How can you pass up prices like these?

AS we've been saying for quite a spell — "Whatever your price range—Better buy Buick."

But maybe we'd better get down to brass tacks, as to just what this suggestion means.

In the lower-price field, this has been happening:

Four out of ten Buick SPECIALS—bought by people with a car to trade in—have been bought by folks who formerly drove one of the so-called "low-priced three." They found they could afford a Buick!

In the fine-car field, something even more impressive has happened:

Four out of five people who looked at a ROADMASTER and another very distinguished automobile decided in favor of ROADMASTER!

So—whatever your price range, take a look at our prices—and at what you get for your money.

What you get is the thrill of owning the greatest Buick of all time—as registered by record-breaking sales.

What you get is power and style and comfort and performance that are hard to match in any other automobile.

More specifically—you get the power-with-thrift of Buick's famous Fireball high-compression engine—a style that stands out in any company—a ride with the comfort of coil springs on every wheel—and performance that makes you feel like the head man on any highway.

Better come in today—and see what can be done about getting quick delivery.

THIS PETTY PACE
BY BROWN LEE YATES

A YOUNG FEMALE MOTH with yellow-spotted wings fell in love with a sloth. Her romance grieved her disappointed parents. Lazy people are referred to as "slothful"; her young man would be too much the laggard even to keep her in clothes. But the sloth knew it requires no effort to keep a moth in clothes

The sloth, when it came to wooing, was no sloth. Soon he had persuaded her to elope with him to his hole in the ground, or in a tree, or in the head—wherever sloths live. Her brilliant friends forsook her, and even her parents stopped calling, because her imporvertished condition brought tears to their eyes. Her husband's solitary occupation was hanging from a tree, back downward, nibbling on leaves.

Near the poor home of the unhappy pair stood the duke's castle. The eccentric duke was a collector of rare moths. Many days, when she didn't have a rag on her back to eat, the pretty young moth would lift her wings toward the walls of the castle and fift over for a feast on the duke's waistcoat. The duke was so obsessed with catching a rare moth that he was unaware that while he was afield with his butterfly net, his wardrobe became a cafe for moths.

They made a gay and cosmopolitan set, these vagabond moths who came from afar to chew on the old gentleman's waistcoat. Perhaps it was the part the fumbling hands of the duke often spilled upon the garment that turned these parties into revels. Many times the disillusioned young wife came home in a drunken stupor.

One time, she came home so intoxicated that she fell unconscious upon the floor. The unsuspecting and despairing husband clasped his wife into his arms and rushed frantically to the castle, seeking medical aid. The duke was overjoyed to see the object of his lifetime search—seems she was a yellow-winged leopedon, nearest of all moths since the advent of mothballs—preserved in alcohol. She became the darling of entomological circles, and the duke settled a large sum of money upon the sloth.
