## County Fire Protection

The need of rural fire protection becomes more apparent with each fire reported in this county. Only Monday a fire occurred in the Headquarters section of Nicholas and fire trucks from two cities showed what how valuable their aid is in saving property.

The Mercury is happy to report that at the last regular meeting of the Nicholas County Board of Commissioners the establishment of a county fire department have been discussed and were looked upon with favor by the governing body of this county.

At their next regular meeting a representative of a fire equipment company is scheduled to make an address on the subject of fire equipment that will be needed and how such county departments can be financed.

We believe it is the interest of every citizen in this county to have a fire department established for Nicholas. The need of it is great.

## Grass Roots Opinion

There has been several reports, repeated in many newspapers that the first hydroponic plants in this county were raised in Lexington. These reports seem to be incorrect.
