STRONG for the job...

The men and women of Southern Bell have the skill to do the big job of furnishing more and better telephone service to the growing South. But it takes more than skill. The millions of dollars required and used for constructing buildings and lines and installing central office equipment must come from inventors—people who put their money into the telephone business with the expectation of a reasonable return. There's still so important that savings of your Telephone Company be kept at a minimum.
