

The Hot Bed

pioneers of America first Europe even then they could see, that dimly, certainly that later came using it. They cut out European classes and became it.

Keep Our Culture

Having spent eleven years in other lands, I am glad to be in America and I could never advocate leaving the rest of the world. But no individual could be more than I from transplanting foreign practices in America as we are attached to our own soil. We must preserve our culture and abroad it to pollute our few air with philosophies that are founders of this free country as specifically excluded.

Nothing could be more deadly to the American way of life than to allow the mass completely to change the American way of life in the United States than to dominate American culture. Permitted to do its course unrestrained it will choke out freedom, our property, and finally our ambition.

LOOKING AHEAD

Prize of race is something America has never developed to a high degree because it is to compete with many different races. Just as Americans have every right to pride in their own race, so other nations have every right to pride in theirs. We have built up from the best of the best foreign countries.

Some people have been to the United States and are in awe of it. All Americans do not dispute that the United States is the greatest nation that has ever existed on this earth. But we do not believe in the United States that is not the United States of America. We are for the United States of America, not for a United States that is not the United States of America.

Of Interest to Farmers of Nicholas County

Time of Year to Wash for Most of Cattle, Sheep

Blind and dimmer, and with fewer of concern among stock raisers in this season, it is time to wash the animals again on pasture, having lowered the rest of the year. It is the lack of medical attention and the amount of insecticides being moved conditions impose by the present season.
