Suggests Adequate Wiring Of Houses

In connection with the annual rural electrification program in the state, the University of Kentucky College of Agriculture suggests adequate wiring for farm homes. Attention is called to need at times for extensive wiring in order to provide electricity for many farm duties, switches and outlets should be placed conveniently for operation.

THE FARM AND HOME
Kentucky Agricultural Experiment Station Bulletin

A farm woman usually should have a capacity of 45 gallons per hour, a pressure per hour, and a pressure per cow, 2 gallons per hour, per 100 chickens, and 4 gallons per 100 chickens.

Measures about half of a pint of soft daily per head for cows, and 1 pint per head for horses, mules; add before them to a trough or in the stall so that it is watered from it.

Now even sometimes cases for the use of Superior Concrete and most farmers endeavor to make their own concrete on the job. A combination of water, sand and gravel or crushed stone, when well hop a hard, durable material which can be made to withstand severe abuse and to last for generations. Concrete is very much cheaper for lights and power on the farm.

A study of sheep raising, made by the Kentucky College of Agriculture, shows that farmers who sell their lambs before they weigh 80 pounds receive an average of 81 cents per head. Lambs that weigh 80 pounds or more bring an average of $1.13 per head.

Milk and cream kept in tight-covered containers tend to develop undesirable conditions of odor and flavor. It is better to cover milk and cream with a loose fitting of milk or by placing the cans in cold water is important especially in summer.

THE GARDEN
GETTING READY FOR THE WINTER
By John S. Gardner, Kentucky College of Agriculture

For the past few weeks, many folks have been preparing the garden to go into the winter without the attention that is likely to occur in this season and to make it better in the spring. As we survey both ends, the sowing of a cover crop and the mulching of the crops, washing of the soil, and, planned early lacking in most gardens. Cover crops are usually sown in the fall, used primarily as gardeners who have no other way of supplying humus matter; gardeners who have a small garden generally grow humus, which is, after all the best fertilizer.

Assuming now, that manure can be had in adequate amount and that the garden is level or nearly so, the following cover crops may be used:

In instances previously discussed, the weeds should be pulled up and thrown on the pile to be kept removed, or if let go until they are dry, they can be cut up and composted, removed with the spading fork and buried or put in piles to rot, the wood ashes should be scattered over the cleaning up progresses, grasses and weeds should be treated in the same time, a suitable seed sown, and the soil left in the best condition possible. The garden is now as convenient as not be worked over in the spring, but it will be in much better condition if worked over in the fall.

When the garden is frozen hard, easy to drive into manure should be spread. It should be gone fresh as soon as made, in fact the best time to consider the maximum amount of plant food is to add manure generously every year and although there may be some loss of plant food and some leaching, the soil absorbs most of the fertilizer and holds it for the use of later gardens. portions are naturally lacking in a great extent, also in sections in which there are considerable amounts of clay soil manure is backed up for the winter freezing this material will be found very beneficial to the soil. Manure contains a large amount of vegetable matter which helps to loosen the soil and to hold moisture. If manure cannot be had for putting there is no use to sow the one or another of the cover crops mentioned. If manigrain garden is not large enough to make it worth while to use manure, commercial fertilizer may be used.

There are two reasons why a large number of finished bird mates the best eating, says J. Marvin Peterson, of the Department of Animal Industry, in the first place the 10 pounds and less little or no fat, which is necessary to full juicy, tender meat. Secondly, the breast is unfavorable in making scrawny, and shrunken appearance. The full amount of breast and leg meat is added in the last 4 to 5 weeks of feeding.

Abraham Lincoln was 56 years of age at the time of his second term.

Lesson for September 19

CHOICES AND THEIR CONSEQUENCES IN A NATION'S LIFE

LESSON TEXT—Deuteronomy 11:8-15, 26-28; 30:15-20.
GOLDEN TEXT—Choose you this day whom ye will serve.—Joshua 24:15.
PRIMARY TOPIC—Choosing Right Things.
JUNIOR TOPIC—Choosing Right Things.
INTERMEDIATE AND SENIOR TOPIC—Choices and Their Consequences.
YOUNG PEOPLE AND ADULT TOPIC—Choices and Their Consequences.

