Clear channeling the latest livestock and produce news, he counsels farmers daily in six states . . .

JOHN F. MERRIFIELD . . . WHAS Farm Co-ordinator, plows the air with the friendly desire to improve agricultural conditions for his listeners. Backed by 50,000 watts, his advice falls on fertile soil . . . in Kentucky, Indiana, Southern Illinois, Northern Tennessee, Eastern Missouri and Southern Ohio.

Man of the soil, John hails from the tall corn state, where he rotated his crop of knowledge in Iowa State College of Agriculture with extra training in journalism and economics. Radio lured him from the newsprint to took a vacation job, at sixteen, as office boy in a big Chicago station. Considered one of the best informed agriculturists in the area he addresses, Merrifield belongs to fifteen farm organizations, has walked and driven thousands of miles over farm land since WHAS launched its Farm Department in 1940, upon John's arrival.

From "First Edition" digest of reports covering nine principal mid-west markets, aired at 6:00 A.M., to midday government quotations, John provides accurate and complete information. He knows farmers haven't time to write . . . yet 36,000 listeners responded when Merrifield offered in three 20-second announcements to assist in procuring radio batteries for farm sets.

A rugged, wholesome fellow, John's face lights up when he talks to farm friends, many of whom he addresses by first names. Apple of his eye is his three-year-old daughter.
