THE GARDEN

VEGETABLES FOR THE WINTER. III

The "Warm" Crops
Home Methods

By John S. Gardner, Kentucky College of Agriculture

Last week, the construction of a professional, inexpensive house was described, and the ways in which such a structure meets the storage requirements for sweet potatoes, cabbage, turnips, apples, tomatoes and other fragile vegetables. Today, these principles will be discussed as bearing on home-storing methods, using no special house.

There may be a pantry, a small storage room, or some of the tables named above, at least for a few months. Such a pantry can be made effective and economical by installing some means whereby the air within it can occasionally be changed. All that is needed is a window on outlet vent in the ceiling, whose size in square inches is that of the floor in square feet. Or, if the door presents an inset to the ceiling line, a fake 6 or 8 inches shorter, top and bottom, than the opening may be fitting, or merely a curtain of burlap or carpet. With the inset door opened and—the false one shut, warm, moist air escapes through the top crack, and fresh dry air will flow in through the bottom opening to replace it. In all this discussion, it is presupposed that the walls of the pantry are warmly built. A good precaution to take at the time is to newspaper the crates in which the vegetables are stored, or to wrap each specimen with the same material, to hold warmth accumulated during the day, while there is a fire in the dwelling-room next to the cold storage room.

Perhaps a house cellar is available to use. In that case, slat baskets or crates of vegetables may be hung just under the floor joist, where the air is warm er than nearer the cellar floor.

Now for a list of the dependable vegetables, and the methods of home-storing them, using no special house. Combine until the entire quantity has been used. Season each layer as it is put on. Cover all with bread crumbs and bake in a moderate oven until brown. A serving consists of either liver, heart, kidney, brain, tripe, tongue or sweet breads once a week will help to prevent diseases among children as well as adults.

Braised Liver with Vegetables

Use 2 pounds of liver, an eighth of a pound of salt pork, 6 medium carrots, 6 small potatoes, 1 onion, 2 cupfuls of tomatoes, a teaspoonful of salt, and flour.

Wipe the liver and rub with flour and sear in hot fat. Place in a baking dish, cut the salt pork in thin strips and place on top. Add potatoes and carrots around the liver, add the tomatoes and seasoning. Bake in a hot oven until done, or about an hour and a half.

Salmon is an inexpensive substitute for fish and should be served at least once a week. Salmon also combines well with tomatoes and onions.

Tomato Salmon—Use 2 cupfuls of cooked tomatoes, a can of salmon, 1 minced onion, 1 tablespoonfuls of sugar and a teaspoonful of salt.

Cook the onions in bacon fat or butter, and bake the salmon. Add all ingredients to the onions and let simmer for about 20 minutes. A cupful of rice or spaghetti may also be added.

Tough cuts of meat may be made tender by cooking a long time at a low temperature in a covered vessel.

Use Tattoo To Thwart Thieves

As a part of the nation-wide drive against the stealing of farm property, chickens are being tattooed in Fleming, Mason, Pulaski and Hart counties in Kentucky, and the work soon will be extended to all northern and central counties of the state.

In the case of chickens, the tattoo is used in the web of a fowl's foot. Other livestock is tattooed in ears. Methods also have been devised to protect grain and farm equipment. Sheriffs taking part in the law-enforcing officers of Kentucky and surrounding states are furnished with each farmer's brand number, it possible to trace stolen property.

The tattoo method of protecting property originated at the experimental summer machine of the Kentucky Poultry Improvement Association at the Agricultural Experiment Station at Lexington, and is being used by farmers in several states and is subject to several modifications.

Thousands of dollars worth of poultry and sheep and other livestock are stolen in Kentucky annually, and the poultry industry, alone, has been hard hit by farmers raising the price.

"SAVING" THE COUNTRY

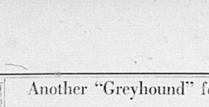
The little boy adores the first issue of the Chicago Tribune.

"Only 91 days remain in which to save your country."

"What are you doing to save it?"

Some people can do their best to save it by carrying out their threat to leave it. If ROOSEVELT should be re-elected.—Courier-Journal.