Nations as well as individuals are constantly making the choices by which their destiny is determined. They enjoy the blessings of right choices and suffer the penalty of wrong moral decisions. While it is true that the moral leaders may not always receive the credit due them for their service, it is generally true that there is a sort of automatic reward for even a longer period of time accompanies the choices of the people as a whole.

Ignorance cannot be an excuse before God, for the Word of God is available to all. Moreover, the testimony of history and the experience of mankind declare the consequences of true religion, of honesty, of moral uprightness, and the results of moral indifference and outright wickedness. While it is true that the final verdict does not always rest in this life, yet the principles of God's Word are so clear that they are understood by all. The application of these principles to the affairs of life is effective, and in fact the only really effective way to bring the affairs of life in a revised within the church of Christ and a true application of its service in winning men to Jesus Christ as their Lord and Saviour. A 50-page booklet Lessons in Soul Winning by Dr. Lunger, Director, will be sent by the writer without charge to those requesting it. It possibly enclose a 3 cent stamp.

I. God Chooses Right Things (vv. 8, 9).

Making the right choice is in fact a simple matter, for it means only that we choose to do the things which God is the author of the moral law. He alone can and does determine what is right and wrong. Man has not determined this, nor is he equipped to decide that question. He can and must relate the affairs of his life to the law of God. How important it is that we should understand that law, and what holy it is to neglect the study of God's Word, where the commandments of God are found. Moses declared to the Israelites that the way means for such blessings as the nations which they make up the congruity is in the final analysis myself, and other individuals like **me** the assurance of God's blessing **and prosperity.**

II. God Encourages Right Choices (vv. 10-12).

The God is the great and untiring "giver of every good and perfect gift." We must look to Him for our eyes and look at His handiwork, or stir up our memories to recall his goodness, and we know that he is not a God who removed from age us to do right—to live right.

But, alas, all too often God's choicest gifts are perverted and are used to bring the very opposite result. The most beautiful lakes and natural scenic surroundings are used for resorts and clubs which all too often are a menace to the moral structure. Parents allowed their children to grow up with little attention to spiritual things, and the devil are constantly and "accidentally" led to women, whose very God-given beauty may be used to glorify the Lord, are often used for disobedience to God.

III. Right and Wrong Are Fundamental and Eternal (vv. 26-28).

In the realm of moral and over Again in these tedious and indifferent days that there is laid down in the very constitution of the universe distinction between right and wrong. Right is always right, and wrong is definitely and eternally wrong. There is no room for neutrality here, where things are neither white nor black, but a neutral gray.

Note that the difference between good and evil is to be the curse "on the other side of the Jordan." The curse and the blessing are never to change moral law. What was right in the days of the great grandfather is right or wrong for you. What was wrong in your mother is wrong for you is right in the city where you now live is right or wrong. The passing of the years or a change of residence does not alter the fact of right or wrong.

May God help the people of our land, and all the countries of the earth, to remember that it is still true that "righteousness exalteth a nation; but sin is a reproach to any people" (Prov. 14:34).

A Season

To everything there is a season, and a time to every purpose under the heaven: a time to be born, and a time to die.—Ecclesiastes 3:1, 2.

In the Silent Watches

While alone and in silence, man can commune with himself.—Van Amburgh.

Flood of Ambition

Ambition like a torrent never looks back.

State Crossing Jobs Cost Is $1,084,167

Federal funds have been used to eliminate 2,400 railroad grade crossings since 1932, Thomas H. Mulroy says on 597 installations and 102 rebuilding projects in 41 states in the Government of $35,855,000.

These with invisible seventeen thousand projects completed at a cost of $46,012, and fifteen projects under construction to cost $1,062,111, 48 additions to eight projects to cost $412,320.

A FARM WOMAN SPEAKS

City dwellers who have sorry lives on farms should read the following letter, written by a farm woman, who had been forced to spend many years in the city before she could get back to the country.

"Think of all those years I vegetated in a city when all the while I longed for the sound of a cow lowing for the odor of fresh-plowed ground, for the spring peepers, for the moist, fragrant, garden, chickens, all that goes with country life—and living, the only real living in the world.

"I have pored over seed catalogues in spring and I have planted in cities, have kept alive plants of country in my window for years, until finally it came true. I left for good. Gradually I have put my dream of a cabin home and peace in the North Georgia mountains.

