A FIGHT FOR OUR LIVES
By Thomas J. Walsh, Managing Editor (Par.) Daily Tribune
Since the funds received from the sale of Christmas seals are used to help in the fight against tuberculosis, those who are pleased in this great work should be find out that they really know about tuberculosis.
It is imperative that we know all we can about tuberculosis for knowledge is our real weapon against the prevention of disease. There is no vaccine for tuberculosis. There is no drug for its cure. The victim who has been afflicted by the disease is left to fight it out on his own. The only way to prevent tuberculosis is by the early detection of the disease. The medical profession and the tuberculosis association have been telling, showing us what we should know about it. They have been telling us that tuberculosis is a disease of the lungs, that it is a disease of the blood, that it is a disease of the system. They have been telling us that it is a disease of the system, that it is a disease of the system, that it is a disease of the system.
