Improved Uniform International SUNDAY SCHOOL LESSON

By HAROLD L. LUNDQUIST, D. D.
Of the Moody Bible Institute of Chicago.
(Released by Western Newspaper Union.)

Lesson for January 11

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

THE INFANCY AND BOYHOOD OF JESUS

LESSON TEXT—Luke 2:25-35, 39, 40, 51, 52.
GOLDEN TEXT—Jesus increased in wisdom and stature, and in favor with God and man.—Luke 2:52.

"Nobody knows what a boy is worth
And the world must wait to see;
For every man in an honored place
Is a boy that used to be."

Jesus was "only a boy" as He grew through infancy and childhood, but in that baby and that boy rest all the hopes of mankind. While He was not just like any other boy, yet His growth and development were normal, and we may learn much that will enable us to help the boy in our home, in our block, or in our church.

The mother of Jesus, in fulfillment of the law of her people, on the eighth day identified Him with the nation (Luke 2:21), and then at the end of 40 days brought Him, with her humble sacrifice, to present Him to the Lord. There a beautiful and prophetic scene took place as the Holy Spirit revealed to godly old Simeon His

I. Complete Salvation—a Baby (vv. 25-35).

The Holy Spirit (not yet come as the indwelling presence in believers' hearts) had come upon Simeon, a man right with God and with a deep longing in his heart for the coming of the Messiah—"the consolation of Israel." He was assured of living until that day, and now as he waited in the temple the babe who fulfilled that promise was laid in his arms.

He blessed God as he broke forth in praise and prophetic utterance. Note the full conception of the work of the Redeemer—deliverance from bondage and fear of death, light to the Gentiles and glory to Israel, a stone of stumbling but also of rising again. A revealer of the hearts of men—yes, and One whose sacrificial death would pierce the heart of His mother.

One is glad that Simeon and Anna (v. 36) and "them that looked for redemption in Jerusalem" saw in Mary's infant son the Son of God incarnate, for round about was unbelief (John 1:11), hatred (Matt. 2:16), and indifference (Matt. 2:4, 5).

II. If not as today? Christmas has just been celebrated. How many saw the babe in the manger as Jesus the Saviour?

The scene changes—the little family is back in Nazareth in the humble home—and there we see

II. Perfect Development in a Boy (vv. 39, 40).

The period from infancy to accountability (12 years) is summed up in the full-orbed growth of the boy Jesus described in verse 40. The one business of every child from birth to 12, or somewhere around there, until the period of adolescence, is to grow without any sense of responsibility except obedience to authority; and obedience in the case of a child is always in order to give the child perfect freedom from everything else, without any sense of responsibility. That is the story of Jesus: He grew!" (G Campbell Morgan).

Growth is, first of all, physical. Jesus stands by the side of every boy and girl as the body grows from babyhood to maturity, for He too knew that experience. We may talk to Him as an understanding friend about the physical needs and problems of our children. Let us remember that here, as elsewhere in Scripture, the physical body is recognized as important.

Mentally, He experienced growth. The strange, apocryphal tales about the child Jesus, representing Him as a man of mature wisdom in a child's body, do not compare even remotely with the beautiful naturalness of a keen-minded boy asking questions, observing, always learning. Boys and girls, you may talk with confidence to Him about your lessons, your growing interest in this exciting world of ours, of your need for guidance in learning. Be sure that He will understand.

The crowning touch upon the growing personality of the child is the spiritual. We read of Jesus that "the grace of God was upon him." "Grace," says Dr. Morgan, "is first, that which delights and charms Christ, secondly, a desire to impart to others the things that make them happy. Grace, finally, is the activity that does this at all costs." A gracious child is an altogether delightful being; and when that gracIousness is the result of the "grace of God" upon him, it is surpassingly lovely, for it makes him Christlike, even in the days of childhood.

Great and grave has been the neglect of the spiritual life of children for whom much has been done physically and mentally. Christian parents must not make that mistake—and they need not, for the Lord Jesus here too stands ready to counsel, guide, encourage, and strengthen them in every good purpose and deed.

Let your answer to bombs be bonds.

A Week Of The War

Twenty-six nations, including the U. S., Britain, Russia and China, signed an agreement pledging their military and economic resources in a finish fight against the Axis and banning any separate peace. The nations also subscribed to "a common program of purposes and principles" embodied in the Roosevelt-Churchill "Atlantic Charter."