"I have my struggles, of course. Who hasn't? But I'm getting through.

"I have my hungry hand of friendship and that others. Even the dreadful hot spring months quickly are gone. I turn to a little garden on the field and I am happy. I have a real home to call and to market of a small price. I have my own chickens for dreams had I thought to realize them in a few short years. Those were marketed in town at a price. I have my own fruit and fuel. And to see a green garden in the spring is to know that there is something else added. It was the joy of creation, the joy of spring right imaginable. It was the joy of creation, the joy of determination and inspiration and hope.

"I am sure, at the close to the Lord's day, that I have not yet found formed by trees about the eaves of the cabin porch, in my yard. Birds are crowds at my back door, build nesting places in the trees close by. A mocking bird starts off my day right as it broadcasts its early day greeting from a peach tree front in my front yard.

"I have the best neighbors on earth, and I take in every country life and share one with another. I am a member of a living family. When sickness comes I help do the family. I call it exchanging labor—about the only kind of exchange left in country life. I call it exchanging labor, and it is the application papers and time Grant adopted this as his motto. Grandma Hixon, as one old Lobanof."

The Railroad Problem . . . and You!

September 14, 1937

To the Public:

THE Association of American Railroads has successfully shown through a series of advertisements during the past year that the railroads remain the outstanding transportation industry of the Country. It has shown that they are dependable and progressive; are necessary agencies of distribution in times of peace, and of defense and offense in times of war; and that not only are a million people directly employed by them, but that the life of virtually every citizen is in one way or another affected by their service.

The impression has been gained by some that all railroads are prosperous. This is partly true of only a very few. **The reverse is** true for the industry as a whole. In 1936 when the depression was over, the Net Income of all railroads was $164,630,000. This was the amount available for improvements, reduction of debt, and dividends; yet even in that year railroads operating 38% of the country's total mileage had no net income at all, and about 30% were in the hands of receivers or trustees.

Now, what is the situation for 1937? The Net Income, which in 1936 was $164,630,000, is subject in 1937 to the following adverse influences, which are already in effect:

Loss of emergency freight rates, authorized during depression by Interstate Commerce Commission, and cancelled December 31, 1936, which produced in 1936 additional revenue amounting to	$150,000,000
Estimated increased cost over 1936 of materials and supplies being used in 1937	125,000,000
Estimated increased charges over 1936 of Social Security and Railroad Retirement taxes for 1937	59,000,000
Wage increases granted certain employees of 14 non-operating brotherhoods on August 1, 1937, costing about $90,000,000 per year; estimated effect on year 1937	41,000,000
	$375,000,000

These four items total $375,000,000, which is $210,370,000 greater than the entire net income of 1936. For the railroads to break even in 1937, they must, in view of the foregoing loss of revenues and added expense, handle nearly 30% more traffic than they did in 1936. The actual increase in ton-miles for the first eight months of 1937 compared with 1936 was only 11.9%.

In addition to the above, the following items of increased cost are pending:

Demand of five operating brotherhoods for 30% increase in wages, equal per year to	$114,000,000
Proposed law, sponsored in Congress (the bill has already passed the House), to reduce railroad labor operations to "on the other side of the Jordan." The cost per hour basis to power to change moral law. What was right in the days of your grandfather is right or wrong for you. What was wrong in your mother is wrong for you is right in the city where you now live is right or wrong. The passing of the years or a change of residence does not alter the fact of right or wrong.	150,000,000
Total	$114,000,000

This figure added to the $375,000,000 above, makes the huge total of $489,000,000 per year, or three times greater than the actual net income of 1936.

It is self-evident that by any thinking person, therefore, that with such additional burdens imposed on the railroads, a serious situation exists. One of two things is inevitable: Either higher freight and passenger rates must be obtained to offset these increases, or practically all the remaining roads will be bankrupt. This means that the living expenses of every citizen will be higher through increased cost of transportation, or there will be government ownership, with its consequent illa—heavier taxes to pay the cost of buying the railroads, loss of taxes now paid by the railroads, inefficient service and unusual deficits to be made up by additional taxation.