Another "Greyhound" for Uncle Sam's "Pack"



With her crew and guests at attention on the after deck, the U. S. S. Tucker, latest addition to the United States' destroyer fleet, is commissioned into service. Lieut. Commander George T. Howard accepted the ship for the United States navy and took command.

Suggests Combining Meat And Other Food

(Mrs. Pearl J. Haik, Kentucky College of Agriculture)

When food is scarce and there is only a limited amount of money to spend, care should be taken not to buy too much meat or spend the allowance for expensive cuts.

Each farm family should have enough hens to supply some eggs, which may be substituted for meat. When cheese is a meat substitute which is easily digested and inexpensive. Plans should be made to have a cheap cut of fresh, lean meat occasionally. The flavor can be stretched by combining with other foods, as in:

Farmers' Cabbage—Use a cupful each of cold cooked meat, cabbage, cooked tomatoes, and bread crumbs, with salt and pepper for seasoning.

Grind the meat into small pieces also the cabbage. Put a layer of meat in the bottom of the baking dish, then a layer of cabbage, then a layer of tomatoes. Continue until the entire quantity has been used. Season each layer as it is put on. Cover all with bread crumbs and bake in a moderate oven until brown. A serving consists of either liver, heart, kidney, brain, tripe, tongue or sweet breads once a week will help to prevent diseases among children as well as adults.

Braised Liver with Vegetables

Use 2 pounds of liver, an eighth of a pound of salt pork, 6 medium carrots, 6 small potatoes, 1 onion, 2 cupfuls of tomatoes, a teaspoonful of salt, and flour.

Wipe the liver and rub with flour and sear in hot fat. Place in a baking dish, cut the salt pork in thin strips and place on top. Add potatoes and carrots around the liver, add the tomatoes and seasoning. Bake in a hot oven until done, or about an hour and a half.

Salmon is an inexpensive substitute for fish and should be served at least once a week. Salmon also combines well with tomatoes and onions.

Tomato Salmon—Use 2 cupfuls of cooked tomatoes, a can of salmon, 1 minced onion, 1 tablespoonfuls of sugar and a teaspoonful of salt.

Cook the onions in bacon fat or butter, and bake the salmon. Add all ingredients to the onions and let simmer for about 20 minutes. A cupful of rice or spaghetti may also be added.

Tough cuts of meat may be made tender by cooking a long time at a low temperature in a covered vessel.

Twenty Percent Rise By Spring Predicted

Contemplating the millions of dollars of food they'll buy for the Civilian Conservation Corps this the next few months, army quartermasters predicted that prices would go up 20 per cent by next spring.

The overture family, they argued, would likewise feel the increased purchasing the CCC "ration" ordered and with that of the regular army —to include kinds of food never sold for enlisted men heretofore.

Effects of the drought and its post-harvest conditions—that have the army buyers said were simply not known. Even the army's purchasing agents, for have been unable to foresee—of the CCC, and perishable foods are contracted for three months at a time.

Increased prices for milk and butter, already felt in many cities and elsewhere, however, already affected the daily food of the soldier in Kentucky camps. Milk prices in April to 15-20 cents per quart, whereas eleven cents was being paid farmers ruling the market.

"SAVING" THE COUNTRY

The little boy adores the first issue of the Chicago Tribune.

"Only 91 days remain in which to save your country."

"What are you doing to save it?"

Some people can do their best to save it by carrying out their threat to leave it. If ROOSEVELT should be re-elected.—Courier-Journal.

Appeals To Farmers To Save Stock Feed

An appeal to farmers to save all stock feed possible, is made in a statement from the College of Agriculture of the University of Kentucky. Because of the short corn crop, there will be scarce and high in price. It will, therefore, be to the advantage of farmers to save all corn fodder and other materials that can be used for stock feed.

It is suggested that all corn be cut so the entire stalk can be saved and fed. Topping and pulling corn in the field are considered wasteful. The trench silo is advanced as an economical method of making corn and other roughages into ensilage. Many farmers have tried trench silos in the last few years and have found them satisfactory. They are easy to construct and do not require heavy machinery in filling.

It is pointed out that corn fodder will have a strong feeding value this year, due to the fact that the strength that ordinarily goes into the ear has gone remains in the stalk, leaves and blades.

