Go To Church Says Babson

(Continued from page 1)
Some isolated events. Any relief for the individual "small" taxpayer will be saved until the election year, 1955.
The only big political news in 1955 will not be made by the laws that will be enacted, but by the tremendous preparations for the 1956 presidential campaign. Those who claim that President Eisenhower is at heart a liberal will get along well with a Democratic Congress selected in the interest of the masses of people.
42. World War III. In my opinion, the initiative in international affairs still rests with Russia. The Kremlin is not ready for an all-out attack and no one in the West wants World War III. Malenkov is now pushing a "Peace Offensive." I am referring here to the year 1955—over the long term, I still feel that a major holocaust is inevitable, but I forecast no World War III in 1955.
43. Foreign Aid. Our foreign efforts during the year will continue to aim at bringing the "haves" and "have-nots" closer together. The building up of Europe, particularly in Germany, is the core, but Russia will make spectacular gains in the Far East, particularly in India.
44. Foreign Competition. As American trade and the British Empire Organization goes into gear, I forecast further improvement in Foreign Competition from European manufacturers will, however, intensify. Reciprocal trade deals will be pushed. I would not be surprised to see a decline in our exports in 1955 and an increase in imports.
45. Churches and Charities. I forecast that the special awakening which started in 1954 will continue into 1955 with an increase in Church members. This is a very important sign that the character of our people is changing. This will also increase due to the more frequent attendance on church, school and hospital.
46. Travel and Sports. I forecast more money will be spent on travel and sports in 1955. This is becoming an important new industry.

State Dimes Drive Begins Monday
Kentucky opens its annual March of Dimes campaign on Monday, January 3, in conjunction with the national effort to raise \$40,000,000 to fight polio in 1955.
But was the most significant year in the history of the National Foundation for Infant Paralysis, which for a preventive against poliomyelitis. Kentucky experienced its second highest polio case rate in history, second only to 1952 when 1976 cases were reported.
Kentucky had a large part in the 1954 vaccine field trials last spring when 7000 children in Jefferson

Florida, California, Arizona, New Mexico, the Great Lakes Region, New England, and the Northwest.
47. New Metals. Alloys. Next to automobiles, I expect great growth in the use of new metals and alloys. I forecast that inventories of stocks will be sought in 1955 as well as the year 1954.
48. Advertising. I forecast business spending in this field will increase further in 1955. It not only the saturation of individual businesses but in the best advertising for national purposes.
49. Population. I forecast the population will continue to increase during 1955, with a growing percentage of young people between 14 and 22. This means a greater demand for clothing, college education, and especially for new school buildings.
50. Conclusion. Developments in Medicine, Health, and Good Works—worth more attention to your family—to create reserves for real trouble which some day will come. Go to Church!