In either case, the welfare of the public, as well as that of the railroads, is at stake. Nothing can be done about the increased burdens already in effect amounting to $375,000,000, except to the extent that increased rates may be granted by the Commission. There is still time, however, to prevent the pending increases of $216,000,000, but to do so imperatively requires the strong influence of public expression against such demands. The railroads have refused the demands of the five operating brotherhoods for increased wages; the issue may create a fact-finding commission appointed by the President of the United States. The Train Limit bill is pending in the House, and will likely be given special attention by Congress next January.

The citizens of this country are so vitally affected by these two questions that they should oppose them in every reasonable way.

Further details of these and other railroad matters will be discussed in future statements.

J. Bell
President
Louisville and Nashville Railroad Company

NEWS OF KENTUCKY

Mercury county voted was in a special election held last week.

Dr. Lloyd Mercer county to succeed a vote of 2,000 to 849 in a special election Saturday.

The last issue of the Grand Circuit will be held at Lexington on September 23 to October 2.

The Kentucky School for the Deaf at Danville opened its 110th session Wednesday with 375 students enrolled.

Mrs. Sarah Bashford, 83, died at her home at Mt. Sterling Saturday of injuries sustained two weeks before in a fall.

Henry M. Hobkinson has been retired on pension by the L. & N. Railroad after 53 years of service at the depot in Bardstown.

Melvin Petty, 36, postmaster at Picnic Arbor county, was lodged in jail Monday on a charge of an fraction of the postal laws.

The postoffice at Cropper, Shelby county, was robbed of $150 in stamps Sunday night. All mail in the postoffice was opened.

More than 1,000 convicts in six ty departments are being offered subsistence of the University of Kentucky, which opened Monday.

The 111th annual conference of the Methodist Episcopal church opened at Nazrel Tabernacle in Bishop Titus Lowe of Portland, Ore., presiding.

Rev. Charles K. Hoagland, 61, superintendent of the Kentucky Baptist Orphans' Home at Louisville, died at Louisville Thursday from a heart attack.

John Milton Gray, who has served as county clerk of Wood ford for 16 years, is unopposed for re-election. His father held the post for 27 years.

George A. Bain, of Lexington, one of the most noted auctioneers of thoroughbred horses in America, has decided to retire permanently after 47 years.

Everett Hensley, 29, Whitley bury laborer, driver, was found guilty of murder and robbed in his cab on Pine Mountain six miles from Whitesburg, Friday.

Melville Hammonds, 26, of Wayne county, was shot dead and killed in a pool tourney at Somerset Saturday by Hoskin Taylor, 26, who claimed self defense.

George Gentz, 13 was accidentally shot and fatally wounded by Clarence Hargrett, 15, while he boys were examining a shotgun in Lincoln county Sunday.

Burkett Lee Pribble has resigned as head freshman football coach at the University of Kentucky in order to devote more time to his insurance business.

Frank M Poe, 85, was gored to death by a bull which he was attempting to drive into a pasture on his farm at Flagg springs, Campbell county, Sunday.

Citizens of Vanceburg have filed a petition with the city council asking that an investigation be made of the advisability of erecting a municipal electric plant.

709 freshmen students registered at the University of Kentucky Monday and it is expected that more than one thousand first year students will enter the University.

Circuit Judge C. D. Newell Saturday appointed W. G. Kenton, Maysville attorney, as master commissioner of Mason county to succeed A. Gordon Sulser, who resigned.

While his 10-year-old daughter watched with horror, Thomas Poe 30, of Louisville, was drowned Sunday afternoon while swimming in the Portland Canal at Louisville.

Thieves broke into the postoffice at Grahnville, Monroe county, Sunday night, and carried away a 500-pound safe containing $145 in stamps and $28 in cash and two money order books.

Witnesses testified before a Coroner's jury at Maysville Friday that Charles McHugh, Jr., 20, was driving his automobile of a speed of between 70 and 80 miles an hour on a Maysville street when it crashed and caused the death of one youth and critical injuries of two others.

Lucille Griffith, 16, and Georgia Bloomfield, 16, both of Grayson, were believed fatally injured and three boys with whom they were riding were seriously injured when the car in which they were riding collided with another car near Grayson Sunday.