Hog weeds, foxtail, crabgrass and other grasses and weeds may be made into hay, in many instances, it is declared. They often make satisfactory feed, especially when supplemented with fodder or hay.

All straw from threshed grains can be used for stock raised, the college suggests. The same applies to chaffs left from threshing lespedeza, red clover and similar crops.

It is pointed out that there will be extra room in barns this year, due to the small crop and also to a possible short tobacco crop. Many farmers are planning to fill their barns with hay and fodder. In some instances they will shred the corn fodder before putting it in barns.

In some sections of Kentucky corn came in time to produce a fair corn crop and also considerable silo alfalfa, lespedeza and other seeds. Also considerable small grains, soybeans and other hay and pasture crops were seeded in some regions. It is urged that these crops be carefully preserved.

Where farmers have crops, they may find it of advantage to sell grain and buy, because of good prices, and save for their own feed corn fodder and cheaper hays. Or, in some instances, where crops are fairly good, more livestock may be purchased for carrying through the winter. In many sections pasture is good livestock prices another year.

Following the cutting of corn and tobacco, the college urges that small grains be seeded for fall and winter pasture. Not only will the wheat, winter oats and barley provide an abundance of feed, but they prevent erosion and leaching of the soil—and are among the best winter crops.

SIXTH GENERATION

(Cynthiana Democrat)

Levi Joan Schnacker of Cynthiana, born June 21, 1936, is a sixth generation baby. She is the only daughter of Melvin and Dorothy Herrington Schnacker. Mrs. Schnacker is 25 years old now and forty four is her third child. Levi Donald Lemon Schnacker is more than two years of age, and Dorothy Ann, born March 30, 1934, is a baby doll of three years.

Betty Jean's grandmother, Mrs. Hazel Hampton Herrington, the wife of Hubert Herrington, is also a young woman 25 years of age. Her mother, Mrs. Mary Hampton, the wife of Hugh Hampton of this county, was born in 1905, and is now in her 31 years of age. Her mother, the great-great-grandmother of Betty Jean, is Mrs. Martha Frederick, a out of proceedings in which a daughter of Jacob Frederick and the great-great-great grandmother of Betty Jean, was born July 23, 1847, is 89 years of age and earns her own living by doing domestic work.

AMERICA NOT IRRELIGIOUS

(Carrollton News-Democrat)

The fear often is expressed that we are becoming an irreligious nation; that churches are on the decline and the people do not take the interest formerly shown in church affairs. Exactly the opposite is shown by a study of the facts. While conditions may be far from what they should be, there is steady improvement.

The membership in eighty-seven church and religious bodies in the United States increased 4,000,000 last year, reaching a total of 62,878,000 or approximately one-half of our population. The increase in church membership last year was in advance as an economical method of making corn and other roughages into ensilage. Many farmers have tried trench silos in the last few years and have found them satisfactory. They are easy to construct and do not require heavy machinery in filling.

It is pointed out that corn fodder will have a strong feeding value this year, due to the fact that the strength that ordinarily goes into the ear has gone remains in the stalk, leaves and blades.

The topping of corn is not only considered wasteful, but when weather-tinged it tends to stop further development of both stalk and ear. Where corn is stacked standing in the field and the field then pastured, it is estimated that 50 per cent of the value of the feed per acre is lost. Leaves and blades blow away, and rain damages the stalk.

Hog weeds, foxtail, crabgrass and other grasses and weeds may be made into hay, in many instances, it is declared. They often make satisfactory feed, especially when supplemented with fodder or hay.

All straw from threshed grains can be used for stock raised, the college suggests. The same applies to chaffs left from threshing lespedeza, red clover and similar crops.

It is pointed out that there will be extra room in barns this year, due to the small crop and also to a possible short tobacco crop. Many farmers are planning to fill their barns with hay and fodder. In some instances they will shred the corn fodder before putting it in barns.

Rust, the kind that eats iron and steel and other metals, causes an annual loss in the United States of over $1,000,000,000.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

Lesson for August 30

BEGINNING OF WORLD MISSIONS

LESSON TEXT—Acts 13:1-3, 13:13-15. GOLDEN TEXT—And he said unto them, Go ye into all the world, and preach the gospel to every creature.—Mark 16:15.

