New Fall Fashions Will Favor Plaids

Plaid Rated Eye-Pleasing And Economical

NEW YORK—The returned edition of the popular can look forward to wearing the fall fashion scene in plaid this year, reported by fashion trend analysts here.

Early on the eyes and stay on the buffet, plaid will lend color to the fabric content of the business costume, and the smart "casual" wardrobe. Solid colors will get the nod for use as accessories.

A perfect example of the complementary side solids will be called upon to play the dress left. The plaid in red and green does feature large green plaids and a variety of plaids with the green falling into soft folds from top gathering. A double-breasted jacket features a handsome handkerchief.

Another feature for fall is the lively plaid called at right. Eye-catching target is achieved through use of solid colors in the fall dress of the skirt and sleeve. The big transition colors that are used. Targeting plaid and stripes in the skirt. Solid color in the belt sets off the skirt.

Both dresses feature plaid and stripes will be able to give mid-century wardrobe with plaid as trend and stripes as a multi-colored effect.