Statement Of Financial Condition Of Fair

The following is a true statement of the financial status of the Nicholas County Fair, which has been sponsored by the county for a half a hundred years, and elected each year by those interested in maintaining it as a non-profit organization.

In 1931 the fair was discontinued.

In 1932 with Paul Darnell as President and S. C. Vaughn as secretary-treasurer, balance on hand December, $193.23.

In 1933 with Paul Darnell as President and S. C. Vaughn as secretary-treasurer, balance on hand July 1, 1934, $168.52.

In 1934 with Robert Fisher as President and S. C. Vaughn as secretary-treasurer, balance on hand July 1, 1935, $193.82.

In 1935 with Robert Fisher as President and S. C. Vaughn as secretary-treasurer, balance on hand July 1, 1936, $168.52.

In 1936 with O. C. Rankin as President and S. C. Vaughn as secretary-treasurer, balance in bank July 1, 1937, $73.84; cash on hand, $3.56. Balance on hand $77.34.

The statement is being printed to correct rumors of large amounts being held in the banks. This is a true statement of the status of the Nicholas County Agricultural Fair, which can be verified by those interested in the County Agent's office.

Signed
R. J. Matson,
Nicholas Co. Agr. Agent

Young Men Desire Duty In China Waters

The Marine Corps Recruiting Station in Cincinnati, Ohio, has received numerous requests from young men of Carlisle, who desire to enlist in the Marines for duty in China waters. While there are no Marines stationed in the Far East, 1200 of which are now enroute to Shanghai it is impossible for the recruiting office of the District of Cincinnati, which embraces Carlisle, to promise young men that after enlisting they will be sent to the Marine Brigade at Shanghai, or to the American Embassy Guard at Peiping, North China. Young men are enlisted for general service in the Marines, and upon enlistment of enlistment at Cincinnati, are ordered to the Marine Barracks at Parris Island, South Carolina, for recruit training. On completion of recruit training, which usually takes about three months, recruits are transferred to Quantico, Virginia, or to the United States Marine Detachments aboard battleships and cruisers, or they may be transferred to Cuba, Canal Zone, Guam, Hawaii, or the Philippine Islands. Many are transferred to the marine units in China as replacements for those who return to the United States after the duty of duty has completed their tours of duty required by law. In this connection it is possible to make a choice of time as to where a man will be sent. Marines are ready to go anywhere at anytime and the expense of the service determine the place of duty of the individual or the fully organized unit. The furtherance of education, the opportunity to travel and the variety of duty make the life of a marine full of interest and one.

Young men desiring information concerning the Marines are asked to call at the Marine Corps Recruiting Station, Cincinnati, Full information and literature will be sent upon request.

Tobacco Estimate Raised Corn Production Lower

The Department of Agriculture Friday forecast a crop of 2,545,281,000 pounds. A month ago the crop was estimated at 2,658,748,000 pounds. The drop was attributed to cool, wet weather in dry spots in plants.

Spring tobacco production was estimated at 197,925,000 pounds, being somewhat estimated from the production this year to 885,900,000 pounds.

The indicated yield per acre of corn, based on a September 1 condition of 76 per cent of normal, was 23.5 bushels and was the highest in recent years. The department estimated farmers should harvest 90,146,000 acres of corn.

The condition of spring wheat, the last to be harvested, was reported 94 per cent of normal on September 1. Yield per acre was estimated at 14 bushels.

Production of virtually all grains was the largest since 1931. Estimated corn production was almost double last year's crop of 1,529,372,000 bushels. Wheat production compared with 626,451,000 in 1936.

Tobacco production was estimated at 1,448,875,000 pounds. Production on September 1 condition, an increase of 2 per cent over the August estimate.

The estimated figure was about 26 per cent greater than the 1,153,083,000 pounds harvested in 1936. The department said the prospective production of burley, estimated at 352,200,000 pounds as of September 1, represented little change from that of a month ago. The 1935 burley harvest was 218,254,000 pounds.

Masonic Lodge Meeting To Be Held In Cave

Masonry will see something "new under the sun" when Washington Meredith Lodge, No. 351, Brownsville, confers the Master Mason's degree with Mammoth Cave on the night of Thursday, September 23.