PRIMARY TOPIC—Stories About Jesus.

JUNIOR TOPIC—The Good Starts Among the Gentiles.

INTERMEDIATE AND SENIOR TOPIC—Missionary Activities of the Church.

YOUNG PEOPLE AND ADULT TOPIC—Missionary Activities of the Church.

The normal expression of salvation is the desire of a living person for the conversion of others. Paul's great passion was to help fulfill the great commission of its Lord and Master. The first missionary enterprise was in the gentile city of Antioch, only 150 miles from Jerusalem, but far from God. In this unpromising soil we find growing

I. A Model Mission Church (vv. 1-3).

In this establishment was in accord with the Lord's plan (Matt. 28:19-20).

1. The result of a faithful testimony (Acts 11:19-21).

These who were scattered abroad upon persecution had but one evening purpose—"preaching the Lord Jesus."

2. A gathering place for all God's people (vv. 19, 20). The truth was presented to Greeks as well as Jews.

3. A living witness in a wicked city (v. 21).

"The hand of the Lord was with them." The life of a believer is a great number believed and turned unto the Lord. Note in verse 22 that it was in Antioch that the followers of Christ were first called by the beautiful name "Christians." In the midst of the most wicked and degraded surroundings the sweet flower of Christian grace blossomed.

II. The Model Mission Church Receives a Model Missionary Church (v. 1).

We have here the first step in the organization of a mission church which continues to our days and the same principles are followed. Men and women of the course of this study.

This first missionary enterprise was attended by real prophets and methods which are vital to true missionary work in all ages.

To begin with, there must be a definite time of separation unto God's work.

1. The home church (vv. 1-3).

Blind faith in missionaries right out of the church is not enough. On the Sunday that this lesson is found missionary leaders of the next generation will be in the classes of senior department. Sunday school. How important it will be that the lessons there get the truth of God's Word plainly and faithfully.

Notice that the missionaries are spiritually alive. It was a church that prayed, fasted, and ministered to the Word of God. It was responsive to the guidance of the Holy Spirit.

Next we have indicated the type of men to be sent out.

2. The missionaries (vv. 2-4).

a. The strongest men in the church (v. 2).

When you want something done, get a busy man to do it. Paul's missionary program calls for the best in the church and not the dregs or failures.

b. Spirit-led men (vv. 3, 4).

God chooses and sends men into His service. He has a right to choose them.

c. Missionary experiences (vv. 5-12).

a. Minister to all people (vv. 5-7). Paphos was a Greek city of high culture and luxurious living. It was ruled by Sergius Paulus a Roman governor, while characters with him was Barjesus, also called Bar-jesus, a wicked Jew. The missionary always faces opposition. He has opportunity to preach to Greek, Roman, and Jew.

b. Meet satanic opposition (vv. 8-11).

The devil has his servants who love to oppose the gospel. It is significant that even as God had children so also there are children of the devil" (v. 10). We choose our friends and form our associations.

c. Proclaim judgment on sin (v. 11).

This is not an easy thing to do but is required of one who is "filled with the Holy Spirit."

d. Lead men to Christ (v. 12).

In this case it was the result of fear, which is a powerful factor in the conversion of some souls.

The Master's commission, "go ye into all the world and preach the gospel," has never been altered, modified, or canceled. It is still the great "unfinished business" of the church.

Learning From Suffering

I have learned more of God and of myself, by one week's suffering than by all my experience of a long lifetime.—Bishop Hall.

More Work, Not Less

"We give you of our income only by working harder, not by working less."—Roger W. Babson.

Possessions

To know how to possess with moderation is to possess in reality.—Bernard.

THE FARM AND HOME

(Kentucky Agricultural Experiment Station)

Stains on linens, spread cloth over bucket and pour boiling water through the stain. If the material has been washed, it may be necessary to use a bleach, soak in water to which has been added ammonia or peroxide of hydrogen. Soap sets stains.

Unless a pressure canner is available, it is better to dry corn than to attempt to can it. Dip ears in hot water for 8 to 12 minutes, drain, cool and cut off the grains, spread on trays half to three quarters of inch deep and stir frequently during drying process.

