There Is No Excuse For A Telephone Strike And We Are Trying Hard To Avoid One

Negotiations With The Union Have Been Going On Since February 17. They Are Still Proceeding And Your Telephone Company Has Hopes That An Agreement Can Be Reached That Will Be Fair To Everybody.

The Southern Bell Telephone Company believes that its employees should be well paid, and that their wages should compare favorably with those paid by other concerns...

In the present negotiations with the Union, we have offered a renewal of our present liberal contract, but the Union insists upon unreasonably large wage increases.

Telephone employees' wage rates are now the highest in history. They have been increased 75 per cent since January, 1941.

These are increases in wage rates and are in addition to millions of dollars in regularly scheduled raises given our employees.

This is an important point to remember in any discussion of telephone wages. These regular raises have been an advantage to telephone employees for many years.

Under our present contract, thousands of our employees receive wage increases as often as every three months. Other thousands receive increases every six months or every year.

A five-day, 40-hour week is the basic work period. Non-supervisory employees, such as operators, linemen, installers and repairmen receive over-time pay for work beyond eight hours a day, 40 hours a week, and also receive premium pay for Sunday, holiday and evening and night work.

The following table shows some of the present wages paid, according to the size of the telephone exchange.

Table showing wage rates for various telephone exchange sizes. Columns include Starting Rate, Top Rate, Operator, Installer, Repairman, and Stenographer rates for different exchange sizes.

UNITION DEMANDS TOTAL \$69,000,000 A YEAR This Is Equal To An Increase Of \$33.0 A Month In The Average Telephone Bill

The demands of the Union on wages and other matters would increase the cost of providing telephone service by about 69,000,000 a year.

In terms of the average telephone bill, it amounts to about \$3.30 per month for every one of a little more than 1,731,000 telephone subscribers, and it is the telephone user, after all, who pays the money that we pay out in wages.

A telephone strike would be such a serious thing for you, for telephone employees, and for the Telephone Company that everything possible is being done to prevent it.

Further Increases In Wages Necessary Additional Increases In Our Rates

We earnestly desire to go as far as possible in meeting the wishes of our employees and the Union.

Commissions throughout the southeast asking for increases in rates to help meet the cost of wage increases granted last year.

An Obligation To The Public Welfare The Telephone Company is asking Union leadership to recognize the obligation of all of us to you—the public.

In view of the facts presented here, there does not seem to be justification for a complete revision of our working practices as requested by the Union.

We want to keep our employees happy about their wages and their jobs. We want to keep you pleased with your telephone rates and service.

A telephone strike would be such a serious thing for you, for telephone employees, and for the Telephone Company that everything possible is being done to prevent it.

There is no excuse for a telephone strike.