The signatories of the declaration include Australia, Belgium, Canada, Costa Rica, Cuba, Czechoslovakia, the Dominican Republic, Salvador, Greece, Guatemala, Haiti, Honduras, India, Luxemburg, the Netherlands, New Zealand, Nicaragua, Norway, Panama, Nicaragua, Africa and Jugoslavia. The declaration may if said, be "adhered to by other nations which are, or which may be, rendering material assistance and contributions to the struggle for victory over Hitlerism."

The War Front

The Navy said it had evacuated Cavite and the Army announced Japanese troops entered Manilla which earlier in the week had been declared an open city by General MacArthur, commanding the U. S. Forces in the Far East. Before entry of the Japanese, American and Philippine troops were withdrawn and all defense installations removed or destroyed.

General MacArthur earlier reported the enemy had "mercilessly bombed churches, hospitals, convents, schools and other civilian institutions in Manila after it was declared an open city, whereas they had only attempted bombing military installations previously. The President sent a message to the Philippine Islands pledging that the United States will redeem and their independence established and protected. During the week, the Navy reported sinking two additional enemy ships and said three U. S. destroyers were attacked, but only slightly damaged.

Production For War

OPM reported $78,212,000,000 has been authorized for war purposes. The President told a press conference that although present spending is at the rate of 27 per cent of the estimated 1942 national income of $100,000,000,000 production will be stepped up so that by next July it the nation will be spending at the rate of $50,000,000,000 a year of the national income.

Asked about reports that Canadian, British and U. S. production would be pooled, resulting virtually in the end of the Lend-Lease program as such, the President said that military production has been pooled since the Japanese attack. The matter of program would be adjusted, he said, and would largely depend on where the articles sent other nations were used.

Ships

The Maritime Commission said the ship-a-day goal in launchings of new ships has been reached and by the second quarter of 1942 delivery should reach two ships a day. The Commission took over 16 Finnish ships being used in the seizure of U. S. ports. The Navy announced launching of a destroyer, a floating workshop and a mine sweeper, and said keels were laid for two more destroyers. The Navy also said it is converting the French liner Normandie in to an auxiliary.

Labor Supply And Training

President Roosevelt denounced as "stupid" and "unjust" the increasing discharges of loyal, efficient workers in American industries "simply because they were born abroad or because they have foreign-sounding names." He said such unfair discharges engender "the very distrusts and disunity on which our enemies are counting."

OPM Associate Director Hill man announced almost 2,500,000 persons have been enrolled for training for war industry work since July 1, 1940. He asked vocational schools to expand their courses to permit use of all their facilities on a "round-the-clock" basis. Some war contractors are planning to employ every man they can in the next six months as they have in the last quarter, he said.

Autos And Tires

The OPM banned all sales of new passenger automobiles and the SPAB approved an OPM plan for half production of those vehicles "within a few weeks." The temporary ban on the retail sale, delivery, purchase, or lease of new passenger cars and of new light and heavy trucks will remain in effect until January 15, at which time a permanent rationing program will be put in effect.

OPM delegated to the Office of Price Administration authority to withhold all new tires except for essential health, safety and industrial services. OPA set up tire-rationing boards in each county of the nation and issued regulations providing no tire can be obtained even for "essential" users unless a local garageman appointed as inspector has certified the need, the

THE WORLD WAR

Our Job is more than merely to defeat Japan, which we shall do. It is the greater job of restoring order in the world, of taking full, responsible leadership in that democratic half of the two halves into which the world has been divided. All people fighting for freedom are with us. For and with them in grand alliance of freemen everywhere to lay the menace which imperils our existence as well as our liberty. If we remain true to ourselves, with a sense of individual responsibility to match our individual effort, we shall win. And not till we win shall we enjoy an ampler life and see our stars again.—The President pointed the path.—Washington Post (Rep.)

local board has approved the application and the number of tires sold in each county is with in the county quota. New tires were defined as those used less than 1,000 miles. No new restrictions were placed on the sale of retreated or recapped tires.