Due to a possible scarcity of seed next year, farmers are cutting red clover as for hay and will bull it for seed. Since the straw is about as valuable as hay, both seed and a good rough crop can thus be had.

Only traits of good conformation and strong breed characteristics should be kept. Narrow-chested animals and weak-legged pants should be avoided, as should over fat and unthrifty animals. Rams best fitted for show or sale may have limited service.

High quality women's coats have a distinctive touch of hand stitched with fabric thread by hand. Buttonholes, pockets, seams and front edges are prettiest when with narrow pinchbeck, gold or silver braid, or with self-tone stitching.

Remember fortunate to have grandsons often can a few soups, stews and meat dishes, using tomatoes, corn, lima beans, peas, okra, onions, carrots, turnips, potatoes, summer squash, dried and green peppers. One popular mixture combines equal quantities of lima beans, corn and tomatoes.

A leading American steel company claims to have continued in the business for 68 years without once taking a strike or any labor difficulties.

Mrs. Daisy Maffett, Flemingsburg cafe owner, was arrested Monday on a manslaughter charge in connection with the death of J. E. Soper, Paris, traveling salesman, who died last week of a Paris hospital as the result of injuries sustained when his car collided with the automobile of Mrs. Maffett.

Big $1 Bottle For Only 49c
HOPKINS DRUG CO.

Indian Trade Will drive Away Pimples, Blotches and Boils. Don't let that poison from the blood in system cause you to look like a freak. Get rid of it with Mohawk Blood Tonic. Get a drink at your Drug Store Soda Fountain. Keep a package in your home medicine cabinet.

MOOREFIELD

Maurice Reid spent several days the past week visiting Orrel Hon- ard at Helena.

Miss Helen Gadgell spent the week end with her grandparents, Mr. and Mrs. H. C. Wake.

Mr. and Mrs. David McKinney were guests of Mr. and Mrs. L. J. Yarbrough last week.

Mr. and Mrs. Walter Monical and daughter, of Indiana, and Miss Ruth Monical, of Lexington, were guests of Rev. L. A. Garrard several days last week.

Mr. and Mrs. Homer Blough motored to Richmond Saturday and were joined by Mr. and Mrs. Will Ault on a visit to Old Kentucky Home, Lincoln Memorial, Mammoth Cave and other Kentucky historical points.

Mr. and Mrs. Powell "Berry" were guests of Mrs. J. T. Bloom Sunday.

Miss Cordie Grace Allen is visiting her parents at La Grange.

Charlie Irvin became seriously ill Monday night and was removed to the Good Samaritan hospital in Lexington for treatment.

Misses Irene and Jeanette Mitchell were week end guests of Mr. and Mrs. Adrian Clary.

Miss Mary Robinson, of St. Paul, Virginia, came Monday for a visit to Mrs. Ward Mrs. Howard Irvin.

Mrs. Hoy Blount and sons were week end guests of Mr. and Mrs. R. E. Blount.

Miss Ruth Clark gave a miscellaneous shower Friday afternoon at the home of her parents for Mrs. Charles Brace, of Louisville, a recent bride. About twenty-five guests were present. Refreshments of ice cream, cake and candies were served. The white decorations were artistically carried out.

Mr. W. W. Ring and daughters, Marjorie and Helen, and Mrs. Llewellyn Holmes, visited Mrs. Ring's brother, Mr. Jesse Mitchell, at Mammoth Cave and other interesting points in that section.

Rev. Will Burns of Alexandria, Indiana, is conducting a revival meeting with his nephew, Dr. L. B. Holmes.

Mrs. J. H. Wilson and daughter, Joan, returned Sunday from Lexington where they had been for several days. She was accompanied home by Mrs. and Mrs. Chickenbread.

Mrs. Rob Blount was the guest of Mr. and Mrs. Ben Brandon at East Union several days last week.

Several of the young people attended the D. P. M. at Ruddells Mill last Monday night.

The zone meeting held at the Union Church Sunday was well attended. Speakers from a distance were Rev. Jones, of Millstone, Christine Gaither, of Ga. La Grange.

MYERS

(Jessie Parsons, Correspondent)

Mr. and Mrs. Elmer Jolly and son spent Monday night with Mr. and Mrs. Ed Cooper.

