VOTE YES FOR BOTH

The Good Roads Amendment* YES [X]

The Soldier Vote Amendment* YES [X]

1. The Good Roads Amendment will protect your Road Fund from diversion to other purposes. Guarantee that your gasoline taxes, auto license fees, drivers licenses, etc., will be used for highway purposes only.

2. Kentucky needs every penny of its Road Fund for ROADS!
   (a) To Match Kentucky's portion of Federal Highway Aid!
   (b) For road construction and maintenance deferred during four years of wartime shortages of material and labor.
   (c) For postwar jobs for Kentucky's returning veterans and war workers.
   (d) For 27,500 miles of Kentucky's rural roads still "in the mud!"

3. The Soldier Vote Amendment will give to Kentucky men and women the right to vote in Kentucky elections while away from home and serving in the Nation's Armed Forces. Our constitution now denies this right. Vote "YES" for the Soldier Vote Amendment and correct this injustice.

"Fridgidaire, the World's largest manufacturer of refrigerators, now has an inventory of thousands of refrigerators available to the public," said A. T. Clinkenbeard, the local Frigidaire dealer at Carlisle. Construction on the first model began in July of this year and the finished products were temporarily frozen in a government stockpile, however. The restriction on the sale of refrigerators to the public has been lifted and Fridgidaire are now available for civilian consumption."

A. T. Clinkenbeard was discussing the features of the new Frigidaires. "They have all of the newest features and quality developed by Fridgidaire. The permanently-sealed-in-steel rotary Meter-Miser. Lifetime Porcelain Finish. The Quickcube Ice Tray, and many other exclusive Frigidaire features are again present in these refrigerators," added Mr. Clinkenbeard. "The five year protection plan on sealed unit mechanism is again proof that Frigidaire's workmanship and the quality of its products are among the best available."

"When Frigidaire's first war contract—construction of 50 caliber machine guns expired in July of 1945, Frigidaire, with the authority of the War Production Board, began its first production of refrigerators since April 30, 1942. Following the cancellation of all war contracts at the Dayton, Ohio plants on VJ Day, the rapid reconversion to civilian output in the other sections of the mammoth Ohio plants and the availability of the necessary materials has enabled Frigidaire to produce a much greater quantity of refrigerators than was at first anticipated," continued Mr. Clinkenbeard.

"Though, production on refrigerators is exceeding the most optimistic wartime predictions there are still not enough Frigidaires to meet the ever increasing demand, but officials at the Frigidaire plants believe a daily production of several thousand refrigerators is possible in the near future," concluded A. T. Clinkenbeard.
