A MESSAGE FOR PERSONS LIVING IN RURAL AREAS

Rural telephone service is more highly developed in this country than anywhere else in the world. We are developing a widespread program to further extend and improve service to rural dwellers in the South.

As soon as conditions permit, the necessary manpower and equipment will again be put to work on the job of expanding rural service—just as we were busily engaged in expanding this service prior to the war.

The goal is to bring the telephone to the greatest possible number of rural families.