Mr. and Mrs. Walter Minton and two daughters and Mr. and Mrs. Carl Morris, of Cynthiana, spent Sunday afternoon with Mrs. Margaret Minton and family.

Ben—To Mr. and Mrs. Leonard Hall, August 18, a son. He has been named Leonard Martin.

Mrs. Margaret Minton spent the past week with Mr. and Mrs. James Sadler.

Earl and Stanley Thomas Mc- Cann are spending the week with their father, Cecil McCann at Cincinnati.

Winston Berry spent Wednesday night with her mother, Mrs. Myrtle Berry.

Mrs. Stella Hamilton spent Wednesday with Mrs. Ollie Finch at Carlisle.

Mr. and Mrs. Joe Walton and two children were guests of Mr. and Mrs. Jessie Parsons Sunday.

Miss Ruby Sue Cheeks Cooper spent the past week with their parents, Mr. and Mrs. Edward Cooper, of Mt. Zion.

Misses Bettie Bowen and Katherine Flax spent Monday with their aunt, Mrs. Levi Hendrix.

Mr. and Mrs. Levi Hendrix and children visited Mrs. Fannie Barnett the past week.

MIRANDA

Mrs. Cosby Burgess and grandmother, John Burgess of Chandler, Oklahoma, and Mrs. Jesse Burgess of Moorefield, spent Sunday with Mr. Lowery and family and Mrs. Sophia McCabe, of Mt. Olivet.

Rev. R. M. Myers spent the week with her mother, Mrs. Jessie Collins, of Cynthiana.

R. C. Grover had a valuable horse to kill lately by poisoning.

A number of friends of Mrs. L. C. Miller gathered at her home Saturday to surprise party one day last week.

STONY CREEK

Mrs. Ora Anderson and children and Mrs. Dessie Hall spent Sunday with Mr. and Mrs. Wilbur Anderson.

Mr. and Mrs. Roy Hardin spent Sunday with Mr. and Mrs. Wilbur Fisher.

Mrs. Anderson and children attended a family reunion at the home of Mrs. Ackerman Sunday.

John Hall, Raymond Hall and Wilbur Anderson spent Friday in Lexington.

Mrs. Lute Anderson and baby daughter were guests Monday of Mrs. Ora Anderson.

Mrs. Dessie Hall spent Sunday with her mother, Mrs. Dora Sellers, at Centerville.

SCRUB GRASS

(J. P. Minton, Correspondent)

Miss Blanch Minton, daughter of Mrs. Nancy McCarty spent Saturday with relatives at Carlisle.

Russell Hillsdon spent Thursday with F. H. Bowles.

Mr. and Mrs. Bush Reid had as their guests Sunday, Mr. and Mrs. Gene Bowles and children, Mr. and Mrs. John Hilander and three children.

Mrs. Taylor Bowles, Miss Judie Hill, Mr. and Mrs. Levi Hendrix, Misses Henders and Bertie Bowles spent Sunday with Mr. and Mrs. Marshall Walton.

Mr. and Mrs. P. H. Bowles and George Bowles spent Sunday with Mr. and Mrs. Russell Bowles and son.

William Parsons and Ida Mae Morris, J. W. and Omer Parsons spent Sunday afternoon with Mr. and Mrs. James Minton.

BANTA

(Martha Walton, Correspondent)

Mr. and Mrs. Hanson Walton and family spent Sunday with Mr. and Mrs. Frank Walton and family at Stony Creek.

Mr. and Mrs. Clarence Prather and Frank Carmichael spent Sunday with Mr. and Mrs. E. L. Stamper at Little Rock.

Mrs. Ed Bowen spent Sunday with her mother, Mrs. Jessie Shumate, of Ellisville.

Mrs. Hanson Walton and three children spent Wednesday afternoon with Mrs. E. L. Stamper.

Martha and Josephine Walton spent Wednesday with Mrs. Marshall Walton and Mrs. Russell Bowles, near Myers.

Hanson Walton spent Wednesday with and Mrs. and Bill Flynn, of Pleasant Valley.

Mrs. D. L. Hamm is some better at this writing.

