

SCHOOLS COME FIRST IN DONALDSON'S Program!

He said: "I shall advocate and urge the Legislature to appropriate to the common schools for each year a sum not less than \$125,000.00."

Figured on the present school population-- THAT IS MORE THAN \$16 PER CAPITA, MR. AND MRS. PARENT!

In addition, Mr. Donaldson said: "I shall advocate and urge the Legislature to provide an annual appropriation of \$25,000.00 for the maintenance of the public schools, to be distributed on the basis of the number of children in each county."

A vote for DONALDSON is a vote for BETTER SCHOOLS

Primary--August 7

Major Factors Of Forces Making For War and Peace

By Dr. O. B. Baber, Ph. D., D. D., University of Kentucky, Lexington, Ky.

It is a truism that the world is being pulled in two directions. On the one hand, there is a strong tendency toward peace and cooperation between nations. On the other hand, there is a strong tendency toward war and competition between nations.

The forces making for peace are: the desire for stability, the need for economic cooperation, and the realization that war is a costly and senseless endeavor.

The forces making for war are: the desire for power, the need for resources, and the realization that war is a means of achieving these ends.

Red Cross News

The Red Cross is actively engaged in relief work throughout the world. It is providing food, clothing, and shelter for the millions of people who are suffering from the effects of war.

In our own country, the Red Cross is providing relief for the thousands of people who are suffering from the effects of the economic depression.

The Red Cross is also providing relief for the millions of people who are suffering from the effects of natural disasters.

Production

The production of goods and services is essential for the well-being of the nation. It is the foundation of our economy and the source of our wealth.

In order to increase production, we must invest in new machinery and equipment. We must also provide training for our workers.

The government has a responsibility to encourage and support production. It should provide incentives for investment and research and development.

Home Service

Home service is an important part of our national effort. It is the backbone of our economy and the source of our strength.

Home service includes the production of goods and services for the home market. It also includes the provision of services for the home market.

The government has a responsibility to encourage and support home service. It should provide incentives for investment and research and development.

LOOKING AHEAD

What is the future of our country? The future of our country depends on the choices we make today. We must choose between peace and war, between cooperation and competition, between stability and chaos.

The future of our country is in our hands. We must take responsibility for our actions and for the actions of our government.

We must work for a better future for ourselves and for our children. We must work for a world of peace and cooperation.