Charles E. Whittle, Masonic lecturer for the counties of Allen, Barren, Edmonson and Hart, has arranged for a district meeting to be held in Audubon Avenue, one of the main streets in the dining chambers in Mammoth Cave, on that date. Judge Isaac B. Ross, of Carlisle, Grand Master of the Grand Lodge of Kentucky, and the other officers of the Grand Lodge will be guests of honor. Washington Meredith Lodge will act as host, and all Masons of Kentucky are invited to join in the visitation.

The principal attraction of the program will be the address of Grand Master Ross immediately after the degrees is conferred in the degree team of the local lodge.

There will be no charge for admission to Audubon Avenue in Mammoth Cave where the meeting will be held.

Bare Lands Need Winter Overcoat For Protection

Winter overcoats will be needed for bare lands, to keep the soil warm but to keep it at home, according to D. O. Wooley, superintendent of CCC Camp Carlisle, operated under supervision of the Soil Conservation Service.

Winter cover crops have a dual purpose of protecting the soil against the erosion and increasing the fertility of the land. Mr. Wooley said that a good ground cover established during the fall growing season will provide protection against rains of winter and early spring.

Cover crops which have made good growth before winter sets in will also provide more material to be plowed under in the spring, he explained. This green manure will increase the fertility and humus content of the soil and enable it to absorb more water, thus further reducing the erosion problem.

Getting a good growth of winter cover crops while highly advisable may sometimes present a problem, Mr. Williams warned. Proper treating and seed bed preparation, and moisture conditions at the time of planting must also be considered. He suggested, that the following crops, amount of seed per acre and the date of seeding be as follows: rye August 20 to October 1, 6 to 8 pecks; wheat, October 5 to 15, 5 to 6 pecks; barley, August 20 to September 20, 6 to 8 pecks; crimson clover, July 20 to August 30, 15 to 20 pounds and vetch July 15 to August 15, 30 to 40 pounds.

Nicholas and Bourbon county farmers are already planning to use extensive acreages to these cover crops to provide pasture for the land during the season when the land is usually idle of vegetation.

Kentucky Burley Growers Faced With Labor Shortage

Kentucky burley tobacco growers are been facing a labor shortage that threatens the 1937 crop.

Reports from the burley growing areas, the State Department of Agriculture at Frankfort, said, indicated a crop this year ranging from 240,000,000 to 320,000,000 pounds as compared with approximately 300,000,000 last year and 275,000,000 pounds for the year before.

Tobacco experts figured the price would be slightly less than last year's average of about $35 per hundredweight for good grades of burley. The 1935 price was $21.95 per hundred.

"This year's crop is not expected to weigh up as heavily as last year's due to the wet weather.

Reports from the burley centers of the state indicated the growers were attributed to cool, wet weather in spots in plants.

Spring tobacco production was estimated at 197,925,000 pounds, being somewhat estimated from the production this year to 885,900,000 pounds.

The indicated yield per acre of corn, based on a September 1 condition of 76 per cent of normal, was 23.5 bushels and was the highest in recent years. The department estimated farmers should harvest 90,146,000 acres of corn.

The condition of spring wheat, the last to be harvested, was reported 94 per cent of normal on September 1. Yield per acre was estimated at 14 bushels.

Production of virtually all grains was the largest since 1931. Estimated corn production was almost double last year's crop of 1,529,372,000 bushels. Wheat production compared with 626,451,000 in 1936.

Tobacco production was estimated at 1,448,875,000 pounds. Production on September 1 condition, an increase of 2 per cent over the August estimate.

The estimated figure was about 26 per cent greater than the 1,153,083,000 pounds harvested in 1936. The department said the prospective production of burley, estimated at 352,200,000 pounds as of September 1, represented little change from that of a month ago. The 1935 burley harvest was 218,254,000 pounds.

The City of Paris, France, publishes more daily newspapers than any other city in the world. It has been estimated that Paris has as many daily newspapers as the cities of New York, London and Berlin combined.

Ed Hargis, 44, chief of police of Burnside and Democratic nominee for Sheriff of Pulaski county, and a companion, Ray Wallace, 21, both received fractured skulls and other injuries when their automobile plunged off a 50-foot embankment near Burnside Saturday night.

During a recent year, more than 890,000 was found in letters, opened at the dead letter office at Washington.
