate of soda are given, usually two at the rate of one pound to 100 feet. The first is made when young fruit starts, and the second two weeks later. The reason for nitrates is to enable a start in growing that is made before the ground warms sufficiently for the manure to become effective.

Cabbage is a crop of easy culture. This includes need for a deep soil, for plenty of moisture, adequate manuring, adequate plant food, and the making of holding rain water by the use of the hoe. Cultivate deep at first, shallow when growing fast, and deep again when
