THE chief counsel for the Tennessee Valley Authority told the Kentucky Legislature at a hearing on the electric power bill (Ward Bill 146) on February 3, that T.V.A. would not come into Kentucky unless it could come on its own terms.

It threatens to cripple the developing rural electrification program by giving T.V.A. power systems unfair advantages over the various county R.E.A. co-operative associations.

Kentucky citizens will want to think a long time before they surrender their right to govern themselves and their affairs in every particular.

If Abraham Lincoln were living in his native state today, he might well be warning his fellow citizens—"GOVERNMENT OF KENTUCKIANS, FOR KENTUCKIANS, BY KENTUCKIANS."

WHAT IS THIS T.V.A. "ULTIMATUM"?

1. It demands special privilege legislation giving the T.V.A. unfair advantage over electric power companies and cities which operate their own electric plants.

2. It threatens tax losses to the cities, counties, state and federal governments which would have to be added to the tax burdens of individual citizens.

3. It denies to the people of Kentucky their inherent state's right to regulate and control the operations and rates of the utilities that serve them.

4. Its promised benefits are heavily offset by the dangers and disadvantages of outside control.

Isn't this question broader than the sale of power alone?

It is an issue that vitally affects every taxpayer . . . everyone who works in a mercantile business . . . every doctor and dentist . . . every farmer . . . every freeborn American who likes to call his soul his own.

All we ask is that T.V.A. be required to operate by the same laws and regulations under which all other electric power companies must operate.

ASK YOUR SENATOR AND REPRESENTATIVE TO VOTE AGAINST THIS SPECIAL PRIVILEGE BILL