HOOKTOWN

Mr. and Mrs. Millard Owings, of Lexington, spent the week end with Mrs. Owings' mother, Mrs. Hattie Collier.

Coley Ritchie and wife spent Tuesday with Eddie Rogers and wife at Colville.

John Marshall and wife spent Sunday with J. A. Marshall and wife.

Mrs. Kash Grimes spent Thursday afternoon with Mrs. Coley Ritchie and daughter.

Miss Elizabeth Wood, who has been spending the summer with relatives in Hillsboro, Ohio, came last week to spend a few days with her sister, Mrs. Paul Moore. Miss Wood and her brother, Jim Billy, will leave in a few days for their home in St. Louis, Mo.

N. A. Moore and wife spent Wednesday evening with Coley Ritchie, wife and daughter.

Father and Son Are on Same Ship

Not often do father and son serve concurrent terms in the naval service. Here are Joseph W. Dowd, storekeeper first class, and his son Francis, seaman, both aboard the U. S. S. Pennsylvania, flagship of the United States fleet. They were with their ship on recent maneuvers in the Pacific.

ROSE HILL

Mr. and Mrs. Glenn Lee and daughter visited Mr. and Mrs. Chap Ritchie Sunday.

Mr. and Mrs. Russell Ritchie, Mrs. Dora Mynear and children and Rev. Finch spent Sunday with and Mrs. Ted Mynear.

Mrs. C. M. Hill spent Sunday with Mr. and Mrs. Elmer Ritchie.

Misses Anita and Wanda Ritchey were Sunday guests of and and Elloree Earlywine.

Roy Earlywine and family spent Sunday with relatives in Millersburg.

C. M. Hill took dinner with Herbert Morris Sunday.

Rev. Finch preached here for the last time Sunday night. We regret to lose these good people, who have meant much to our church and community during the time they stay. We can surely recommend these good people to any field to which they are sent.

MILLER

Mary and Thurman Wagoner were visiting their cousin, Ida Marshall this week.

Wilma Letcher was the week end guest of Misses Estella Caswell.

Mrs. Kenney visited his sister, Mrs. Joe Kenney Friday night.

Mr. and Mrs. E. J. Caswell had as Sunday guests, Mr. and Mrs. Charlie Caswell and son, Mr. and Mrs. Bob Caswell and daughters, Dolly and David Jones and Miss Ruth Caswell.

Edwin Caswell and Cecil Mc- Carty visited Marvin Kenney Sunday.

COMMISSIONER'S SALE

NICHOLAS CIRCUIT COURT
W. Nathan Young Admr. etc. Plaintiff

Vs. Notice of Sale in Equity
Mary Bagby, et al Defendants

By virtue of a judgment and order of sale rendered in the Nicholas Circuit Court, in chancery cause above styled and numbered Master Commissioner of said Court, will on

MONDAY, SEPTEMBER 7, 1936

being Nicholas County Court Day, at or about the hour of 10 o'clock, p. m. offer for sale at public auction to the highest bidder, at the court house door in said county, Nicholas County, Kentucky, on a credit of six, and twelve months, the following described lands:

Situated in what is known as Bagby Addition to the southern of the City of Carlisle, Nicholas County, Kentucky, and being a part of the land inherited by Mary Bagby Young from her father, John W. Long, as appears of record in Deed Book 21 page 95 Nicholas County Court Clerk's office, and is known and designated on the plat of said addition as lots No's 3, 4, 5 and 6 and 11, 12 and 13 in Block 1 of said Bagby Heights recorded in D. B. 31 page 501 said office.

But excepting that portion of lot No. 6 conveyed by Mary Gilbert Reed on July 5, 1921, by deed recorded in M. E. Stamper's 136, and that portion of said lot No. 6 conveyed by M. E. Stamper on July 5th, 1924, D. B. 37 page 136.

Also excepting therefrom that portion of lot No. 6 to be sold out of the City of Carlisle and Shumate Addition to the land conveyed by Mary Reed September 22nd, 1922, D. B. 34 page 500 said office.

The foregoing exceptions being intended to include all parcels of deed of Georgia V. Young and Husband to said Henry Reed for more particular description reference is made to said deeds.