Prices

Price Administrator Henderson set maximum manufacturers' prices for household cooking and heating stoves and fuel burners, and issued a temporary schedule for rugs and carpets. He sent a letter to all wholesalers and retailers of sugar stating the responsibility for keeping stable the price of sugar now rests with the nation's retailers. He set top prices for 39 grades of imported green coffee, and revised previous schedules for some 1,800 fats and oils, as well as for Douglas fir doors, paperboard and cotton goods.

Opportunities For War Service

The War Department announced it will employ, Americans-born civilian pilots between 21 and 46 to ferry aircraft from U. S. factories to nations receiving Lend-Lease aid. The Air Corps will train a limited number of men 20 to 27 years old in meteorology. Both groups may receive Reserve commissions. Third and fourth-year medical students and first-year internes may obtain Reserve commissions in the Army and Navy, and will be permitted to complete their medical training before being ordered to active duty. Between 200 and 300 additional commissions in the Naval Reserve Civil Engineers Corps are available for college graduates with limited practical engineering experience. Former non-commissioned Marine Regular and Reserve officers may also enlist in the rank held when last discharged, if they have not been out of the Corps more than four years.

The Maritime Commission lowered admission requirements for maritime cadets and for their training time in half. The Civil Service Commission issued a call for thousands of stenographers needed urgently for national defense work in positions paying $1,440 a year to start. Application forms may be obtained at any first or second-class post office.

Army

The War Department authorized return to active duty by February 1 of all inactive enlisted Reservists—the majority former trainees and National Guardsmen recently released from active duty. The Department said it will continue voluntary enlistment of men from 18 to 35. The Department adopted a uniform system for temporary promotion of all officers on the basis of merit.

Aliens

Attorney General Biddle ordered all Japanese, German and Italian aliens to surrender to local police authorities by 11 p. m., January 5 all radio transmitters, short-wave radio sets, cameras, and firearms of any description. Mr. Biddle amended regulations governing travel of an alien enemy to permit him most movement in certain cases where special permission is granted.

Agriculture

The Department of Agriculture reported supplies of agricultural commodities are at a high level with record production of many items. The general level of prices received by farmers during the month ended December 15 was 42 points above the corresponding period last year. OPM granted farm equipment manufacturers 83 per cent of materials used in 1940 for new machinery and 150 per cent of 1940 materials to produce spare parts.

MONEY TALKS

Many people are asking the question—Why did Japan enter this war? What does she have to gain by such action?

We realize that as a member of the Axis Powers she was expected to enter the war sooner or later. She had a military obligation to fulfill and she could not shirk her duty. But we must look at Japan's economic history for the past several decades, if we are to understand her real motive in entering the war. During the last thirty years Japan has become a prominent industrial nation.

An industrial nation must either possess natural resources within her borders or secure them from other countries. Japan has possessed few of the natural resources which make any nation a great industrial one. She has practically no iron ore deposits, very little coal, no tin, copper, magnesium, zinc, lead, or aluminum. She does not have rubber, nickel, ton, or oil. These are the resources which are essential to industrial development. Since Japan has none she must turn elsewhere. The Philippines have cocoanut oil and chromium; the Dutch and British East Indies have rubber and oil; Burma and British Malaya have rubber and tin; China has tungsten and antimony; Manchukuo has iron and coal; and India has valuable cotton. If Japan could control these resources her industrial future would be assured. But these resources and these lands are controlled by the United States, Britain and Holland, who have no intention of giving them over to any other nation.

Japan is driving for raw materials. Unless she gets them she can never dominate Asia. Japan is gambling. If she wins she can dominate Asia for generations to come. If she loses she must accept a secondary position in world affairs. Economic domination of the Far East would make her strong as a military power.

STALIN TURNS TABLES ON HITLER IN SOUTH

(The Courier Journal)

Joseph Stalin provides the best news of the New Year for the nations battling the Rome-Berlin-Tokio Axis. The capture of the fortified city of Kerch and of the Black Sea port of Feodosiya holds out the hope that the siege of Sevastopol will be raised and the Nazis driven out of the Crimean Peninsula. Kerch is separated from the old rich Caucasus by a narrow strait of from two to ten miles. Feodosiya is 55 miles to the West and on the road to the great Soviet naval base Yalta. The Red Army is doing in the frozen North it is duplicating in the area where Russian winter resorts are located.

