Peace of Mind all through the Night

with a convenient Extension Telephone within arm's reach

Sleep is sounder and nights are safer when an extension telephone is on guard.

This is one of the many advantages an extension telephone provides for the home and family. An extension saves time and steps. It improves your service and makes your telephone more valuable by increasing its usefulness. Extension elephones can now be installed in homes at small cost. You don't need to write us or com to the office. Just call our Business Office.

Orders for main telephone service are some times delayed because of shertages of centra office and other equipment, which are no involved in the installation of estension tele phones. That's why you can now get extension telephones, though there may still be delay in furnishing main telephone service.
