Farm Scrap Needed For Making Steel

The University of Kentucky, its Agriculture Extension Service, is cooperating in a nation-wide drive to collect scrap metal for steel production so essential in defense mobilization.

At the request of the National Production Authority, the U. S. Department of Agriculture, the University College of Agriculture and Home Economics and county agents throughout the state will concentrate their efforts in the drive set for Oct. 15 to Nov. 15.

Farms are said to be a good source of the iron and steel scrap needed for defense production. Steel mills especially need the higher grade, heavyiery types of scrap found on farms.

The drive will offer a chance to clear away old machines rusting in fields and fence corners. Prices paid for scrap are not high, but they are above prices paid in World War II.

CHRISTIAN SCIENCE

"Are Sin, Disease, and Death Real?" is the subject of the Lesson-Sermon which will be read in all Christian Science churches throughout the world on Sunday, October 14, 1951.

The Golden Text is: "The Lord is my strength and song, and is become my salvation . . . I shall not die, but live, and desire the works of the Lord."

Among the citations which comprise the Lesson-Sermon is the following from the Bible: "Blessed be the Lord God, the God of Israel, who only doeth wondrous things. And blessed be his glorious name for ever: and let the whole earth be filled with his glory." (Ps. 72: 18, 19).

The Lesson-Sermon also includes as the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "All reality is in God and His creation, harmonious and eternal. That which He creates is good, and He makes all that is made." (P. 472).
