KEEP YOUR HOME COMFORTABLY COOL

with Attic Ventilation

Folks, it certainly whips sweetening summer weather. Gives you a chance to enjoy your evenings. Ends painting and stripping and mopping and scrubbing and quarts of ice-water. Let us have restful sleep every night all summer. Yes, there's no mystery about Attic Ventilation. A quiet, powerful fan blows the stale, terrier air out your house, replacing it with cool, fresh air from outside. Thousands of these "house conditioners" already in use. Operating cool remarkably low.

It blows it right for itself. Or you can have it blow for you. Put one in every bedroom. Put one in every living room.

Fluoride in your teeth.

It is a fact that fluoride is becoming a popular feature in many automobiles.
