The Carlisle-Nicholas-County Development Association,
Carlisle,
Kentucky

Gentlemen:

If you accept members who have nothing whatever to sell and no income property in Nicholas County, I would like to join your association as I want to see the town and county made a better place in which to live and provided with better stores from which I can buy.

When I moved to Carlisle, last Spring, it was necessary for me to build a home. I bought every item that went into this home from established local dealers and the entire job was done by 12 good citizens of Nicholas County. At that time it had not occurred to me that I should buy the lumber "in the mountains", in Lexington or from Alabama. I did not know that concrete work, brick work, plastering, linoleum laying and other work should be done by men from Millersburg, North Middletown, Paris or Cynthiana. I learned this later from the older citizens, after my house was finished and it is a source of satisfaction to me that I did not get a jerry-built job of questionable material at any price.

I am still wondering why local merchants, who want a few items that are not in their own line, will hop in a car and rush to Lexington for them when they are available in the same block where their own stores are located. The automobile expense will average $4.90 for the trip, half a day or more time is lost and all local dealers get is a black eye.

After the December 11, 1952 edition of one of the local newspapers came out I can see why farmers and non-dealer citizens might think the grass was a little greener over the fence. This issue carried the advertising of SEVENTY FOUR (74) concerns in neighboring counties who spent good money, merely to thank their good customers in Nicholas County. The securing of this advertising by the local paper probably required more time and effort than has been expended during 1952 in securing timely news and worth while editorials and certainly more than has been devoted to developing local dealer advertising.

Yours Very truly,

Will J. Greene,

Dear Warren:

Please send "The Mercury" to Tom Curtis, Howe Farm R. R. 2. If he is taking it, don't send it. I love "The Mercury" and feel that he should have it. All of my friends say I prefer it to "The Herald," which is true. I want to live in Carlisle if I had a road to my farm. It is a disgrace to Nicholas County. I can't even get near the place. Tom's two lovely children can not get to school, always.

Navy Plans 'New Look' For Latest Carriers

'Canted' Deck for Jets Among Changes Planned

Special to Central Press

WASHINGTON—The Navy is planning a series of alterations on modern aircraft carriers to accommodate new high-speed planes and the larger aircraft needed to carry atomic bombs.

Announcement already has been made of a million dollar modification of the USS *Antietam* to permit the landing of high-speed jets with a greater margin of safety than was available before. The Navy said it changed the vessel's flight deck to a "canted" angle to carry out this purpose.

U. S. Carrier

Another modification is planned on the huge, 60,000-ton *Forrestal* which will have a flush deck without obstructions to mar take-offs or landings by its planes. In addition to the *Forrestal*, two other super-carriers are scheduled for construction.

The so-called "island" on the ship—containing the bridge, guns, radar and other carrier equipment—will be on an elevator that may be raised or lowered at will.

This will make it possible for the gigantic carrier to give its pilots a flush deck when they need it but still have an island for use in normal travel or times of emergency.

Another contemplated development is the "angled" or "bunger landing" platform which literally would force planes to land uphill, thus reducing the landing speed of many "hot" jet craft.

● **NEW FACE IN STORE**—The Capitol will be sporting a new face when Congress sets up shop again next Jan. 2. Capitol architect David Lynn has been busy during the congressional recess cleaning up the place with the aid of workmen.

The tidying job, of course, has been non-political, since no one knew when it began last summer which party would return in control of Congress.

The private mono-rail subway cars that carry passengers from the Senate Office building to the Senate wing of the Capitol is one of the items being slicked up. New track has been laid for the 700-foot railroad—built in 1908—to take the bumps out.

The Capitol dome and the old central part of the building have been coated with 2,500 gallons of paint since the summer and additional paint has gone on main halls, senators' cloak rooms, restaurants, press galleries and kitchens.

All 60 of the senate crystal chandeliers in the building were dismantled and dipped into an ammonia solution.

In addition, the famous paintings in the Rotunda were cleaned and work was begun on a new section of the unfinished mural at the inside base of the beautiful dome.

● **FRANKFURTER NOW 70**—Even though he once advocated it, don't look for Supreme Court Justice Felix Frankfurter to resign in the immediate future now that he has reached the retirement age of 70.

Court attaches say they expect Frankfurt to remain with the highest tribunal for some little time despite Pai age and the Republican election sweep.