In Hitler's last major offensive launched in mid-November—the offensive which Field Marshal von Brauchitsch is said to have opposed as bound too late in the season—Feodosiya and Kerch were swiftly overrun Sevastopol was brought within range of German guns. Disaster from Berlin seemed imminent. There was only one barrier to the Caucasus, the narrow strait connecting the Black Sea with the Sea of Azov. Hitler's Army especially around Tula was in panic flight. Hitler's intuition at that time seemed infallible. Less than three weeks later, however, the great Russian counter offensive was set in motion and now the tables are turning against the Fuehrer in the Caucasus.

In global warfare any success anywhere is success for the side that scores it. Certainly any blow that weakens the German war machine adds to the growing force that is aimed at Japan.

KENTUCKY FARM NEWS

The Lowell Road Homemakers' club in Mason county will landscape two rural school grounds. The Sardis club is cooperating with 41H clubs in improving school grounds and the Moransburg club will improve the grounds of the county infirmary.

McCreary county: Arthur Creekmore is starting a dual-purpose herd; Edd Stephens and John Harmon have purchased registered bulls, the latter from Dr. H. L. Donovan at Richmond. Other farmers adding breeding stock include T. J. Taylor, Webb Morley, Dr. R. M. Smith, Eva Kidd, Curtis Chitwood, D. L. Wright and Miss Nola Minton.

Curtis Park, Mercer county farm agent: "Mercer county farmers will help themselves by helping their country, since prices of farm products are at the highest level in several years. All goals can be reached with better feeding and management, and without much cash outlay."

Members of homemakers' clubs in Graves county recently learned that soaking liver in salt water before cooking simply soaks out most of its food values. There is no valid reason for soaking liver, they were told.

Kenton county homemakers' clubs have adopted the old proverb, "Eat it up, wear it out, and make it do." They have pledged themselves 100 per cent behind the national program against all kinds of waste.

In Jefferson county 2,150 farmers have indicated that they are planning to increase egg production by 321,983 dozens in 1942. They also will sell 24 per cent more beef, and increase milk production and vegetable growing.

THE FARM AND HOME

As soon as the tobacco crop is sold, take time to check on farm machinery needs. If any equipment needs new parts, order far in advance to obtain them on time. Extend the life of farm machinery by frequent cleaning and oiling. Leave nothing outdoors to rust.

Speakers at the annual Farm and Home Convention at Lexington January 27-30 will deal with how agriculture can help win the war. Among speakers will be Dr. Helen Mitchell, one of the leaders in the national nutrition movement, and Miss Mary Barber, who will tell how the soldiers are fed.

At many farm homes, attics still are filled with old furniture, discarded Christmas and birth day gifts, toys, old newspapers and magazines. The war program gives an opportunity to check these things over to see whether they cannot be discarded. If they aren't being used, they may be reclaimed by the proper agencies.

When storing shoes temporarily, do not polish them. Wash all polish off with saddle soap, dry thoroughly and then store. If the polish is left on, it dried and cracks, tending to make a crack in the shoe.

With America at war, homemakers know that both waste and uncalled for buying has become unpatriotic and unfashionable. The order of the day is to wear clothing as long as possible, have clothes cleaned and repaired often, and to conserve food.

Suggestions for a "victory garden" this garden plot in every possible way. As during 1917-18 "food will win the war."

Fleet Commander

Rear Adm. Husband E. Kimmel, commander of the combined U. S. Fleet and the Pacific Fleet, leads several

AMONG THE COUNTY AGENTS

One hundred and thirty-three Hancock county farm men and women took part in "sorghum day," pronouncing Stewart Dejarnette Utility champion grower.

Campbell county 4-Hers held an oyster soup supper as a community activity.

Mason county homemakers sponsored a Christmas party and defense stamp buying program.

Many Carlisle county farmers, who formerly sold their Burley crops at the barn, now are stripping and then selling the crops.

Ready response is being received in Rockcastle county to the plan to have a brood sow for every farm.

A check-up shows that fully 75 per cent of the gardens in Hopkins county had 15 vegetables or more.

Montgomery county farmers are feeding steers and beef calves for the mid-winter market of top prices.

Knox county farmers have received 3,500 tons of limestone and ordered 2,000 tons more for immediate delivery.

Lawrence county farmers have received poultry record books and instructions for 1942.

Selling their culled poultry, Adair county farmers invested the money in laying mash.

R. G. Morgan, Whitley county, has staked out a farm recovery to be constructed at once.