A further provision in said deed that it is understood and agreed that the property therein conveyed is never for the party of the second part, or anyone who may hereafter hold title to said property or by through him, be leased, rented or conveyed to any colored negro blood in their veins.

The purchaser will be required to execute bond with approved surety for the payment of the purchase price to him, have the force and effect of a replevin bond bearing legal interest from date of sale until paid.

Said bonds payable to William Conley, Master Commissioner Nicholas Circuit Court.

A lien will be retained on all the lands sold herein to secure the payment of the purchase money bonds.

William Conley, Master Commissioner N. C. C.
I. B. Ross, Atty. for Plffs.

The L & N is your "HOME SWEET HOME" on the Rails

YOU ARE INVITED to be a guest of the Louisville & Nashville Railroad in one of the finest and most modern homes in the world today.

In it you'll find the cool, refreshing comfort of complete air conditioning—no dust—no noise—the last word in restful ease. You'll also find cheerful lounging and dressing rooms, clean wash rooms, splendid food, delightful sleeping quarters, intelligent and friendly service. For utmost safety, comfort and convenience, there is no better home anywhere.

To maintain this home-on-wheels and other L & N service, 26,000 people get employment, whose wages total $40,000,000 per year. Many additional millions of dollars go into equipment, roadway and supplies, and into taxes which help support your schools, your highways, and your federal, state, county and city governments.

So you see, the L & N, like your own home, is an asset to your community—a paying asset that earns and deserves the same fair treatment from our lawmakers that you'd want your own or your neighbor's home to have.

We hope you'll think of the Louisville & Nashville Railroad that way. And when you travel, by all means make the L & N your "Home Sweet Home on the Rails."

The Route of Southern Courtesy

Railroad passenger rates throughout the country, today are the lowest in history

RECALL MYSTERY DEATH

The fatal shooting last Saturday at San Diego, Calif., of Edward S. Stewart, of Louisville, Ky., recalled to residents of Winchester the mysterious death of the 32-year-old son of the youth's stepfather, Dr. P. C. Edwards, professor of romance languages at Kentucky Wesleyan College.

Dr. Edwards disappeared during the summer of 1933. Several weeks later his body was found floating in the Ohio river near Kenova, W. Va.

Unknown in that vicinity, his body was buried, unidentified.

A year later, Dr. E. E. Curry, Winchester dentist, established identity through dental work. Examination of the body was ordered in 1934 by the governor of West Virginia.

The cause of Dr. Edwards' death was never determined.

Fred M. Chilcott, 23, former San Diego State College art student, was charged with murder in connection with Stewart's death.

Clear boiling water will remove tea stains from table linen.

PLANTING SOUTHERN TREES

(Asheville Citizen)

The Americus, Ga. Times-Recorder points out that approximately 48,000,000 seedlings, most of long leaf pine, were planted in the South between December 1, 1935, and May 1, 1936, in the great tree-planting program ever undertaken in this region. The enterprise was carried out by the United States Forest Service and the actual planting work was done with CCC labor.

This report testifies to satisfaction with and should dispel the oft-expressed fear that the establishment of paper mills in the South will dangerously reduce our supply of slash pine.

BASEBALL REVIVING

(Lexington Herald)

In big leagues, bush leagues, diamond ball leagues and on the sand lots, baseball is reviving. At the first of the week, President Roosevelt sat on the sidelines and couched the newsmen attached to the White House as they played against the radio announcers captained by Lowell Thomas for many years. Presidents have thrown out the first ball for the opening game of the year in Washington and the Democrats have played the Republicans members of congress.

This year big league grounds have been crowded as never before. The same is true of the royalty reviving bush leagues.

Diamond ball is, perhaps, more truly a popular sport than league baseball. Here volunteers play in the parks, without charge of admission, and here one doubts the popularity of diamond ball in Lexington just ask John Cridley or attend a game at Woodland Park.

Baseball is the national pastime. The fact that it is flourishing is a good sign. When the nation plays it is healthy, prosperous and going on the right road.

Dr. Fernando Sanford, of Palo Alto, recently announced through the Smithsonian Institution that the positions of Mercury, Venus and the earth have a marked influence on the intensity of sunspots.
