By John S. Gardner...

As a source for human dis-

count last week a cover crop

is an important consideration

of the soil itself through the

water. On the other hand,

the soil is in a state of

rest. This is a very important

factor in the success of the

crop. The soil should be

kept in a state of rest

throughout the winter

months. This is a very

important consideration

in the success of the

crop. The soil should be

kept in a state of rest

throughout the winter

months. This is a very

important consideration

in the success of the

crop. The soil should be

kept in a state of rest

throughout the winter

months. This is a very

important consideration

in the success of the
