**THE FARM AND HOME**

Kentucky Agricultural Experiment Station

Spring spraying is essential to the control of numerous diseases according to a circular, entitled "Fruit Crops in Kentucky," published by the College of Agriculture, University of Kentucky. That control means have been found in various forms of insecticides, which may be sprayed on fruit trees, shrubs, and vines.

It is recommended that the spraying be done in the early part of the season, before the fruit has begun to set.

It is also recommended that the spraying be done in the early part of the season, before the fruit has begun to set.

**Seven Million Trees Planted in Kentucky**

Approximately seven million trees have been set in Kentucky, the Soil Conservation Service announced in the vicinity of Middlesboro, Ky., June 3, 1936.

The trees were planted in the vicinity of Middlesboro, Ky., June 3, 1936.

The trees were planted in the vicinity of Middlesboro, Ky., June 3, 1936.
