Tobacco Blue Mold

Fermate Fungicide

Fermate is Recommended As A Dust And As A Spray Mixture

Advantages of Fermate for Blue Mold:

It is SURE It is SAFE It is ECONOMICAL It is EASY TO APPLY It is COMPATIBLE

Plants treated with "Fermate" have shown consistently better growth and deeper color under critical comparison than those treated with any other chemical for Blue Mold control.

17 1/2% FREIGHT RATE INCREASE

INCREASE IN FREIGHT RATES

55% INCREASED COSTS

INCREASE IN WAGES & 1 BILLION \$95 MILLION

NEW PAYROLL TAXES \$100 MILLION

INCREASE IN MATERIALS COSTS \$680 MILLION

2 BILLION \$36 MILLION

Why freight rates are going up...

Since 1939, railroad employees have had three general pay raises totaling 52 1/2%, and the price of fuel, materials and supplies have risen 174 1/2%.

But when the war ended in 1945, the railroads were still hauling freight at rates as high as, and in some cases lower, than when the war began.

Without increased revenues, railroads could not meet these costs and also provide improvements in equipment and facilities—improvements that are essential for the low-cost efficient and passenger services which are necessary to America's high standard of living.

Under these circumstances—and almost a year after the last major wage increase—the Interstate Commerce Commission recently approved an average increase in freight rates of 17 1/2%.

Of all the price increases in America today, few have been so little and so late as this in the price of railroad transportation.

How important are healthy railroads to a prosperous country? Only when the railroads are financially healthy can they provide the new equipment, improved roads, and better terminal facilities needed for still better service to you.

You can continue to do this only if there is a reasonable balance between railroads and outgo. Like any other's, the railroads must make enough money to pay for their operating expenses.

We are publishing this and other advertisements to talk with you at first hand about matters which are important to everybody.

The railroads are among the largest employers of labor. They buy over 100,000 different products. They pay big taxes—taxes which are spent not only for public schools, public health, and police and fire protection, but also for highways, airways, airports and inland waterways.

Railroads are America's lifeline—keeping goods flowing among the 48 states day and night in all weather.

They are the backbone of our nation's economy.

SEVENTEENTH CENTURY RAILROADS
