40 Million Gallons Added To Berea's Water Supply

Berea's water supply will be increased by 40,000,000 gallons with the completion of a dam in the college forest four miles east of Berea, according to G. R. Kavanaugh, Berea College business manager.

The contract for the concrete construction of the dam was awarded the Cadel Construction Company of Winchester, for approximately $48,000. An additional water line to city limits and other construction work will make the total cost of the dam approximately $100,000. It will be completed in four months.

The core wall of the project will be 450 feet long, with a 70-foot spillway, and will be 35 feet high. The new water line and clearing of the dam site is to be handled by the College Heat and Power Plant, of which G. G. Dick is superintendent. Andrew J. Provost of New York planned the project and William E. Bodenstein, of Cincinnati, is the supervising engineer.

It is believed the dam will alleviate the water scarcity problem that has confronted Berea for several years, and will take care of the increased use of water in connection with Berea's new $350,000 sewer system nearing completion.

Only 40 Guards Left In Harlan County

Adjutant General G. Lee McClain said that the withdrawal of national guardsmen are now on duty in Harlan county and that they would leave in a few days.

Approximately 1,200 troops were sent to the Harlan coal fields in May on Gov. A. B. Chandler's orders that "the law be wanted to work," but they have gradually been withdrawn since the operators and U. M. W. signed a contract.

General McClain said the remaining guardsmen, commanded by Capt. Alvin H. Shutz of Hopkinsville were getting ready to turn over federal property to the Harlan company, due back from the Fort Knox maneuvers Sunday.

Local Guard Unit Wins Softball Cup

Howitzer Company Returns Sunday from Fifteen Days Training At Fort Knox

The two officers and fifty-four of the fifty-five enlisted men of Howitzer Co. 149th Infantry who participated in the fifteen days of field training at Fort Knox, returned Sunday while the other member remained in the Fort Knox hospital suffering from a fractured collar bone. The victim, Private Stanley Sharp, son of and Mrs. Robert Sorey, suffered the broken collar bone last Friday morning while engaged in a friendly scuffle with another member of the organization during the overnight maneuvers. He was taken to the hospital and given treatment and will be able to return to his home in a few days.

The training this year of the 38th Division, of which the local unit is a component, was declared by officials to be similar to regular Army maneuvers and instructors to be the same. The problems presented during the eighteen years the division has been trained together. The 38th Division, composed of approximately 12,000 members of the National Guard from Kentucky, Indiana and West Virginia, is the only National Guard division in the United States that trains together and has been declared the best of any of the National Guard units.

Disorder Reported At Bell County Mines

Warrants were out Tuesday for 40 men, decided by County Attorney Walter B. Smith as pickets, following disorders at the Bell county coal mines where strikes have been in progress several months.

None of those named are charged, Smith said, with firing several shots Monday at three men who returned to work at the mines of the Kentucky Ridge Coal Company in Field, Ky., 12 miles north of Pineville. No one was injured.

The other 31 were accused in warrants of attempting to prevent men from resuming operations at the nearby mine of the Coleman Fuel Company earlier in the day.

Strikes at the two mines followed refusal of the companies to sign contracts with the United Mine Workers Union (CIO), with which employes had voted to join, Smith said. The Kentucky Ridge mine normally employs 175 men and the Coleman company, 134.

Both mines are located in an isolated mountain section of Bell county, which adjoins Harlan county in southeastern Kentucky. The county attorney said about 55 men returned to their jobs last week end at the Kentucky Ridge mine.