Supreme Court Justice

Ilgankfurter backed President Roosevelt's proposal for early retirement of Supreme Court justices. Now that he is getting up in years, he has apparently changed his mind. Court officials say he is in excellent health.

May Stay On

One reason why Frankfurter may want to continue on the job is his dinterest in the question of racial aggregation. The court early next month will open hearings on the constitutionality of segregation of Negro and white children. The case is expected to take months to settle.

We're wishing you a bigger, better, and happier New Year for 1953.

HARPER'S GARAGE

Lerman Bros.

Babson's Financial Outlook For 1953

(Continued from Page 1)

trols will be a thing of the past in most areas by the end of 1953.

Home building will be less in 1953. Prices may weaken during the latter part of the year. Building costs should edge lower. Only small new houses will be in demand.

In my opinion, the cost of mortgage money will tend somewhat higher during 1953.

Construction of municipal and public works should rise moderately in 1953 as compared with 1952. This may be stepped up sharply in the year if business falters. There may be a surplus of tax-free bonds.

A moderate slide-off in the sale of commercial farm properties can be expected. No bad break, however seems likely in 1953. Fear of World War III, moreover, should help farm prices.

Population trend is away from the big cities. Fear of possible bombing and automobile overcrowding will continue as a drag on city-realty values. Continued migration from the urban centers will help suburban properties.

For those who plan buying new homes in 1953, I strongly urge the purchase of acreage in suitable suburban areas. Surely, the H-bomb experiments should quicken the trend toward subsistance farms.

As public housing programs are far behind schedule, the next Congress will not promote such in 1953 unless the need for pump-priming becomes greater.

Tax Easing Will Be Slight

Tax relief will come mostly from expiration of present laws rather than from a new enlightened tax program. Barring further international problems, the present excess-profits tax will be permitted to expire at the end of June, 1953.

If the need for new taxes continues high, after expiration of the excess-profits tax, the new Congress may consider additional excise or manufacturers' sales taxes. They may also serve to discourage consumer spending, if the war danger become acute.

State and local taxes may be increased moderately here and there during the year 1953. However, I do not look for total advances in such to be so great in 1953 as they were in 1952.

There will be no increase in capital-gains taxes during 1953, but read paragraph * below. Income taxes may be reduced.

Foreign Trade Outlook

Exports will fall again in 1953. The drop in imports will be much less than in exports. The new Administration will be urged to promote foreign trade instead of foreign aid. Only by buying our neighbors' goods can we get them off the relief rolls. To save ourselves, I predict, we will buy more abroad, although this will be hard on some United States manufacturers.

I look for no change in the official United States buying price for gold. We won't "monkey with" the mint price of gold until the nation gets really "hard up."

CONCLUSIONS: Profits, Prospects, Stocks and Bonds

For the year as whole I look for business profits to be slightly lower than in 1952. Earnings will be better during the early months, with a decline occurring later in the year. Profit margins will be cut by stiffer competition from both domestic and foreign sources.

Recently upped wages, plus some additional 1953 boosts, will also put heavier cost pressure on profits.

Some companies that have been hard hit by excess-profits taxes may show improved earnings when the excess-profits tax expires June 30.*

* There will be a cushion under falling profits provided by the current very high tax rates. If profits slide, Uncle Sam will share the heavier loss. This very fact, however, will make it difficult for Congress to reduce the rate of taxation.

Stocks are high historically. We are approaching the end of a long period of prosperity, much of which is based upon artificial measures. Therefore, sometime during 1953 I forecast lower stock prices than exist today.

Yet, do not forget that the stock market will at about the same price point when President Hoover was by a landslide in 1928. With prosperous good times early in 1953, confidence might again create a buying boom. If an "Eisenhower bull market" develops, I strongly urge readers to take profits and build up cash. Wells in 12 months after Hoover entered the White House the Industrial Averages fell 100 points.

New Administration will not favor "soft money" policy. Therefore, some further rise in interest rates seems probable. On this reason, I favor high-grade, short-term bonds, rather than long-term.

Finally. Wise investors are taking no action unless prepared to follow a carefully **planned and supervised** investment program. The keystone of this program will, in 1953 as in 1952, prove to be the policy of diversification and selectivity. Among these groups which offer safety and good yield are certain first insurance stocks, bank stocks, variety chain store stocks, food processing companies, and telephone companies. EVEN THESE MAY FAIL US UNLESS OUR NATION HAS A REAL SPIRITUAL AWAKENING. This must include both YOU and ME.
