POSTWAR ADVISORY
PLANNING COMMISSION OF KENTUCKY
says a new state trucking law is
Urgent!

Commission's report "in direct relation to roadway improvements are the laws regulating the weight of motor trucks and their loads. It is urgent that Kentucky face this issue promptly and squarely and revise outmoded limits which at the present time are hindering interstate commerce."

OUT-OF-DATE LAW IS A THREAT TO YOUR INCOME! HERE'S WHY!

All communities in Kentucky are dependent on trucking . . and 65.9% of these communities have no transportation service except trucking! Yet, to transport the vast quantities of goods Kentuckians need for themselves or want to sell to others, we are still penalized with the most restrictive size-and-weight trucking law of any state in the nation!
For example, 92% of all states have a gross weight limit which is 122% more than Kentucky's permanent law allows . . and the average for all 47 states is 233% more than the Kentucky law permits.
This means that Kentucky farmers frequently make 2 trips to haul the same amount of farm products which neighbor-state farmers haul in 1 trip. It means that trucking costs are higher for business and industry, too. This added cost stifles trade and makes the price of consumer goods higher proportionately than elsewhere.
Who pay? You do! All Kentuckians do! And, we'll continue to pay until Kentucky gets a new truck law, such as the nationally recommended "uniform code", which has already been adopted in about 70% of all states!
Talk . . wire . . or write . . to your State Legislators without delay. Let them know that you, in addition to the Planning Commission, believe that a new, modern truck law is urgent!

THE PRESENT LAW
Kentucky's permanent law limits total gross weight of a truck, plus load, to only 19,000 lbs. . . and height of 12 feet 6 inches. Width, 96 inches. That's 22,000 lbs. lighter than 47 other states allow . . and 10 feet shorter than 40 other states permit!

THE PROPOSED LAW
Every state bordering Kentucky has higher limits than Kentucky's proposed law would be comparable to theirs . . and should at least equal the maximums allowed in 70% of all states!
