PROFIT FACTS
Farm profit is the difference between the price farmers get for their products and the cost of production and the cost of production is expected to be UP and farm profit DOWN. Even though there is little farm profit, the price for the products is not high. The higher the price, the higher the profit. The Kentucky farmer that produces top average yields in 1952 will not get as much for his product as the farmer that produces top average yields and lower cost of production in 1953. The cost of fertilizer in 1953 is expected to be about 10% more plentiful than in 1952, which is fortunate because about 20% of our present day production is the result of added plant food.

THE CHURCH FOR ALL
ALL FOR THE CHURCH
The Church is the greatest force on earth for the building of a better world. It is the only organization of spiritual power which is not a mere party, but a living, breathing, and growing body. It is the only organization that has the power to change the hearts of men and women, and to bring about the Kingdom of God on earth.

MEMORY
The memory of the past is the key to the future. It is the only way we can learn from our mistakes and avoid repeating them. It is the only way we can understand the meaning of our lives and the purpose of our existence. It is the only way we can find the path to a better future.

Have you ever thought about the part your Telephone Company plays in the life of this Community, the State and the Nation? Here are some things it does:

1. Pays good wages to its employees—many of them in your locality in the employer's home town.
2. Pays large amounts in taxes that go to support government, education and public institutions.
3. Takes part, both as a Company and as individuals, in many worthwhile civic endeavors.
4. Provides the best possible telephone service at the lowest possible cost.

Accepting the responsibility of citizenship, we believe, is an important part of good telephone service to this community.
